Origins and Originality in Family Therapy

and Systemic Practice Maria Borcsa, Peter Stratton, 2016-09-15 The founding volume of the European Family Therapy Association book series presents new ideas confirming the crucial importance of systemic family therapy for family practice. Spanning paradigms, models, concepts, applications, and implications for families as they develop, experts in the field demonstrate the translatability of session insights into real world contexts, bolstering therapeutic gains outside the treatment setting. Chapters emphasize the potential for systemic family therapy as integrative across theories, healing disciplines, modes of treatment, while contributors' personal perspectives provide unique takes on the therapist's role. Together, these papers promote best practices not only for therapy but also research and training as professionals delve deeper into understanding the complexity and diversity of families and family systems. **div** Included in the coverage: The story of an encounter; the systemic approach at the heart of innovative clinical practice; Steps to an ultramodern family therapy; From networks to resonance; the life journey of a family therapist; How to give a voice to children in family therapy; Systemic theory and narratives of attachment; integration, formulation, and development over time; Virtual relations and globalized families; the Genogram; 40 interview; Origins and Originality in Family Therapy and Systemic Practice offers practitioners and other professionals particularly interested in family therapy practice timely ethical tools for enhancing their work. **div** Please Help Me With This Family Maurizio Andolfi, Russell Haber, 2013-10-28 Please Help Me With This Family is based on the premise that it is generally useful to expand the therapeutic system when it is not working. By calling in additional resources when therapy reaches an impasse, the therapist is giving two strong messages to stuck families: 1) the admission of the failure of the present system to grow beyond the impasse and 2) a model of creativity in recruiting resources to improve chances of success. Often the resources in the large system hold the keys to uncovering and correcting troublesome relationships and behaviors in the smaller system. Please Help Me With This Family is divided into four major sections, each illustrating unique approaches and methods for unlocking resources in family and therapeutic systems. The first section opens with a comprehensive review of the theoretical roots of family therapy consultation, followed by a discussion of the different faces of consultation around the world; a detailed case study of an anorectic family in which Maurizio Andolfi successfully provokes a therapeutic impasse and to which Carl Whitaker provides fascinating insights into his role as a consultant. Section II discusses the variety of consultative resources available in the client system and how best to harness them. Chapters cover using the child as consultant; using family of origin and friends as resources; and the use of consultation in treating addictions. Using colleagues as consultants is the focus of the third section. Consultation has the advantage over cotherapy and supervision of requiring only a brief, cost-effective relationship. Chapters discuss how therapists can avoid replicating errors by working closely with the client's previous therapist; an eco-systemic approach with chronic pain sufferers that involves medical, family, and community systems in Israel; using consultation to evaluate therapy; the creative preventive possibilities inherent in collegial consultation; how a family therapist and school system personnel can be mutually helpful with a conjoint

problem and a consultation that focuses on the position of the therapist rather than on the client system Finally Section IV addresses consultation as a valuable form of professional development It explores the importance of timing when using a consultant the effects on five therapists of live case demonstrations with Maurizio Andolfi as consultant and consultation to correct gender prejudice Contributors to this volume include Vincenzo F DiNicola Elizabeth Ridgely Joseph Simons David Keith Jim Guinan William Jones Lars Brok Joel Elizur Sara B Jutoran Noga Rubinstein Nabarro Bob Wendt Audrey Ellenwood Peter Liggett Marsha Purvis Mary Hotvedt and Marcella de Nichilo Students and clinicians who wish to practice consulting as well as family therapists who want to learn creative approaches to handling the dilemmas that arise in therapy will find Please Help Me With This Family to be an incomparable resource

THE PARENTAL ALIENATION SYNDROME Linda J. Gottlieb, 2012-04-01 In this thought provoking book Ms Gottlieb attempts to resolve the controversies surrounding Parental Alienation Syndrome PAS by providing substantial empirical evidence from her treatment cases in support of the eight symptoms which child psychiatrist Richard Gardner had

identified as occurring in the PAS child and she further exemplifies the commonality of the alienating maneuvers among the alienating parents. The author redefines the typically held characterization of the parents' relationship as portrayed in the pertinent literature and accepted by most PAS-aware professionals. Numerous case examples are explored: horrific tales of manufactured child abuse referrals to child protective services (CPS) resulting in suspension of visits between targeted parents and their children; meritless reports to police alleging domestic violence in support of orders of protection which slander and stigmatize targeted parents; exclusionary tactics preventing targeted parents' involvement in their children's medical, educational, social lives and activities; and depletion of targeted parents' resources due to legal fees required to defend himself/herself and to obtain judicial enforcement of parental rights. Ms. Gottlieb methodically documents that PAS is a form of emotional child abuse of the severest kind. The author provides an unprecedented number of treatment summaries which demonstrate the effectiveness of structural family therapy in treating the PAS family. To further elucidate the subject, the author interviewed several matrimonial attorneys, Law Guardians, and forensic evaluators regarding their experiences with PAS and she incorporated their thoughts into her recommendations as to how the mental health and judicial communities should resolve this situation in the best interests of the child. New Rules are suggested which encourage a collaborative rather than an adversarial approach to child custody. This book will be an excellent resource for parents who are divorcing or are in conflict for adult child victims of PAS, for mature children of divorcing parents, for judges, for Law Guardians, for matrimonial attorneys, for therapists, for child protective personnel, for law enforcement, and for the professional rescuer who believes that a child must be saved from a parent. **In Therapy Together** Peter

Rober, 2017-05-24. Families come in all shapes and sizes and all have love at their roots; however, by the time a family requests help from a psychotherapist, resentment, fear, and disappointment have often become the dominant forces ruling everyday life. Moving away from the medically focused problem diagnosis treatment model of psychotherapy, Peter Rober's thought-provoking new text conceptualises family therapy as a dialogue between living, breathing people. It emphasises the mutuality and relational context that serves as the backdrop of a therapeutic encounter whereby family members will interact, emotions will be displayed and suppressed, and practitioners will need to navigate carefully, endeavouring not just to listen but to understand the stories being told. Astute and engaging throughout, each chapter provides close analysis of a rich variety of case studies combined with an examination of key theories and concepts from different schools of thought in family therapy, with a particular focus on dialogical thinking. The book explores the ways in which these theoretical concepts can be applied in everyday practice situations. Written by a leading expert in the field, this insightful new addition to Palgrave's Basic Texts in Counselling and Psychotherapy series provides an accessible exploration of a complex area of practice. It will prove invaluable reading for those studying family therapy specifically, as well as students taking more general counselling and psychotherapy courses and practitioners looking for a fresh source of guidance. Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Treatment Strategies in Child and Adolescent Psychiatry** H.B. Ferguson,J.G. Simeon,2013-06-29 It is clear that child and adolescent psychiatric disorders impose a heavy burden of suffering Recent large scale community epidemiological studies suggest that as many as 20% of children and adolescents in the general population may have clinically important mental disorders These disorders are accompanied by associated impairments in various domains of the child s life resulting in lowered life quality for the child and his or her family In addition for some conditions the onset of the disorder in childhood heralds a lifetime of serious psychosocial disturbance for a significant subgroup of affected children For instance about 40% of children seen in clinic settings with conduct disorder in late childhood and early adolescence will have serious psychiatric disorders in adult life Finally the heavy burden of suffering of these conditions is indicated by the large amounts of both human and financial resources devoted to their assessment and treatment There is a pressing need in the field for effective treatments that is those that have been shown to do more good than harm that will result in a significant reduction in the burden of suffering resulting from these disorders Further these effective interventions must be readily available and acceptable to clinicians in the settings in which children with mental disorders and their families seek care This book addresses an important need in the treatment field
