description of Christian tragedy This generic differentiation is considered by means of a teleological approach to tragedy as well as from a formal perspective The criticism of traditional notions of character stresses the relevance of dividedness and internal collision tragic phenomena which are explored as necessary stages of self in the constitution and formation of tragic or internal alterity This form of alterity is underpinned by a discussion of action theory and speech act theory This book will be of interest for readers of Greek and Shakespearean drama as well as for students of comparative literature and genre theory classicists and philosophers and for everyone interested in the relation between literature and philosophy

American cinema films with multiple plots can be traced back to Grand Hotel in 1932 but the form was used only sporadically in subsequent decades However filmmakers of the 1970s and 80s notably Robert Altman and Woody Allen repeatedly employed complex narratives to weave sprawling stories in their films Later filmmakers such as Quentin Tarantino Paul Thomas Anderson Wong Kar Wai Steven Soderbergh and Paul Haggis embraced multiple plotlines a device that eventually achieved mainstream respectability in such Oscar winners as Traffic and Crash In the past two decades more than 200 films utilizing some variation of this format have appeared worldwide In Altman and After Multiple Narratives in Film Peter Parshall carefully examines films that feature various plotlines Parshall asserts that although this form may lose some of the close psychological identification and forward drive of linear narratives such films gain a corresponding strength by developing thematic relationships in the various story lines In each of these chapters Parshall examines a different example of the multi plot form such as network narrative and the multiple draft narrative demonstrating that the structure of each is central to their artistry He also argues that these devices open up a variety of creative vistas a strength that appeals to directors and audiences alike Films studied in this book include Nashville Pulp Fiction Amores Perros Code Unknown The Edge of Heaven Virgin Stripped Bare by Her Bachelors The Double Life of Veronique and Run Lola Run A long overdue examination of this unique cinematic form Altman and After will appeal to scholars students and fans eager to learn more

Marvel Comics into Film Matthew J. McEniry, Robert Moses Peaslee, Robert G. Weiner, 2016-04-05. Marvel Studios' approach to its Cinematic Universe, beginning with the release of *Iron Man* in 2008, has become the template for successful management of blockbuster film properties. Yet films featuring Marvel characters can be traced back to the 1940s when the Captain America serial first appeared on the screen. This collection of new essays is the first to explore the historical, textual, and cultural context of the larger cinematic Marvel universe, including serials, animated films, television movies, non-U.S. versions of Marvel characters, films that feature characters licensed by Marvel, and the contemporary Cinematic Universe as conceived by Kevin Feige. Films analyzed include *Transformers* (1986), *Howard the Duck* (1986), *Blade* (1998), *Planet Hulk* (2010), *Iron Man: Rise of Technovore* (2013), *Elektra* (2005), the Conan the Barbarian franchise (1982, 1990), *Ultimate Avengers* (2006), and *Ghost Rider* (2007).

Not Ever Absent: Storytelling in Arts, Culture and Identity Formation, 2019-01-04. This volume was first published by Interdisciplinary Press in 2015. Storytelling has always played a central role in the formation of cultures and communities. All cultures define themselves and their place in the world through their stories. Similarly, our identities are largely constructed as narratives, and it is with the aid of storytelling that we manage to conceive of ourselves as meaningful wholes. Thus, storytelling is not ever absent; it is to be found in literature, social life, in the places we visit, and in the buildings we live in. This volume presents storytelling in various appearances, from ancient myths and oral history to transmedia narratives and digital stories. Different forms of narrative are analyzed, as is the use of storytelling as a method for, e.g., counselling, education, and research. Throughout twenty-five chapters, a compelling overview of recent research on the topic is provided, both stressing the omnipresence of storytelling and exploring what storytelling is and isn't.

Christian Tourist Attractions, Mythmaking, and Identity Formation Erin Roberts, Jennifer Eyl, 2018-11-29. *Christian Tourist Attractions: Mythmaking and Identity Formation* examines a sampling of contemporary Christian tourist attractions that position visitors as the inheritors of ancient sacred traditions and make claims about the truth of the historical narratives that they promote. Rather than approaching these attractions as sacred expressions of religious experience or as uncontested accounts of history, the book applies recent work on mythmaking and identity formation to argue that these presentations of the past function as strategic discourses that serve material concerns in the present. From an approach informed by social and materialist theories of religion, the volume draws upon a variety of methodological approaches that enable readers to understand the often bewildering array of objects, claims, demands, and activities, not to mention the seemingly endless array of gifts and personal items available for purchase that appear at attractions including Ark Encounter, the Creation Museum, the Holy Land Experience, Bible Walk Museum, Christian Zionist tours of Israel, and the recently opened Museum of the Bible. Discourse analysis, practice theory, rhetorical criticism, and

embodied theories of cognition help make sense not only of the Christian tourist attractions under examination but also of the ways that religion is entangled with contemporary social political and economic interests more broadly
