Mythical Fate:

On Nature and the Goddess John O'Meara, 2012 A Trilogy bringing together titles by John O'Meara that are also individually available from iUniverse The Modern Debacle Containing close readings of work by Beckett Hemingway and T S Eliot Tennessee Williams Chekhov Arthur Miller and Brecht Plath Hughes and Robert Graves and W B Yeats beautifully and fluently written and ingenious in its combination of catastrophes Anthony Gash Drama Head The University of East Anglia Myth Depravity Impasse An in depth study of Robert Graves the modern theory of myth and Ted Hughes with further reference to Shakespeare and to Keats I am very sympathetic to the cause of myth and especially in relation to literature Michael Bell author of Literature Modernism and Myth in a letter to John O'Meara This Life This Death An extensive study of Wordsworth's great life crisis with additional reference to S T Coleridge and to P B Shelley Of this Wordsworth book one recognizes its truth its breadth of coverage and awareness and above all its depth Richard Ramsbotham editor of Vernon Watkins New Selected Poems Carcanet Press *The Bible, Homer, and the Search for Meaning in Ancient Myths* John Heath, 2019-04-29 The Bible Homer and the Search for Meaning in Ancient Myths explores and compares the most influential sets of divine myths in Western culture the Homeric pantheon and Yahweh the God of the Old Testament Heath argues that not only does the God of the Old Testament bear a striking resemblance to the Olympians but also that the Homeric system rejected by the Judeo Christian tradition offers a better model for the human condition The universe depicted by Homer and populated by his gods is one that creates a unique and powerful responsibility almost directly counter to that evoked by the Bible for humans to discover ethical norms accept death as a necessary human limit develop compassion to mitigate a tragic existence appreciate frankly both the glory and dangers of sex and embrace and respond courageously to an indifferent universe that was clearly not designed for human dominion Heath builds on recent work in biblical and classical studies to examine the contemporary value of mythical deities Judeo Christian theologians over the millennia have tried to explain away Yahweh's Olympian nature while dismissing the Homeric deities for the same reason Greek philosophers abandoned them they don't live up to preconceptions of what a deity should be In particular the Homeric gods are disappointingly plural anthropomorphic and amoral at best But Heath argues that Homer's polytheistic apparatus challenges us to live meaningfully without any help from the divine In other words to live well in Homer's tragic world an insight gleaned by Achilles the hero of the Iliad one must live as if there were no gods at all The Bible Homer and the Search for Meaning in Ancient Myths should change the conversation academics in classics biblical studies theology and philosophy have especially between disciplines about the gods of early Greek epic while reframing on a more popular level the discussion of the role of ancient myth in shaping a thoughtful life **Tragedy and the Idea of Modernity** Joshua Billings, Miriam Leonard, 2015-05-21 From around 1800 particularly in Germany Greek tragedy has been privileged in popular and scholarly discourse for its relation to apparently timeless metaphysical existential ethical aesthetic and psychological questions As a major concern of modern

philosophy it has fascinated thinkers including Hegel Kierkegaard Nietzsche Freud and Heidegger Such theories have arguably had a more profound influence on modern understanding of the genre than works of classical scholarship or theatrical performances Tragedy and the Idea of Modernity considers this tradition of philosophy in relation to the ancient Greek works themselves and mediates between the concerns of classicists and those of intellectual historians and philosophers The volume is organized into sections treating issues of poetics politics and culture and canonicity and contributions by an interdisciplinary range of scholars consider themes of catharsis the sublime politics and reconciliation spanning 2 500 years of literature and philosophy Although firmly anchored in the classical tradition the volume suggests that the tradition of philosophical thought concerning tragedy has a major place in understandings both of ancient tragedy and of modernity itself

Myth, Telos, Identity Iván Nyusztay, 2021-09-20 Iván Nyusztay's Myth Telos Identity The Tragic Schema in Greek and Shakespearean Drama for the first time presents a systematic comparison of Greek and Shakespearean tragedy By thematizing the common modes of the tragic it measures their structural regularities against corresponding philosophical and ethical reflections The comparative theory of tragedy evolves through a constant debate with the traditional views of Aristotle Hegel Schelling Paul Ricoeur and others An architectonic survey of plays leads to a generic distinction between pure tragedy and melodrama and proposes a possible description of Christian tragedy This generic differentiation is considered by means of a teleological approach to tragedy as well as from a formal perspective The criticism of traditional notions of character stresses the relevance of dividedness and internal collision tragic phenomena which are explored as necessary stages of self in the constitution and formation of tragic or internal alterity This form of alterity is underpinned by a discussion of action theory and speech act theory This book will be of interest for readers of Greek and Shakespearean drama as well as for students of comparative literature and genre theory classicists and philosophers and for everyone interested in the relation between literature and philosophy

The Emperor's New Nudity Yuval Kreminitzer, 2024-12-10 An analysis of contemporary authoritarianism and the medium in which it flourishes the internet as well as what lies at the complex intersection of authority and technology In recent decades a new

style of authoritarian politics has taken hold throughout the liberal democratic world The new authority figures are characterized by obscene transgressive behavior reminiscent of the crowd leader as theorized by Freud only far less transient In *The Emperor's New Nudity* Yuval Kremitzer considers the fraught intersection of authority and technology the internet being the medium that has allowed contemporary authoritarianism to thrive asking foundational questions such as How can we think of the network as a social phenomenon What can social and political phenomena teach us about the nature of the new technology And how does technology reshape the very fabric of social and political life Technology Kremitzer writes leads us toward an impersonal and hyperrational world to such an extent that it renders human subjectivity outmoded Authority on the other hand anchors our subjective identifications to certain figures and seems to be hopelessly primitive and irrational What is required then is a dialectics of the primal a study of the way in which what strikes us as essential enters into the dynamics of historical change From this perspective authority and technology can be said to be divided by a common object the unwritten law and the special knowledge that pertains to it a knowledge without knowers

Communication and Expression Philip Hogg, 2016-12-24 The linguistic turn in critical theory has been routinely justified with the claim that Adorno's philosophy is trapped within the limits of consciousness philosophy Yet Adorno's own philosophy of language has not yet been fully and systematically examined in its own right Philip Hogg argues that it was in fact the linguistic turn in critical theory that prevented a thorough analysis of Adorno's philosophy of language Here he reconstructs Adorno's philosophy of language and presents it as a coherent theory that demands to be understood as an important contribution to contemporary linguistic philosophy By analysing all the key concepts in Adorno's thought subjectivity epistemology social theory and aesthetics and comparing them to Robert Brandom's material inferentialism John McDowell's theory of conceptual experience and Jürgen Habermas theory of communicative action this book presents Adorno's theory as an important contribution to contemporary philosophy of language in its own right

Walter Benjamin Richard Wolin, 2023-09-01 Few twentieth century thinkers have proven as influential as Walter Benjamin the German Jewish

philosopher and cultural and literary critic Richard Wolin's book remains among the clearest and most insightful introductions to Benjamin's writings offering a philosophically rich exposition of his complex relationship to Adorno Brecht Jewish Messianism and Western Marxism Wolin provides nuanced interpretations of Benjamin's widely studied writings on Baudelaire historiography and art in the age of mechanical reproduction In a new Introduction written especially for this edition Wolin discusses the unfinished Arcades Project as well as recent tendencies in the reception of Benjamin's work and the relevance of his ideas to contemporary debates about modernity and postmodernity Few twentieth century thinkers have proven as influential as Walter Benjamin the German Jewish philosopher and cultural and literary critic Richard Wolin's book remains among the clearest and most insightful introductions to Benjamin's writings offering in The Rise of Eurocentrism Vassilis Lambropoulos, 1992-12-14 In the controversy over political correctness the canon and the curriculum the role of Western tradition in a post modern world is often debated To clarify what is at stake Vassilis Lambropoulos traces the ideology of European culture from the Reformation focusing on a key element of Western tradition the act of interpretation as a distinct practice of understanding and a civil right Championed by Protestants insisting on independent interpretation of scripture this ideal of autonomy ushered in the era of modernity with its essentialist philosophy of universal man and his aesthetic understanding of the world After explaining the dominance of European culture through the combined archetypes of Hebraism reason and morality and Hellenism spirit and art Lambropoulos shows how the rule of autonomy has been transformed into the aesthetic disinterested contemplation of things in themselves Arguing that it is time to restore the socio political dimension to the movement of autonomy he proposes that a genealogy of the Hebraic Hellenic archetypes can help us evaluate more recent models like the Afrocentric one and redefine the controversy surrounding education Eurocentrism and cultural politics *Lectures on Ancient Philosophy* Ernst Cassirer, 2022-03-21 Mit diesem Band werden Cassirers 1935 in Oxford und 1942 in New Haven gehaltene Vorlesungen zur antiken Philosophie erstmals für Forschung und Studium zugänglich gemacht Cassirer zeigt wie sich in der griechischen Kultur ein neuer ein theoretischer philosophischer Denkstil entfaltet der den bis dahin vorherrschenden mythischen Denkstil ablöst Die Vorlesungen richten sich an Philosophiestudierende und geben deshalb einen breiten einführenden Überblick über die Denkentwicklung von den Ioniern über Platon und Aristoteles bis zu den Neuplatonikern Sie behandeln aber auch Fragen und Begriffe die nach Cassirers Auffassung bis ins 20. Jahrhundert hinein bedeutsam geblieben sind weil auf ihnen das moderne wissenschaftliche wie philosophische Denken fußt Zudem legt Cassirer Wert auf den Nachweis dass die vielfältigen neuen philosophischen Begriffe in den Lehren der antiken Denker eine Einheit bilden die von einem bestimmten Prinzip des Denkens getragen und bestimmt ist Besonders interessant sind die Vorlesungen über Platon und Aristoteles Cassirer schätzte Platons Ideenlehre sehr darüber hinaus setzt er sich hier auch kritisch mit historischen Platonauslegungen auseinander Die Vorlesung über Aristoteles wiederum stellt den einzigen größeren diesem Philosophen gewidmeten Text von Cassirers Hand dar *Classical Myths and*

Dialectic of Romanticism Peter Murphy, David Roberts, 2005-10-01 Dialectic of Romanticism presents a radical new assessment of the aesthetic and philosophical history and future of modernity An exploration of the internal critique of modernism treats romanticism later historicism and post modernism as central to the development of European modernism alongside enlightenment and like the enlightenment subject to its own dead ends and fatalities An external critique of modernism recovers concepts of civilization and civic aesthetics which are trans historical simultaneously modern and classically inspired and provides a counter both to romantic historicism and enlightened models of progress Finally a retrospective critique of modernism analyses what happens to modernism s romantic archaic and technological futurist visions when they are translated from Europe to America Dialectic of Romanticism argues that out of the European dialectic of romanticism and enlightenment a new dialectic of modernity is emerging in the New World one which points beyond modernism and postmodernism

The Tragic Idea Vassilis Lambropoulos, 2013-10-10 This radical series shows how Classical ideas and material have helped to shape the modern world The interdisciplinary approach makes stimulating reading for all who welcome the challenge offered by new perspectives on Classical culture Today we attribute a tragic quality to many things works experiences values events but we forget how modern this idea is This book traces the rise of the tragic idea from early Romanticism to late Modernism Focusing on succinct major statements it maps one of the most absorbing philosophical conversations in modernity the debate about the tragic meaning of life This conversation has crossed geographical linguistic ideological and religious borders to bring thinkers together in an inquiry into the inner contradictions of liberty While originally the tragic idea stood for the conflict of freedom and necessity it gradually absorbed other irreconcilable dialectical collisions It turned tragedy from a genre into a problem for ethics aesthetics criticism classics politics anthropology and psychology to name but a few Scholars in these fields today will be fascinated to find human responsibility caught in the tragic web of modern dilemmas

Classicists in particular will be intrigued by the story of how over the last two centuries tragedy has acquired a second parallel life away from the stage

Violence Richard J. Bernstein, 2018-03-08 We live in a time when we are overwhelmed with talk and images of violence Whether on television the internet films or the video screen we can't escape representations of actual or fictional violence another murder another killing spree in a high school or movie theatre another action movie filled with images of violence Our age could well be called The Age of Violence because representations of real or imagined violence sometimes fused together are pervasive But what do we mean by violence What can violence achieve Are there limits to violence and if so what are they In this new book Richard Bernstein seeks to answer these questions by examining the work of five figures who have thought deeply about violence Carl Schmitt Walter Benjamin Hannah Arendt Frantz Fanon and Jan Assmann He shows that we have much to learn from their work about the meaning of violence in our times Through the critical examination of their writings he also brings out the limits of violence There are compelling reasons to commit ourselves to non violence and yet at the same time we have to acknowledge that there are exceptional circumstances in which violence can be justified Bernstein argues that there can be no general criteria for determining when violence is justified The only plausible way of dealing with this issue is to cultivate publics in which there is free and open discussion and in which individuals are committed to listen to one other when public debate withers there is nothing to prevent the triumph of murderous violence
