Population Exposure From The Nuclear Fuel Cycle:

Population Exposure from the Nuclear Fuel Cycle Edward L. Alpen, R. O. Chester, Darrell R. Fisher, 1988

Population Exposure from the Fuel Cycle, 1987 The legacy of radiation exposures confronting man arises from two historical sources of energy the sun and radioactive decay Contemporary man continues to be dependent on these two energy sources which include the nuclear fuel cycle Radiation exposures from all energy sources should be examined with particular emphasis on the nuclear fuel cycle incidents such as Chernobyl and Three Mile Island In addition to risk estimation concepts such as de minimis life shortening as a measure of risk and competing risks as projected into the future must be considered in placing radiation exposures in perspective The utility of these concepts is in characterizing population exposures for decision makers in a manner that the public may judge acceptable All these viewpoints are essential in the evaluation of population exposure from the nuclear fuel cycle

, 1979-12 **Radionuclides in the Food Chain** John H. Harley, Gail D. Schmidt, Giovanni Silini, 2012-12-06 The Symposium on Radionuclides in the Food Chain sponsored by the International Life Sciences Institute in association with the International Institute for Applied Systems Analysis was intended to bring together policymakers and other representatives of the food industry with radiation experts involved in measuring and assessing radioactivity in foodstuffs The symposium was made timely by the problems arising from the nuclear reactor accident at Chernobyl in the USSR which brought out the lack of international agreement on guidance for responding to such radionuclide contamination of food and foodstuffs The

presentations by the radiation experts covered the sources of radionuclides natural radioactivity fallout from nuclear weapons tests routine releases from nuclear facilities and various nuclear accidents The speakers represented a broad distribution in both scientific disciplines and international geographic origin They summarized the available data on measurements and indicated the current procedures for assessing radiation exposure It was hoped that the food industry representatives would bring out the problems posed to industry and governments by the presence of radioactivity in food
