This is one of a series of UNECE country studies which examines the living arrangements and the socio economic status of older persons in Latvia Chapters look at the general demographic and socio economic context living arrangements of older people and characteristics of social care institutions employment and retirement issues including pensions policy housing conditions and sources of income **Socio-economic Status and Living Arrangements of Older Persons in**

Switzerland Myriam Bongard, Claudine Sauvain-Dugerdil, 2002 Population ageing is now widely recognised as a major feature of demographic trends in the countries of Europe and North America This report begins with a broad presentation of the demographic trends and socio economic context in Switzerland Of a population of 7.1 million in 1997 nearly a million are over 65 An examination of family demography as shown by living arrangements finds a great increase in the number of small households illustrating decreased family size increased life expectancy and a growing divorce rate Trends in age at retirement economic activity after 60 and the prospects for the pension scheme are considered The well being of older people and the challenge for the health system in dealing with the growing number of the elderly complete this survey

Old Age In Europe Kathrin Komp, Marja Aartsen, 2013-01-24 Europe currently is the oldest continent in the world and its population is still ageing This demographic shift affects society economy and welfare states Scholars from various disciplines and the public noted this development and wonder what effects it may have but lack adequate information They call for explanations that are concise and easily accessible The book at hand fills this lacuna It introduces readers to the most important developments theories concepts and discussions in ageing studies always keeping an eye on the current situation in Europe Each chapter adopts the perspective of a different discipline e.g. public health sociology economics or technology To make the explanations easy to understand the book includes learning tools such as learning objectives multiple choice questions and a glossary *Index to International Statistics*, 2007 *Population Ageing in Central and Eastern Europe* Andreas Hoff, 2016-04-08 During the 1990s Europe became the first continent with a mature society where people aged 60 years and older outnumber children and as this trend continues the resulting ageing societies will differ from previous societies in their make up in their needs and in their resource allocation Population ageing poses an even greater challenge to the post communist societies of Central and Eastern Europe While still struggling to cope with the aftermath of the

economic and social transition process following the breakdown of communism they are now facing even more rapid demographic change than Western Europe This book brings together leading scholars to present an understanding of the processes underlying the very rapid population ageing in Central and Eastern Europe In addition to discussing the main demographic drivers behind this development in each of the countries examined this volume also discusses its implications for policy healthcare provision workforces intergenerational family relations the social cohesion of future Central and Eastern European societies and the quality of life experienced by their citizens Organised around broad geographical regions with final sections analysing the book s findings and their future implications Population Ageing in Central and Eastern Europe will be of interest to gerontologists policy makers students and scholars of population change **Catalogue of Publications** United Nations. Economic Commission for Europe,2004 Delaying Retirement Dirk Hofäcker,Moritz Hess,Stefanie König,2016-12-14 To a backdrop of ageing societies pension crises and labour market reforms this book investigates how the policy shift from early retirement to active ageing has affected individual retirement behaviour Focusing on eleven European countries the United States and Japan it brings together leading international experts to analyze recent changes in pension systems Their findings demonstrate that there has been a fundamental transition in pension policies and a steep increase in older workers retirement ages and employment rates Yet changes in retirement behavior are not evenly distributed across all societal strata This raises the serious concern that an overall rise in the retirement age will be accompanied by the re emergence of social inequality in the transition from work to retirement This innovative edited collection will appeal to students and scholars of sociology economics political science human resources management gerontology and social policy and also to policy makers and professionals dealing with older workers **Health at a Glance: Europe 2024 State of Health in the EU Cycle** OECD,European Commission,2024-11-18 The 2024 edition of Health at a Glance Europe examines the major challenges facing European health systems in the aftermath of the COVID 19 pandemic The report includes two thematic chapters The first chapter provides a comprehensive examination of health workforce shortages in Europe a long standing problem exacerbated by the immense strain the pandemic placed on health systems It explores the factors behind these shortages and proposes policy strategies to attract train and retain the workforce needed to build resilient health systems The second chapter reviews the most recent trends in the health of Europe s ageing population With life expectancy continuing to rise and the share of the population over 65 growing steadily the chapter discusses priorities to promote healthy longevity to reduce demands on health and long term care systems The remaining chapters provide a comparative overview of the latest data on health status risk factors and health system performance across the 27 EU member states 9 EU candidate countries 3 European Free Trade Association countries and the United Kingdom Health at a Glance Europe 2024 is the first step in the State of Health in the EU cycle *Economic and Social Factors Affecting the Health of Older Adults* Colette Joy Browning,Katherine Henrietta Leith,Shane Andrew

Thomas,2023-12-11 In 2020 over 1 billion of the world's population were over the age of 60 years old and it is expected to double by 2050 according to WHO. Due to the growing population of older adults there is a focus on healthy aging that will benefit the individuals and the wider communities as older adults will be able to support family members and partake in paid or voluntary work for a longer period of time. Currently a large number of older adults are unable to work increasing the likelihood of economic instability with fewer streams of income. Economic instability has been proven to have health impacts including declining mental wellbeing, malnutrition and the inability to afford prescribed medications. Social isolation proves to be another important factor in the overall health of older adults. The CDC reports that poor social interactions have been linked to a higher risk of developing multiple serious medical conditions.

Europe's Income, Wealth, Consumption, and Inequality Georg Fischer, Robert Strauss, 2021. Europe's Income, Wealth, Consumption and Inequality offers a novel approach to the analysis of social and economic trends and the resulting book identifies major policy challenges applicable in the EU and beyond. Georg Fischer, Robert Strauss and their contributors focus on explaining how policy makers and the media focus on national trends to measure progress among the nations in Europe.

OECD Rural Studies Delivering Quality Education and Health Care to All Preparing Regions for Demographic Change OECD, 2021-03-05. COVID-19 has put renewed focus on the importance of addressing longstanding challenges that OECD governments face in delivering public services especially in regions with people spread over a wider area where economies of scale are more difficult to achieve. The physical infrastructure needed to provide good quality education and health services can be more complex and expensive in rural and remote regions that also struggle to attract and retain education and health care professionals.

OECD Health Policy Studies Is Care Affordable for Older People? OECD, 2024-10-29. With population ageing the demand for helping older people with daily activities so called long term care is set to increase across OECD countries by more than one third by 2050. Older people with long term care needs are more likely to be women 80 years old and above live in single households and have lower incomes than the average. Currently across OECD countries publicly funded long term care systems still leave almost half of older people with care needs at risk of poverty particularly those with severe care needs and low income. Out of pocket costs represent on average 70% of an older person's median income across the OECD. This report suggests avenues to improve funding to make long term care systems better able to meet the demand for their services and suggests policy options to improve the targeting of benefits and seek efficiency gains to contain the costs of long term care.
