Sudan's Wars and Peace Agreements Stephanie Beswick, Jay Spaulding, 2010-07-12 Originating from the 2008 27th annual conference of the Sudan Studies Association SSA of the same title these essays document and analyze Sudan's chronic history of conflict since independence in 1956 as well as its own and international efforts to bring an end to these conflicts As the country moves toward what some see as the inevitable separation of South Sudan in 2011 honoring the principle of self determination long fought for by southerners the lessons of six decades of a history of war and peace agreements is both telling and compelling This analysis is offered by the real experts on Sudan rather than the usual story offered by journalists and pundits In addition to an Introduction by the editors all founders or current or past presidents of the SSA the essays by Sudanese and non Sudanese explore the often bitter history of North South relations and loss of life leading to the consideration of a range of options from a continuation of national unity under revised terms to federation or redivision to full separation of the South and the constitution of a new African state The role of the Khartoum government's pursuit of policies of Islamization and Islamism for a quarter of a century across multiple regimes is also treated The central question of constructing a sustainable peace irrespective of the outcome in 2011 is detailed along with the essential consideration of women and gender perspectives to sustain any peace negotiated This book is must reading in advance of or in response to the crucial events as

they unfold in Sudan in 2011 and beyond *African Studies Abstracts* ,1994 Arab Manpower (RLE Economy of Middle East) J.S. Birks,C.A. Sinclair,2020-07-26 The Arab world increasingly falls into two divisions the capital poor and the capital rich countries where capital means in essence oil In the capital rich countries shortage of labour is the chief constraint on growth In the capital poor countries analysis of the labour market is equally central as shortage of labour compounds the already existing problem of shortage of capital This book surveys the labour markets of the Arab world state by state evaluating them by demand and supply analysis and analysing the different elements in trends of employment It forecasts the areas of stress in the next decade and suggests ways of minimising them The book based on much previously unpublished information and on extensive on the spot research in the respective Arab countries sets out the economic and social conditions which underly the impending crisis of development in the Arab region First published in 1980 *A Gateway to Biomedical Research in Africa* Takafira Mduluz,2007 This book reveals the necessary steps required by researchers from both developing and industrialised areas to conduct biomedical research in resource poor communities This book goes beyond the ethical consideration and concentrates on issues considered minor by many researchers during planning of their research conduct The communities considered are diverse both culturally and geographically The communities are exposed by the authors with several years experience working in the area on hierarchy beliefs and fears the economical and social aspects Probably the education levels and how this is developing impacting on research have been discussed The boundaries and religions that make each community as an important aspect demarcating Africa into the social structures Planning and preparing to undertake biomedical research in resource poor communities of Africa goes even deeper than the normal ethical considerations **Mobilizing Human Resources in the Arab World (RLE Economy of Middle East)** R. Paul Shaw,2015-05-15 R Paul Shaw has travelled widely in the Arab world obtaining data and gathering impressions first hand from national and local planners In this book he identifies population and manpower problems that are likely to become more serious and more difficult to solve if they are neglected at this early stage of Arab development He focuses on five broad areas which are directly or indirectly related to mobilizing human resources and his book will be of special interest to all those who are concerned with such issues as population migration employment inequality the emancipation of women construction and agriculture Dr Shaw proposes policy directives which are sensitive to the problems as they are seen by the Arab governments themselves and sets out practical guidelines which can be used by Arab planners and policy makers An important feature of the book with respect to current literature on Arab development is that it moves away from a preoccupation with growth related investments to a concentration on development related population manpower and employment issues By bringing together such comprehensive empirical and bibliographic information it will also be invaluable as a reference source for some twenty Arab countries First published in 1983 *Congressional Presentation* United States. Agency for International Development, **What About Us? Global Perspectives on Redressing Religious**
