**National Income and Nature: Externalities, Growth and Steady State** J.J. Krabbe,Wim Heijman,2012-12-06 Since the environmental revolution began in the late 1960s economists have done a lot of work in the field of economic theory building on the preservation of nature Meanwhile environmental economic literature has swelled to a large stream of articles in journals of different signature As a result a coherent economic view of the phenomenon of environmental degradation has emerged Several kinds of green public policies and their impacts on both nature and the performance of the economy have been analysed The feasibility of specific types of policy has also been discussed The aim of the book is to provide an insight into the ways economists analyse the problems of environmental pollution and the depletion of natural resource To this purpose a number of articles have been selected Some of them have a fundamental character others an applied nature and are foremost practically oriented The presentation of the collection emphasizes our belief that economists are able to deliver an essential contribution to the design of policies to protect nature It is clear that nature and environment may no longer be regarded as free gifts to society Rather they have to be seen as scarce resources and environmental disruption and resource depletion as allocation problems If a natural resource is scarce a price must be charged in accordance with the degree of scarcity since otherwise society will be confronted with misallocations In this connection there are two topics which are of particular interest to economists *Demographic Responses to Ecological Degradation and Food Insecurity* Markos Ezra,1997 Debilitating food shortages and tragic famines have been among the major problems facing many Sub Saharan countries in Africa since the early 1970s Ethiopia is one of the most severely affected countries in the region The country's drought prone areas on which this study focuses are suffering from severe ecological degradation and food insecurity The general trend in these areas represents the prevalence of disharmony between the natural resource base and the population to be sustained This research explores the relationship between growing ecological degradation and declining agricultural productivity on the one hand and increasing population density on the other It presents profound discussion on public awareness and perception about rural resources degradation and uncovers the social and demographic consequences of ecological degradation and food insecurity based on primary micro level data collected from selected drought prone communities in Northern Ethiopia Specifically it attempts to measure the demographic changes that have taken place in the period 1984-1994 and interpret them in the context of demographic transition theory It is argued that stress due to degradation of resources has compelled local people to realize the disadvantage of having a large number of children and apparently has led to fertility decline **Crop Ecology** R. S. Loomis,D. J. Connor,1992-10-08 This book is centred on the production processes of crops and pastures photosynthesis and use of water and nutrients in fields The book is unique in its

combination of great breadth and depth in its treatment of production processes and systems problems The approach is explanatory and integrative with a firm basis in environmental physics soils physiology and morphology in contrast to descriptive or reductionist approaches Systems concepts are introduced early and expanded as the book proceeds giving emphasis to quantitative approaches to management strategies and tactics employed by farmers and to environmental issues The systems approach is brought together in the final chapters where production and nutrient cycling are analyzed for example farms and problems in an uncertain future are considered The book is based on courses taught by the authors in Australia and the United States and is designed for use as a text for an introductory course in crop ecology advanced undergraduates and beginning post graduate level It is more than a text however Given the wide range of subjects the authors have integrated reference and background material to create a stand alone reference work useful to a wide audience of agriculturalists

**Population and Poverty** Naunihal Singh,2002 *India* John N. Mayor,2003 India long known for its huge population religious conflicts and its status as not quite best friend ally of the United States has moved from the backwaters of world attention to centre stage Afghanistan and Pakistan with whom India is in almost conflict are neighbours India has developed a nuclear capability which also has a way of grabbing attention This book discusses current issues and historical background and provides a thorough index important to a better understanding of this diverse country

**The Demographic**

Transition and Development in Africa Charles Teller, Assefa Hailemariam, 2011-03-04 The heated Malthusian Bosrupian debates still rage over consequences of high population growth rapid urbanization dense rural populations and young age structures in the face of drought poverty food insecurity environmental degradation climate change instability and the global economic crisis However while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub Saharan Africa are commonplace they are often misleading and belie the socio cultural change that is occurring among a vanguard of more educated youth Even within Ethiopia the second largest country at the Crossroads of Africa and the Middle East different narratives emerge from analysis of longitudinal micro level analysis as to how demographic change and responses are occurring some more rapidly than others The book compares Ethiopia with other Africa countries and demonstrates the uniqueness of an African type demographic transition a combination of poverty related negative factors unemployment disease food insecurity along with positive education health and higher age of marriage trends that are pushing this ruggedly rural and land locked population to accelerate the demographic transition and stay on track to meet most of the MDGs This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition trying to unravel some of the complexities in this vulnerable Horn of Africa country A slowly declining population growth rates with rapidly declining child mortality very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places

**Kingsley Davis** David M. Heer, 2017-12-02 Kingsley Davis 1908 1997 was one of the pioneers in social demography and was particularly identified with the theory of the demographic transition This holds that the process of industrialization first causes mortality to decline leading to a substantial rate of population growth and only later causes fertility to fall leading eventually to the cessation of population growth Kingsley Davis is especially remembered for his arresting and forceful critique of family planning programs intended to achieve zero population growth Before he devoted his major attention to social demography Davis had distinguished himself through influential articles on the structure of family and kinship including the topics of jealousy and sexual property the sociology of prostitution and illegitimacy He had an early interest in structural functional analysis which resulted in his famous and controversial article on stratification co authored with Wilbert Moore and his equally famous presidential address to the American Sociological Association in 1959 David Heer s biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University the Kingsley Davis graduate file at Harvard University the interview of Kingsley Davis by Jean van der Tak in *Demographic Destinies* 1990 and David Heer s personal relationship with Kingsley Davis The book also contains thirty of the most important writings by Kingsley Davis These were chosen in part for the number of citations received in the Cumulative Social Science Citation Index and in part to ensure that readers would be able to assess the continuity of Kingsley Davis s ideas at all stages of his career

The Demographic and Development Divide in India Sanjay K.

Mohanty,Udaya S. Mishra,Rajesh K. Chauhan,2019-09-16 This book is the first ever volume which provides comprehensive information on demographic health and development at the level of 640 districts in India Central and state governments developmental organizations national and international NGOs and researchers require disaggregated data at the district level for many practical purposes However such information is not readily available for use The editors with a close knit group of collaborators have compiled data from reliable sources for each district of India and present the results in the form of composite indexes The chapters rank districts within the state and vis vis all districts of India to help readers understand intra district and inter district developmental disparities They present spatial analyses that depict clustering of development It is a ready reference for planners researchers and students and provides scientific analyses that depict the clustering of development parameters at the district level This volume is meant for a wide readership interested in development in India across population studies sociology economics statistics to regional development and from academics researchers and planners to policy makers

**Eaters Of The Dry Season** David Rain,2018-02-13 A remarkable blend of geography demography sociology development economics history cultural anthropology ecology politics sharia Muslim religious law and government policies This book dispels many misconceptions and is an education in itself Choice Nutrition and

Agricultural Development Nevin Scrimshaw,2013-03-09 For the past thirteen years symposia have been held either in South America or in Mexico on subjects of special interest to Latin American scientists When the opportunity of holding the 14th International Biological Symposium in Guate mala was offered it was most welcome especially as the occasion was the celebration of the 25th Anniversary of the Institute of Nutrition of Central America and Panama INCAP With the encouragement of members of the Ford Foundation staff and the National Academy of Sciences the idea for a symposium on the broad approach to the problem of nutrition was developed by Dr Moises Behar the second director of INCAP 1961 1974 Dr Nevin Scrimshaw flrst director of INCAP 1949 1961 and members of the INCAP staff Because the availability of food has become a serious international problem a discussion of the underlying problems was most timely INCAP one of the pioneer and leading institutions in the area of nutrition has a profound influence on nutrition in Latin America The meeting was attended by about 300 scientists from more than 20 countries Because this was the flrst symposium in this series to be held in Central America it provided an opportunity to get acquainted with scientists from many of the Central American republics It was especially rewarding that so many students from the Central American universities attended this meeting

*Socio-Economic Development* Adam Szirmai,2015-06-18 Taking a comparative and multidisciplinary approach this textbook offers a non technical introduction to the dynamics of socio economic development and stagnation **Fertility and Resources** Society for the Study of Human Biology. Symposium,1990-10-25 Fertility in animals reflects access to scarce resources such as food and territory In humans the situation is more complex In this book the gap between socio ecology and population demography is bridged by showing how animals and humans adjust their fertility to environmental conditions

**The Demographic Revolution in Modern Egypt** Warren C. Robinson, Fatma H. El-Zanaty, 2006-01-01 The Demographic Revolution in Modern Egypt tells the dramatic story of Egypt's transition in the last two decades from staggeringly high to low fertility and mortality rates. Scholars Warren C. Robinson and Fatma H. El-Zanaty especially delve into the reasons for the decline in fertility, including the relative success of Egypt's recent public initiatives in family planning. Robinson and El-Zanaty compellingly show the importance of continued demographic stability in Egypt for that nation, the Middle East, and indeed the world. The authors point to Egypt's optimistic progress as a model for other countries facing out-of-control birth rates wreaking havoc with economic and social development. *Rotational Grazing and Intensive Pasture Management* Ann Townsend Young, Carol A. Singer, Catherine Lynn Shull, Jane Potter Gates, Janet Saunders, Kathie Beane, Patricia La Caille John, Susan Chapman, 1993
