## **Population Forecasting 1895 1945 The Transition To Modernity:**

**Population Forecasting 1895-1945** Henk A. de Gans, Henk de Gans, 1999-01-31 The book will be of interest to scientists researchers and students in demography and applied demography statistics economy social geography and urban and regional planning and science studies **BOOK JACKET** **Population Forecasting 1895-1945** H.A. de Gans, 2012-12-06 Authors scholars and scientists whose mother tongue is not one of the major languages of international communication are seriously disadvantaged Some individuals such as Joseph Conrad or Vladimir Nabokov have overcome that handicap brilliantly Others learn to live with it they can express themselves sufficiently lucidly in a second language to make their voice heard internationally At least when they have something original or striking to say they will be certain to reach their peers Most scientists and scholars fall into that category Others again have to wait until their work has been translated before its value is recognised This may apply even to those whose mother tongue is widely read The writings of Frenchmen Lyotard Derrida Baudrillard or Foucault on post modernism on language discourse and power for example had tremendous world wide impact only after English translations appeared on the market De Gans study of the development of population forecasting in The Netherlands is another striking illustration of the effects a language barrier may have He demonstrates convincingly that although a possibly somewhat awkward Dutchman named Wiebols was a pioneer of modern cohort component demographic forecasting he never received international recognition for this In his thesis of 1925 Wiebols employed the newest instruments of demographic analysis in improving forecasting methodology **Population Forecasting 1895-1945** Henk A. de Gans, 2014-01-15 Forecasting Mortality in Developed Countries E. Tabeau, Anneke van den Berg Jeths, Christopher Heathcote, 2006-04-11 Information on future mortality trends is essential for population forecasts public health policy actuarial studies and many other purposes Realising the importance of such needs this volume contains contributions to the theory and practice of forecasting mortality in the relatively favourable circumstances in developed countries of Western Europe In this context techniques from mathematical statistics and econometrics can provide useful descriptions of past mortality The naive forecast obtained by extrapolating a fitted model may give as good a forecast as any but forecasting by extrapolation requires careful justification since it assumes the prolongation of historical conditions On the other hand whilst it is generally accepted that scientific and other advances will continue to impact on mortality perhaps dramatically so it is impossible to quantify more than the outline of future consequences with a strong degree of confidence The decision to modify an extrapolation of a model fitted to historical data or conversely choosing not to modify it in order to obtain a forecast is therefore strongly influenced by subjective and judgmental elements with the quality of the latter dependent on demographic epidemiological and indeed perhaps more general considerations The thread running through the book reflects therefore the necessity of integrating demographic epidemiological and statistical factors to obtain an improvement in the prediction of mortality Model-Based Demography Thomas K. Burch, 2017-10-14 Late in a career of

more than sixty years Thomas Burch an internationally known social demographer undertook a wide ranging methodological critique of demography This open access volume contains a selection of resulting papers some previously unpublished some published but not readily accessible from past meetings of The International Union for the Scientific Study of Population and its research committees or from other small conferences and seminars Rejecting the idea that demography is simply a branch of applied statistics his work views it as an autonomous and complete scientific discipline When viewed from the perspective of modern philosophy of science specifically the semantic or model based school demography is a balanced discipline with a rich body of techniques and data but also with more and better theories than generally recognized As demonstrated in this book some demographic techniques can also be seen as theoretical models and some substantive behavioral models commonly rejected as theory because of inconsistent observations are now seen as valuable theoretical models for example demographic transition theory This book shows how demography can build a strong theoretical edifice on its broad and deep empirical foundation by adoption of the model based approach to science But the full fruits of this approach will require demographers to make greater use of computer modeling both macro and micro simulation in the statement and manipulation of theoretical ideas as well as for numerical computation This book is open access under a CC BY license

**Populations, Projections, Politics** Jochen Fleischhacker, Henk A. De Gans, 2003 This book examines the interrelations of population change developments in projection methodology and politics in the 1920s and 1930s Together the contributions in the book represent an important scholarly and critical contribution to the history of demography

**Who Marries Whom?** Hans-Peter Blossfeld, A. Timm, 2012-12-06 Marriage and social inequality are closely interrelated Marriage is dependent on the structure of marriage markets and marriage patterns have consequences for social inequality This book demonstrates that in most modern societies the educational system has become an increasingly important marriage market particularly for those who are highly qualified Educational expansion in general and the rising educational participation of women in particular unintentionally have increased the rate of assortative meeting and assortative mating across birth cohorts Rising educational homogamy means that social inequality is further enhanced through marriage because better and worse educated single men and women pool their economic and sociocultural advantages and disadvantages within couples In this book we study the changing role of the educational system as a marriage market in modern societies from a cross national comparative perspective Using life history data from a broad range of industrialized countries and longitudinal statistical models we analyze the process of spouse selection in the life courses of single men and women step by step The countries included in this book vary widely in important characteristics such as demographic behavior and institutional characteristics The life course approach explicitly recognizes the dynamic nature of partner decisions the importance of educational roles and institutional circumstances as young men and women move through their life paths and the cumulation of advantages and disadvantages experienced by individuals

**Applied Demography in the 21st Century** Steve H. Murdock, David A.

Swanson,2008-03-22 The topic of Applied Demography is clearly evolving as its practitioners become involved in the emerging trends of the Twenty First Century This book derived from the first post 2000 national conference on Applied Demography held in San Antonio Texas January 7 9 2007 at The University of Texas The conference presented a unique opportunity and this resulting work provides a cross sectional view of Applied Demography and an evaluation of its likely future

**People, Population Change and Policies** Charlotte Höhn,Dragana Avramov,Irena E. Kotowska,2008-03-08 This two volume work explores social cohesion and the demographic challenges of low birth rates and population aging The authors approach the topic from the perspective of citizens and key policy actors analyzing attitudes from 14 European countries regarding the European integration process demographic trends and expectations towards private networks and public policies Volume 2 focuses on demographic developments gender issues and aging

**Growth** Vaclav Smil,2019-10-01 A systematic investigation of growth in nature and society from tiny organisms to the trajectories of empires and civilizations Growth has been both an unspoken and an explicit aim of our individual and collective striving It governs the lives of microorganisms and galaxies it shapes the capabilities of our extraordinarily large brains and the fortunes of our economies Growth is manifested in annual increments of continental crust a rising gross domestic product a child s growth chart the spread of cancerous cells In this magisterial book Vaclav Smil offers systematic investigation of growth in nature and society from tiny organisms to the trajectories of empires and civilizations Smil takes readers from bacterial invasions through animal metabolisms to megacities and the global economy He begins with organisms whose mature sizes range from microscopic to enormous looking at disease causing microbes the cultivation of staple crops and human growth from infancy to adulthood He examines the growth of energy conversions and man made objects that enable economic activities developments that have been essential to civilization Finally he looks at growth in complex systems beginning with the growth of human populations and proceeding to the growth of cities He considers the challenges of tracing the growth of empires and civilizations explaining that we can chart the growth of organisms across individual and evolutionary time but that the progress of societies and economies not so linear encompasses both decline and renewal The trajectory of modern civilization driven by competing imperatives of material growth and biospheric limits Smil tells us remains uncertain

**Childbearing Trends and Prospects in Low-Fertility Countries** Tomas Frejka,Jean-Paul Sardon,2005-12-30 This is a tour de force in cohort fertility analysis a deep and powerful piece of work It is a striking demonstration of the force of really detailed empirical analysis of excellent and comprehensive data with the data looked at from every angle and judiciously extrapolated into the future It represents a major contribution to our understanding of contemporary low fertility in Europe and other developed nations Thomas K Burch University of Victoria BC Canada

Education and Postponement of Maternity Siv Gustafsson,Adriaan Kalwij,2006-09-12 One of the most important demographic issues of our time is the increasing age of women at motherhood This happens in the northern social democratic states Sweden and Norway in the

catholic countries Italy Spain and Ireland in the West European countries Netherlands and Germany in the former socialist transition countries Czech Republic and East Germany and in the liberal democracy of the United States The postponement of maternity and the related issue of declining fertility rates are of major interest to policy makers and have provoked much scientific research This book examines various economic aspects of the role of women's education in the postponement of maternity in these ten industrialized countries The chapters in this book each empirically investigate one of these countries using individual or household survey data and are in particular interested in the increasing age at motherhood with the investment in education of the mother In search of socio economic explanations for this relationship each chapter investigates a specific related research question This results in a book that covers a wide range of topics on the economics of fertility decisions such as career planning motives of women consumption smoothing motives of households and the role of institutions

**Strong family and low fertility:a paradox?** Gianpiero Dalla Zuanna,Giuseppe A. Micheli,2006-03-30 New perspectives in interpreting contemporary family and reproductive haviour of Mediterranean Europe 1 THE NEW GEOGRAPHY OF FERTILITY AND THE FAMILY IN EUROPE The countries of southern Europe have begun to reduce conjugal fertility at a later date compared to most other nations in the west This has been plained by means of the category of delay the backwardness of the pr esses of accumulation and economic development being seen as the cause of the maintaining of the reproductive models of the past Moreover the inf ence of the Catholic Church in Italy Spain and Portugal is supposed to have delayed the processes of secularisation rendering difficult the changes in mentality necessary for assuming modern patterns of reproductive behaviour not only for fertility but also for the variables which are strictly linked to it such as sexuality contraception and abortion Livi Bacci 1977 Lesthaeghe and Wilson 1986 1 1 The trends of very low fertility Now the panorama is very different Since the mid seventies southern Europe has been washed by the tide of a lowest low fertility i e TFR under 1.5 for several a prolonged period Billari et al 2003 which in some areas 1 has reached and maintained scarcely imaginable levels for years on end Conversely other areas of Europe where fertility started to fall many d ades earlier than in the regions of the sournth have recovered or maintained considerably higher levels of fertility often close to replacement level

**Subnational Population Estimates** David A. Swanson,Jeff Tayman,2012-05-23 Providing a unified and comprehensive treatment of the theory and techniques of sub national population estimation this much needed publication does more than collate disparate source material It examines hitherto unexplored methodological links between differing types of estimation from both the demographic and sample survey traditions and is a self contained primer that combines academic rigor with a wealth of real world examples that are useful models for demographers Between censuses which are expensive administratively complex and thus infrequent demographers and government officials must estimate population using either demographic modeling techniques or statistical surveys that sample a fraction of residents These estimates play a central role in vital decisions that range from funding allocations and rate setting to education health and

housing provision They also provide important data to companies undertaking market research However mastering small area and sub national population estimation is complicated by scattered incomplete and outdated academic sources an issue this volume tackles head on Rapidly increasing population mobility is making inter census estimation ever more important to strategic planners This book will make the theory and techniques involved more accessible to anyone with an interest in developing or using population estimates

**Demography: Analysis and Synthesis, Four Volume Set** Graziella Caselli, Jacques Vallin, Guillaume Wunsch, 2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks Demography Analysis and Synthesis offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of Demography Analysis and Synthesis have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations

*Diversity in Family Formation* Joop de Beer, F. Deven, 2013-03-09 The aim of Diversity in Family Formation is to examine changes in the start of the family formation process Rather than giving a rough overview of demographic changes in many countries a comparison of differences in changes in family formation and fertility behaviour between Belgium and The Netherlands is interesting for various reasons First even though the economic and cultural differences between these countries are relatively small there is one important difference Belgium is predominantly Catholic whereas The Netherlands has about equal proportions of Catholics and Protestants Second if the Second Demographic Transition implies that there is one common pattern of change in different European

countries and that differences across countries are due to the fact that countries are in a different stage of the transition process and if it is assumed that the transition process started earlier in Protestant countries than in Catholic countries one would expect The Netherlands to be in a further stage of the transition process than Belgium Thus an in depth comparison of changes in family formation and fertility behaviour between both countries may give us more insight in the question of whether there is one common transition process The comparison of fertility and family survey data in both countries brings us to the core question of whether there is one common explanation for differences between countries in various types of fertility and family behaviour under consideration namely fertility regulation the choice of living arrangement after leaving the parental home and the labour force participation of mothers

*Vision Assessment: Shaping Technology in 21st Century Society* John Grin, Armin Grunwald, 2012-12-06 One way to shape technology and its embedding in society in the 21st century is through the visions that guide their development especially concerning the long term societal perspective A critical discussion and assessment of these visions is a prerequisite for influencing the course of development Technology assessment therefore has to provide a methodological repertoire for assessing and constructing visions taking into account the requirements for long term orientation as well as the need for public legitimation This volume draws upon insights from technology assessment political sciences epistemology sociology and ethics It is to contribute to the recent literature in on shaping technology taking into account the co evolution of technology and society It connects to that technology assessment literature that emphasises TA's pro active role and its contribution to political judgement

**Geospatial Technology and the Role of Location in Science** Henk J. Scholten, Rob Velde, Niels van Manen, 2009-07-06 Globalisation has not led to the death of geography Intensified relations between communities in different parts of the world have only highlighted the need for understanding and managing phenomena on a variety of geographic scales From global warming to credit crunch and from epidemics to terrorism causes and solutions are sought on local regional national as well as inter continental levels With the advent of Geospatial Technology scholars policymakers and entrepreneurs have valuable tools in hand to proceed This book offers the first systematic account of the science behind this mental and technological revolution Tracing the adoption and dissemination of Geospatial Technology in a range of disciplines it examines the impact this technology has had and is likely to have on the explanation of spatial behaviour phenomena and processes At the same time stressing innovative usage it explores scientific contributions to technology advancement

**Children and Media** Bea Van den Bergh, 2000 Offers a large array of approaches to studying children and the media including views from communication theory and history with methodologies such as quantitative analysis ethnographic studies and theoretical inferences

*Images of the Economy of Nature, 1650-1930* Antonello La Vergata, 2023-10-05 The book discusses ideas concerning the order and balance of nature or economy of nature from the late 17th century to the early 20th century The perspective taken is broad longue dur e and interdisciplinary and reveals the interplay of scientific philosophical moral and social ideas The story begins with natural

theology dating roughly to the onset of the so called Newtonian Revolution and ends with the First World War The cut off date has been chosen for the following reasons the war changed the state of things affecting man s way of looking at and relating to nature both directly and indirectly indeed it put an end to most applications of Darwinism to society and history including interpretations of war as a form of the struggle for existence The author presents an overview of the different images of nature that were involved in these debates especially in the late 19th century when a large part of the scientific community paid lip service to Darwinism while practically each expert felt free to interpret it in his own distinct way The book also touches on the so called social Darwinism which was neither a real theory nor a common body of ideas and its various views of society and nature s economy Part of this book deals with the persistence of moralizing images of nature in the work of many authors One of the main features of the book is its wealth of detailed quotations In this way the author gives the reader the opportunity to see the original statements on which the author bases his discussion The author privileges the analysis of different positions over a historiography offering a merely linear narrative based on general implications of ideas and theories To revisit the concept of the so called Darwinian Revolution we need to examine the various perspectives of scientists and others their language and so to speak the lenses they used when reading facts and theories The book ends with some general reflections on Darwin and Darwinisms the plural is important as a case study on the relationship between intellectual history the history of science and contextual history Written by a historian this book really gives new multidisciplinary perspectives on the Darwinian Revolution
