encounters with the unspoiled landscape Michael Lobel upends this commonplace view by showing how Van Gogh's pictures are inseparable from the modern industrial era in which the artist lived from its factories and polluted skies to its coal mines and gasworks and how his art drew upon waste and pollution for its subjects and even for the very materials out of which it was made Lobel underscores how Van Gogh's engagement with the environmental realities of his time provides repeated forewarnings of the threats of climate change and ecological destruction we face today Van Gogh and the End of Nature offers a radical revisioning of nearly the full span of the artist's career considering Van Gogh's artistic process his choice of materials and some of his most beloved and iconic pictures Merging a timely sense of environmental urgency with bold new readings of the work of one of the world's most acclaimed artists this book weaves together detailed historical research and perceptive analysis into an illuminating portrait of an artist and his changing world

**Van Gogh's Cypressess** Susan Alyson Stein, 2023-05-15 Vincent van Gogh 1853 1890 immortalized the cypress tree in signature images that have become synonymous with his fiercely original power of expression This richly

illustrated publication illuminates the backstory of his invention for the first time from his initial investigations of the motif in benchmark drawings from Arles to his realization of their full evocative potential in such iconic canvases as *The Starry Night* and *Wheat Field with Cypresses* painted at the asylum in Saint Remy Susan Alyson Stein retraces the Dutch artist's inspired response to the flamelike evergreens as they gained ground in his works and artistic thinking over the course of his sojourn in the South of France The volume provides further insight into Van Gogh's creative process through a technical study focused on two celebrated works from the artist's epic painting campaign of June 1889 The visual and literary heritage of the cypresses is featured in a compilation of images and excerpts from nineteenth century poetry novels and travel writing many translated into English for the first time

**The New Psychedelic Revolution** James Oroc, 2018-01-16 A bold exploration of modern psychedelic culture its history and future Examines 3 modern psy culture architects chemist Alexander Sasha Shulgin mycologist philosopher Terence McKenna and visionary artist Alex Grey Investigates the use of microdosing in extreme sports the psy trance festival experience and the relationship between the ego entheogens and toxicity Presents a History of Visionary Art from its roots in prehistory to Ernst Fuchs and the Vienna School of the Fantastic to contemporary psychedelic art After the dismantling of a major acid laboratory in 2001 dramatically reduced the world supply of LSD the psychedelic revolution of the 1960s appeared to have finally run its course But the opposite has actually proven to be true and a psychedelic renaissance is rapidly emerging with the rise in popularity of transformational festivals like Burning Man and BOOM the return to positive media coverage of the potential benefits of entheogens and the growing number of celebrities willing to admit the benefits of their own personal use Along with the return of university research the revival of psychedelic philosophy and the increasing popularity of visionary art these new developments signify the beginning of a worldwide psychedelic cultural revolution more integrated into the mainstream than the counterculture uprising of the 1960s In his latest book James Oroc defines the borders of 21st century psychedelic culture through the influence of its three main architects chemist Alexander Shulgin mycologist Terence McKenna and visionary artist Alex Grey before illustrating a number of facets of this Second Psychedelic Revolution including the use of microdosing in extreme sports the tech savvy psychedelic community that has arisen around transformational festivals and the relationship between the ego entheogens and toxicity This volume also presents for the first time a History of Visionary Art that explains its importance to the emergence of visionary culture Exploring the practical role of entheogens in our selfish and fast paced modern world the author explains how psychedelics are powerful tools to examine the ego and the shadow via the transpersonal experience Asserting that a cultural adoption of the entheogenic perspective is the best chance that our society has to survive he then proposes that our ongoing psychedelic revolution now a century old since the first synthesis of a psychedelic in 1918 offers the potential for the birth of a new Visionary Age

what was supposed to be the original empty grave To their surprise the grave still contained a body and the skull revealed a head wound that matched the same location noted by the men who pulled his corpse from the water in 1917 The finding sent shockwaves across the nation and began a mystery that continues to this day In *Who Killed Tom Thomson* John Little continues the sixty year relationship his family has had with Tom Thomson and his fate by teaming up with two high ranking Ontario provincial police homicide detectives For the first time they provide a forensic scientific opinion as to how Thomson met his death and where his body is buried Little draws upon his father s research plus recently released archival material as well as his own thirty year investigation He and his colleagues prove that Thomson was murdered and set forth two persons of interest who may have killed Tom Thomson     *Ambient Assisted Living* Andrea Monteriù,Alessandro Freddi,Sauro Longhi,2021-02-16 This book documents the state of the art in the field of ambient assisted living AAL highlighting technologies and services which aim to improve health and quality of life while promoting active aging The coverage is wide ranging with topical sections devoted to human monitoring smart living services biomedical and robotic solutions including different case studies and real world examples where assistive technologies are successfully applied The book comprises a selection of the best refereed papers presented at the 10th Italian Forum on Ambient Assisted Living ForItAAL held in Ancona Italy in June 2019 which represents the annual event that involves the Ambient Assisted Living Italian Association and brought together researchers technology teams policy makers and stake holders Readers will find that the expert contributions offer clear insights into the ways in which the most recent exciting advances may be expected to assist in addressing the needs of the elderly and those with chronic conditions     *Analytical Chemistry for Cultural Heritage* Rocco Mazzeo,2017-01-25 The series Topics in Current Chemistry Collections presents critical reviews from the journal Topics in Current Chemistry organized in topical volumes The scope of coverage is all areas of chemical science including the interfaces with related disciplines such as biology medicine and materials science The goal of each thematic volume is to give the non specialist reader whether in academia or industry a comprehensive insight into an area where new research is emerging which is of interest to a larger scientific audience Each review within the volume critically surveys one aspect of that topic and places it within the context of the volume as a whole The most significant developments of the last 5 to 10 years are presented using selected examples to illustrate the principles discussed The coverage is not intended to be an exhaustive summary of the field or include large quantities of data but should rather be conceptual concentrating on the methodological thinking that will allow the non specialist reader to understand the information presented Contributions also offer an outlook on potential future developments in the field     **Van Gogh Notebook** Smart Books,2013-10-10 Van Gogh Notebook 6 99 3 99 A handy smART bookx notebook for van Gogh fans everywhere Great as a gift or a treat for yourself Cover Tough Paperback Artwork A high resolution print of Blossoming Almond Tree wrapped around the front and back covers Dimensions 20 3 x 12 7 cm 8 x 5 inches A touch smaller than A5 but much bigger than A6 it fits easily in a bag but not
