Valeri-Gold et al. (1991/1992) describe it as a formative assessment technique where students transform into "active learners and questioning thinkers" (p. 298). Harlin et al. (1992) view it as a "multidimensional system which provides teachers with a complete picture of a student's abilities and literacy development" (p. 203, cited in Gillespie et al., 1996, p. 482).

Transforming Schools Using Project-Based Learning, Performance Assessment, and Common Core

Standards Bob Lenz, Justin Wells, Sally Kingston, 2015-01-08 It's not what students know but what they do with what they know that is important. Schools are changing in response to this reality and in *Transforming Schools Using Project Based Learning Performance Assessment and Common Core Standards* Bob Lenz, Justin Wells and Sally Kingston draw on the example of the Envision Education schools as well as other leading schools around the country to show how the concept of deeper learning can meet the need for students who are both college and career ready and engaged in their own education. In this book the authors explain how project based learning can blend with Common Core aligned performance assessment for deeper learning. You'll discover how many schools have successfully made the transition from traditional teacher centered learning to project based deeper learning and find many practical ideas for implementation. Companion DVD and website include videos showing how to implement deeper learning strategies in the classroom. Evidence based descriptions show why deeper learning is right for students. Performance assessment experts explain how to align assessments with Common Core by shifting the emphasis from knowing to doing. Extensive game plan section provides step by step guidance for change. Schools are complex organizations and transformation involves all of the stakeholders from students to superintendents. But as this book shows there are amazing benefits to be realized when everyone commits to diving deeper into learning.

Assessing Reading 1: Theory and Practice Colin Harrison, Terry Salinger, 2002-01-04 This book along with its companion volume *Assessing Reading 2: Changing Practice in Classrooms* was originally conceived as the major outcome from an international seminar on reading assessment held in England. It focuses particularly on theoretical and methodological issues though with a clear series of links to practices in assessment especially state and national approaches to classroom based assessment in the USA, the UK and in Australia at both primary and secondary levels. Chapters offer new perspectives on the theories that underlie the development and interpretation of reading assessments, national assessments and classroom based assessment challenging readers to think in different ways.

Performance Assessment in Language Testing Mohammad Ali Salmani Nodoushan, 2008 Over the past few decades educators in general and language teachers in specific were more inclined towards using testing techniques that resembled real life language performance. Unlike traditional paper and pencil language tests that required test takers to attempt tests that were based on artificial and contrived language content, performance tests are authentic so that the test taker is asked to perform language tasks that he or she will need to perform in real life interactions. A very valuable type of performance test is called portfolio assessment in which a record of students' performance across a wide range of language tasks over a logical period of time is kept so that a profile of performance can be obtained for the evaluation of achievement. This paper will define performance assessment, trace its origins and development, explain how performance tests can be constructed and describes the nature and advantages of portfolios.
