Henderson, 2015-11-19 The outdoors is a physical and ideological space in which people engage with their environment but it is also an important vehicle for learning and for leisure The Routledge Handbook of Outdoor Studies is the first book to attempt to define and survey the multi disciplinary set of approaches that constitute the broad field of outdoor studies including outdoor recreation outdoor education adventure education environmental studies physical culture studies and leisure studies It reflects upon the often haphazard development of outdoor studies as a discipline critically assesses current knowledge in outdoor studies and identifies further opportunities for future research in this area With a broader sweep than any other book yet published on the topic this handbook traces the philosophical and conceptual contours of the discipline as well as exploring key contemporary topics and debates and identifying important issues in education and professional practice It examines the cultural social and political contexts in which people experience the outdoors including perspectives on outdoor studies from a wide range of countries providing the perfect foundation for any student researcher educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us *Tall Ships Down* Daniel S. Parrott, 2004 Technologically outmoded and once nearly swept from the seas tall ships have experienced a fifty year renaissance as sail training and passenger vessels and we are the richer for it After all what sight has more power to stir the soul than a tall ship under sail with its acres of canvas and miles of rigging But that resurgence has had a tragic side and professional mariner and maritime scholar Dan Parrott explores it in *Tall Ships Down* a groundbreaking reconstruction of the losses of the 316 foot barque Pamir in 1957 the 117 foot brigantine Albatross

in 1961 the 117 foot barque Marques in 1984 the 137 foot Pride of Baltimore in 1986 and the 125 foot brig Maria Asumpta in 1995 Together these disasters claimed 112 lives The stories of these majestic ships have been subject to mystery and distortion In some instances even the survivors could not explain what went wrong and in others the official inquiries failed to articulate the most critical lessons hidden in the sudden terrible catastrophes until now Parrott traces the history of each ship from its building and early career through subsequent owners modifications His vivid re creations of each final voyage dissect the circumstances of loss from forensic evidence expert testimony survivors memories and his own considerable experience Carefully examined the evidence shows that contrary to some official findings ignorance of and disregard for age old practices of seamanship were at least as responsible for the tragedies as acts of God In some instances the seeds of a ship s ultimate undoing were planted years before as ill considered structural changes rig modifications and mission creep eroded its stability and seaworthiness Cargo loose in holds hatches unsecured at sea freeing ports timbered shut failure to preserve proper sea room these and other factors emerge from Parrott s analysis as contributing factors Book Jacket **Tall Ships**

Beyond Perception Caroline Gatt, Jan Peter Laurens Loovers, 2025-06-25 This book showcases the way a range of scholars have engaged with Tim Ingold's opus since the publication of his ground breaking *The Perception of the Environment* in 2000. Ingold's work has become key for a variety of disciplines ranging from anthropology archaeology and human geography to art architecture design and studies of material and visual culture. As set out in *The Perception of the Environment* and subsequent publications Ingold proposed an understanding of the world that placed sentient remembering and imagining organisms or inhabitants some of them human at the heart of an extensive field of socio ecological relations. In this work Ingold develops broad ranging analyses of personhood knowledge and skills among many other topics. This volume sets out to synthesize critical scholarship drawing on Ingold's work to lay out its principles methods and results and to demonstrate its contribution to reshaping both contemporary anthropology and wider intellectual terrains. By bringing together chapters from a variety of scholars all critically furthering Ingold's proposals the book advances a paradigm change occurring in various academic disciplines from fixist to emergence onto epistemologies

Nation and Commemoration Lyn Spillman, 1997-01-28 What do people think when they imagine themselves as part of a nation? *Nation and Commemoration* answers this question in an exploration of the creation and recreation of national identities through commemorative activities. Extending recent work in cultural sociology and history Lyn Spillman compares centennial and bicentennial celebrations in the United States and Australia to show how national identities can emerge from processes of cultural production. She systematically analyses the symbols and meanings of national identity in these two new nations identifying changes and continuities similarities and differences in how visions of history place in the world politics land and diversity have been used to express nationhood. The result is a deeper understanding not only of American and
