Saints Scholars And Politicians:

Religion and Politics in the Middle Ages Ludger Körntgen, Dominik Waßenhoven, 2013-01-30 The increased interest in religion as a phenomenon and its various cultural contexts is encouraging a focus on the relationship between religion and politics However the political relevance of the religious and the interdependence between political and religious spheres has always been a major area of medieval research The articles in this volume consider not only the principle inseparability of both spheres as previously established by research but also the beginnings of a differentiation and relative autonomy of religion and politics within the framework of a comparison between Germany and the United Kingdom This allows the identification of restrictions within the research traditions that are due to national histories and points to ways of overcoming these restrictions *The submerged centuries. The novel. The scholar in politics. Romeo and Juliet. A true love story. Humanity to man and beast. Excess. Peculiarities of man. An injured world* David Swing, 1894

both chronologically and geographically As the first collection to draw together early modern gender and political culture this book is the perfect starting point for students exploring this fascinating topic *Occasional, Critical, and Political Writing* James Joyce, 2000 This is a collection of Joyce's non-fictional writing including newspaper articles reviews lectures and essays It covers 40 years of Joyce's life and maps important changes in his political and literary opinions

Representing Medieval Genders and Sexualities in Europe Dr Alison More, Dr Elizabeth L'Estrange, 2012-10-01

Transcending both academic disciplines and traditional categories of analysis this collection illustrates the ways genders and sexualities could be constructed subverted and transformed Focusing on areas such as literature hagiography history and art history from the Anglo Saxon period to the early sixteenth century the contributors examine the ways men and women lived negotiated and challenged prevailing conceptions of gender and sexual identity In particular their papers explore textual constructions and transformations of religious and secular masculinities and femininities visual subversions of gender roles gender and the exercise of power and the role sexuality plays in the creation of gender identity The methodologies which are used in this volume are relevant both to specialists of the Middle Ages and early modern periods and to scholars working more broadly in fields that draw on contemporary gender studies Representing Medieval Genders and Sexualities in Europe Elizabeth L'Estrange, Alison More, 2011 Engaging with current academic debates over the complexities and pluralities of gender identity in the Middle Ages this volume is one of the first collections to show how the themes of gender construction subversion and transformation are applicable to a wide range of fields The methodologies used in this volume are relevant both to specialists of the Middle Ages and early modern periods and to scholars working more broadly in fields that draw on contemporary gender studies Politics and Cultures of Islamization in Southeast Asia Georg

Stauth, 2015-07-15 This book is about cultural and political figures institutions and ideas in a period of transition in two Muslim countries in Southeast Asia Malaysia and Indonesia It also addresses some of the permutations of civilizing processes in Singapore and the city state's image moving across its borders into the region and representing a miracle of modernity beyond ideas The central theme is the way in which Islam was re-constructed as an intellectual and socio-political tradition in Southeast Asia in the nineteen nineties Scholars who approach Islam both as a textual and local tradition students who take the heartlands of Islam as imaginative landscapes for cultural transformation and politicians and institutions which have been concerned with transmitting the idea of Islamization are the subjects of this inquiry into different patterns of modernity in a tropical region still bearing the signature of a colonial past **Rethinking Reform in the Latin West, 10th to Early**

12th Century, 2023-09-14 This collection of studies investigates how people of the 10th to early 12th century experienced and represented processes of intentional change in the Church and what the consequences are of modern scholars' reliance on reform to describe and interpret these processes In 11 thematic chapters it takes stock of the current state of research and offers suggestions to deepen our understanding of the ideological institutional and cultural dynamics at play

Scholarship, Science and Politics in Early Modern England Kevin Killeen,2016-12-05 Kevin Killeen addresses one of the
most enigmatic of seventeenth century writers Thomas Browne 1605 1682 whose voracious intellectual pursuits provide an
unparalleled insight into how early modern scholarly culture understood the relations between its disciplines Browne s work
encompasses biblical commentary historiography natural history classical philology artistic propriety and an encyclopaedic
coverage of natural philosophy This book traces the intellectual climate in which such disparate interests could cohere
locating Browne within the cultural and political matrices of his time While Browne is most frequently remembered for the
magnificence of his prose and his temperamental poise qualities that knit well with the picture of a detached apolitical figure
this work argues that Browne s significance emerges most fully in the context of contemporary battles over interpretative
authority within the intricately linked fields of biblical exegesis scientific thought and politics Killeen s work centres on a
reassessment of the scope and importance of Browne s most elaborate text *Pseudodoxia Epidemica* his vast encyclopaedia of
error with its mazy series of investigations and through this explores the multivalent nature of early modern enquiry
