And we can scarce conclude so of any thing CONFIDENCE of Science is one great reason we miss it For on this account presuming we have it every where we seek it not where it is and therefore fall short of the object of our Enquiry Now to give further check to Dogmatical pretensions and to discover the vanity of assuming Ignorance we ll make a short enquiry whether there be any such thing as Science in the sense of its Assertours In their notion then It is the knowledge of things in their true immediate necessary causes Upon which I le advance the following Observations 1 All Knowledge of Causes is deductive for we know none by simple intuition but through the mediation of their effects So that we cannot conclude any thing to be the cause of another but from its continual accompanying it for the causality it self is insensible But now to argue from a concomitancy to a causality is not infallibly conclusive Yea in this way lies notorious delusion For suppose for instance we had never seen more Sun then in a cloudy day and that the lesser lights had ne re appeared Let us suppose the day had always broke with a wind and had proportionably varied as that did Had not he been a notorious Sceptick that should question the causality But we need not be beholding to so remote a supposition The *Scepsis Scientifica* Joseph Glanvill,2015-06-29 Excerpt from *Scepsis Scientifica* Or Confest Ignorance the Way to Science In an Essay of the Vanity of Dogmatizing and Confident Opinion He seems to have been brought up if not as an extreme sectary at least in some school of Puritanism which allowed small scope for independent judgment Thus he tells us in his Plus Ultra p 142 In my first education I was continually instructed into a religious and fast adherence to everything I was taught and a dread of disputing in the least article a mode of education which he was wont in after life vehemently to denounce He entered the University of Oxford in 1652 and took his degree three years after In the dearth of more direct information his love of culture and mental independence may fairly be inferred from his associates About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works The Vanity of Dogmatizing Joseph Glanvill,1970 *Scepsis Scientifica* Joseph Glanvill,2003 Scepsis Scientifica Glanvill Joseph,2022-10-27 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Scepsis Scientifica** Glanvill Joseph,2015-02-19 This work has been selected by scholars as
