audience sees the work as laborious or poetic depends on the creative genius of the artist Some painters use the play of light passing through a landscape or washing over a figure to create an evocative moment that will be both timeless and transitory The essential role of art remains what it has always been a way of human expression This is the role that our participants concentrate on as they discuss art as the expression of the spirit a creative act through which the artist makes manifest what is within him Spirit suggests the unity of feeling and thought Avoiding broad generalities our participants address specific areas in orchestration with music architecture literature and phenomenology Profs Souiller Scholz Etlin Sweetser Josephs show us at what point art is an intimate profound expression and the magic of a civilization as a whole springing from its evolving thoughts and embodying ideals such as the Renaissance the Baroque Modernism and at what point it reflects the transformation of a particular society and its mode of life

*Sullivan-esque* Ronald E. Schmitt, 2024-04-22 *Sullivan-esque* offers a visual and historical tour of a unique but often overlooked facet of modern American architecture derived from Louis Sullivan Highly regarded in architecture for inspiring the Chicago School and the Prairie School Sullivan was an unwilling instigator of the method of facade composition later influenced by Frank Lloyd Wright William Gray Purcell and George G Elmslie that came to be known as Sullivan-esque Decorative enhancements with botanical and animal themes Sullivan's distinctive ornamentation mitigated the hard geometries of the large buildings he designed coinciding with his form follows function aesthetic Sullivan's designs offered solutions to problems presented by new types and scales of buildings Widely popular they were also widely copied and the style proliferated due to a number of Chicago based interests including the Radford Architectural Company and several decorative plaster and terra cotta companies Stock replicas of Sullivan's designs manufactured by the Midland Terra Cotta Company and others gave distinction and focus to utilitarian buildings in Chicago's commercial strips and other confined areas such as the downtown districts of smaller towns Mass produced Sullivan-esque terra cotta endured as a result of its combined economic and aesthetic appeal blending the sophistication of high architectural art with the pragmatic functionality of building design Masterfully framed by the author's photographs of Sullivan-esque buildings in Chicago and throughout the Midwest Ronald E Schmitt's in depth exploration of the Sullivan-esque tells the story of its evolution from Sullivan's intellectual and aesthetic foundations to its place as a form of commercial vernacular The book also includes an inventory of Sullivan-esque buildings Honorable Mention recipient of the 2002 PSP Awards for Excellence in Professional Scholarly Publishing

**10 Buildings That Changed America** Dan Protesse, 2013-05-14 10 Buildings that Changed America tells the stories of ten influential works of architecture the people who imagined them and the way these landmarks ushered in innovative cultural shifts throughout our society The book takes readers on a journey across the country and inside these groundbreaking works of art and engineering The buildings featured are remarkable not only for aesthetic and structural reasons but also because their creators instilled in them a sense of purpose and personality that became reflected in an overarching sense the American identity Edited by the staff of WTTW the Chicago PBS affiliate that is the most watched public television station in the country 10 Buildings will be released alongside the national broadcast of an hour long special by the same name This television event will be promoted over digital media on ground events and educational initiatives in schools and the book will be a significant component to all of these elements 10 Buildings retells the shocking funny and even sad stories of how these buildings came to be It offers a peek inside the imaginations of ten daring architects who set out to change the way we live work and play From American architectural stalwarts like Louis Sullivan and Frank Lloyd Wright to modern revolutionaries like Frank Gehry and Robert Venturi this book examines the most prominent buildings designed by the most noteworthy architects of our time Also profiled are Americans less noted for their architectural acumen but no less significant for their contributions to the field Thomas Jefferson a self taught architect is profiled for designing the iconic Virginia State Capitol Taking its inspiration from ancient Rome America's first major public building forged a philosophical link between America and the world's earliest democracies Similarly Henry Ford employed Albert Kahn to design a state of the art innovative factory for Ford's groundbreaking assembly line Reinforced concrete supported massive open rooms without any interior dividing walls which yields the uninterrupted space that was essential for Ford's sprawling continuous production setups What's more Kahn considered the needs of workers by including astonishingly modern large windows and louvers for fresh air The design of

each of these ten buildings was completely monumental and prodigious in its time because of the architect's stylistic or functional innovations. Each was also highly influential, inspiring a generation or more of architects who in turn made a lasting impact on the American landscape. We see the legacy of architects like Mies van der Rohe or H. H. Richardson all around us in the homes where we live, the offices where we work, our public buildings and our houses of worship. All have been shaped in one way or another by a handful of imaginative, audacious and sometimes even arrogant individuals throughout history whose bold ideas have been copied far and wide. 10 Buildings is the ideal collection to detail the flashes of inspiration from these architects who dared to strike out on their own and design radical new types of buildings that permanently altered our environmental and cultural landscape.
