Love Stinks Running Press,1998 A guide to more than 50 collectible Barbies **TLA Film, Video, and DVD Guide**
2002-2003 David Bleiler,2001-11-03 A film video and DVD guide for the true lover of the cinema this volume focuses on independent and international films as well as the best of the mainstream 450 photos throughout Rebel Skies Ann Sei Lin,2024-02-13 Ann Sei Lin s enchanting and action packed debut first in a series will sweep readers away to an aerial world of magic danger and political intrigue Perfect for fans of Elizabeth Lim Kalynn Bayron and the films of Studio Ghibli Kurara has never known any other life than being a servant onboard the Midori a flying ship serving the military elite of the Mikoshiman Empire a vast realm of floating cities Kurara also has a secret she can make folded paper figures come to life with a flick of her finger But when the Midori is attacked and Kurara s secret turns out to be a power treasured across the empire a gut wrenching escape leads her to the gruff Himura who takes her under his wing Under Himura s tutelage and with the grudging support and friendship of his crew Kurara learns to hunt shikigami wild paper spirits sought after by the Princess of Mikoshima But what does the princess really want with the shikigami Are they merely enchanted figures without will or thought or are they beings with souls and minds of their own As fractures begin to appear both across the empire and within Kurara s understanding of herself Kurara will have to decide who she can trust Her fate and the fate of her friends and even the world may rest on her choice And time is running out *DisGrace Notes* Jack McCarthy,2007 **The Hidden Power of Smell** Paul A. Moore,2015-08-27 The main purpose of the book is to provide insight into an area that humans often take for granted There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system In many instances chemical signals can provide more detailed and accurate information than any other mode of communication yet this world is hidden from us because of our focus on visual and auditory signals Although we have a diversity of senses available to us humans are primarily auditory and visual animals These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information We use sounds to communicate and music to excite or soothe us Our vision provides us with communication entertainment and information about our world Even though our world is dominated by other stimulus energies we have chosen in an evolutionary sense either auditory or visual signals to carry our most important information This is not the case for most other organisms Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals The world of communication using chemicals is an alien world for us We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life Part of this na vet about chemical signals is due to our cultural focus on visual and auditory signals but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings The popular press and popular writings virtually ignore the chemical senses especially in regard to their role or influence for humans and our human culture
