The Noose of Laurels Wally Herbert,1989      Maritime Claims in the Arctic Erik Franckx,2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East West relations in general the Arctic has increasingly become the focal point of international attention during the last few years Scientific research and environmental protection are areas which have already witnessed some form of international cooperation in the area With this particular evolution in mind a new look at the legal regime of navigation in the Arctic seems to be justified While several other countries border on the Arctic Canada and Russia have the most extensive shorelines and have shown keen interest in ensuring that their proper share of this area is not encroached by other countries This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them It also explores the need for greater international cooperation in this area not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area      **The Mammoth Book of Polar Journeys** Jon E. Lewis,2011-08-04 Exerting a magnetic pull our imaginations the poles have been the object of many gripping first hand accounts of exploration literally journeys to the ends of the earth A passport to the last wildernesses of Earth this is the definitive collection of first hand accounts of polar exploration 50 true stories of intrepid travel through the desolate and dangerous regions of both Arctic and Antarctic Beginning with Sir John Franklin's starvation trek through Alaska in 1821 and ending with Vassilli Gorshkovsky's northern expedition aboard a creaking ice breaker in 2005 these true stories encompass every kind of triumph and disaster The inspired but doomed courage of Captain Scott and the marvellous leadership of Shackleton are well known but here are many other stories including *The Bear* by Frederick A Cook 1908 *Meeting with Polar Eskimos* by Knud Rasmussen 1932 *By Dog Sledge to the Top of the World* by Wally Herbert 1968 *Hell on Earth* by Reinhold Messner 1989 90 *Solo* by Pen Hadow 2003 And many more      **Muskox Land** Lyle Dick,2001 Muskox Land provides a meticulously researched and richly illustrated treatment of Canada's High Arctic as it interweaves insights from historiography Native studies ecology anthropology and polar exploration      **Globalizing Polar Science** R. Launius,J. Fleming,D. DeVorkin,2010-11-22 The International Polar Years and the International Geophysical Year represented a remarkable international collaborative scientific effort that has been largely neglected by historians This groundbreaking collection seeks to redress that neglect and illuminate critical aspects of the last 150 years of international scientific endeavour      *Nineteenth-Century Travels, Explorations and Empires, Part I Vol 1* Peter J Kitson,William Baker,Indira Ghose,Susan Schoenbauer Thurin,2021-11-18 A collection of writings on travels undertaken in the Victorian era The texts collected in these volumes show how 19th century travel literature served the interests of empire by promoting British political and economic values that translated into manufacturing goods      The Magnetic North Sara Wheeler,2011-02-01 More than a decade ago Sara Wheeler traveled to Antarctica to understand a continent nearly lost to

myth and lore In the widely acclaimed bestselling Terra Incognita she chronicled her quest to find a hidden history buried in Antarctica's extreme surroundings Now Wheeler journeys to the opposite pole to create a definitive picture of life on the fringes In The Magnetic North she takes full measure of the Arctic at once the most pristine place on earth and the locus of global warming Inspired by the spiraling shape of a reindeer horn bangle she travels counterclockwise around the North Pole through the territories belonging to Russia the United States Canada Denmark Norway and Finland marking the transformations of what once seemed an unchangeable landscape As she witnesses the mounting pollution concentrated at the pole Wheeler reckons with the illness of the whole organism of the earth Smashing through the Arctic Ocean with the crew of a Russian icebreaker shadowing the endless Trans Alaska Pipeline with a tough Idaho born outdoorswoman herding reindeer with the Lapps and visiting the haunting deceptively peaceful lands of the Gulag Wheeler brings the Arctic's many contradictions to life The Magnetic North is an urgent beautiful book rich in dramatic description and vivid reporting It is a singular deeply personal portrait of a region growing daily in global importance Before the Heroes Came T. H.

Baughman,1999-09-01 Although the Antarctic ice pack and some offshore islands had been sighted and even landed upon briefly as early as the 1820s it was not until an eccentric Anglo Norwegian explorer Carsten F Borchgrevink went ashore in 1895 that a human being set foot on the Antarctic continent Borchgrevink snubbed by the British establishment had stolen a march on several planned competing expeditions from Germany and Scandinavia Borchgrevink returned to Antarctica in 1899 with a party that was the first to winter over on the continent Regrettably bad weather and unscalable mountains limited their forays inland Borchgrevink's survival was proof that with adequate supplies the Antarctic winter was survivable and that with a better geographic position the enormous unknown of the continent could be investigated Borchgrevink galvanized the British geographical authorities who had come to consider polar exploration their exclusive province Led by Sir Clements Markham of the Royal Geographic Society the British keenly felt his blow to their national pride delivered by an explorer they regarded as an arrogant upstart The RGS pushed forward with its plans and a tragic competition to be the first to reach the South Pole was set in motion between the British and the Scandinavians This work is an account of the first tentative human gropings in Antarctica concentrating on the coalescing of official and popular attitudes that later resulted in the polar races of Robert Falcon Scott and Roald Amundsen which dominate the story of the Heroic Era of Antarctic exploration from 1901 to 1922 **How Peary Reached the Pole** Donald MacMillan,2008-11-24 A fascinating account of life on Robert E Peary's 1908-09 North Pole Expedition

The Arctic Paul Simpson-Housley,1996-09-09 This book seeks to provide illustrations of Arctic mysteries and fictions which often occur as a result of misconceptions of Arctic geography The chapters are extremely varied in subject matter and conclusions are in the domain of speculation The book begins with very early examples of northern travels starting with the probable adventures of Pytheas the Greek Brendan the Irish monk and the four medieval odysseys of Adam of Bremen Nicolas of Lynn Prince Henry Sinclair and Zeno of Venice No account of polar

enigmas would be complete without reference to the Franklin expedition the possible fate of his lost ships and the debate over whether his men committed cannibalism The book concludes with a deliberation on whether Cook or Perry actually did reach the North Pole hinting that perhaps neither of them reached their objective **Exploring Polar Frontiers** William James Mills,2003-12-11 Covers the entire history of Arctic and Antarctic exploration from the voyage of Pytheas ca 325 B C to the present in one convenient comprehensive reference resource Exploring Polar Frontiers A Historical Encyclopedia is the only reference work that provides a comprehensive history of polar exploration from the ancient period through the present day The author is a noted polar scholar and offers dramatic accounts of all major explorers and their expeditions together with separate exploration histories for specific islands regions and uncharted waters He presents a wealth of fascinating information under a variety of subject entries including methods of transport myths achievements and record breaking activities By approaching polar exploration biographically geographically and topically Mills reveals a number of intriguing connections between the various explorers their patrons and times and the process of discovery in all areas of the polar regions Furthermore he provides the reader with a clear understanding of the intellectual climate as well as the dominant social economic and political forces surrounding each expedition Readers will learn why the journeys were undertaken not just where when and how **Explorers in the 20th and 21st Centuries** Britannica Educational Publishing,2013-06-01 Technological advances including pressurized cabins for hot air balloons rocketry that powers spacecraft and deep sea diving gear have changed the face of exploration What hasn't changed since ancient times however is the bravery and inquisitiveness of intrepid individuals at the forefront of modern day exploration and adventure Those who have challenged conventional thinking and sought to test physical limits of human endurance in the 20th and 21st centuries are the subjects of this exciting collection of biographies **The Sea in World History** Stephen K. Stein,2017-04-24 This two volume set documents the essential role of the sea and maritime activity across history from travel and food production to commerce and conquest In all eras water transport has served as the cheapest and most efficient means of moving cargo and people over any significant distance Only relatively recently have railroads and aircraft provided an alternative Most of the world's bulk goods continue to travel primarily by ship over water Even today 95 percent of the cargo that enters and leaves the United States does so by ship Similarly people around the world rely on the sea for food and in recent years the sea has become an important source of oil and other resources with the longterm effects of our continuing efforts to extract resources from the sea further highlighting environmental concerns that range from pollution to the exhaustion of fish stocks This chronologically organized two volume reference addresses the history of the sea beginning with ancient civilizations 4000 to 1000 BCE and ending with the modern era 1945 to the present day Each of the eight chapters is further broken down into sections that focus on specific nations or regions offering detailed descriptions of that area of the world and shorter entries on specific topics individuals and events The book spans maritime history covering major seafaring peoples and nations

famous explorers travelers and commanders events battles and wars key technologies including famous ships important processes and ongoing events such as piracy and the slave trade and more Readers will benefit from dozens of primary source documents ranging from ancient Egyptian tales of seafaring to texts by renowned travelers like Marco Polo Zheng He and Ibn Battuta that provide firsthand accounts from the age of discovery as well as accounts of battle from World War I and II and more modern accounts of the sea

**The Great Journeys in History** Robin Hanbury-Tenison, 2021-05-04 A lively collection of the adventurous stories of the greatest explorers in history Ferdinand Magellan Genghis Khan Thor Heyerdahl Amelia Earhart and Neil Armstrong these are some of the greatest travelers of all time This book chronicles their stories and many more describing epic voyages from early trips through the great port city of Alexandria to the latest journeys into space In antiquity we follow Alexander the Great to the Indus and Hannibal across the Alps in medieval times we trek beside Genghis Khan and Ibn Battuta The Renaissance eventually led to Columbus visiting the Americas and to the circumnavigation of the world In the following centuries global maps are filled in by Abel Tasman Vitus Bering and James Cook Journeys specifically made for scientific discoveries most famously by Alexander von Humboldt and Charles Darwin begin In modern times the ends of the earth were reached including both poles and the world's highest mountain Editor Robin Hanbury-Tenison leads an incredible team of fifty-two contributors including Robert Ballard and Ranulph Fiennes who relate firsthand experiences with the journeys and places they describe The Great Journeys in History chronicles the stories of bold early travelers who explored the unexplored and who set out into the unknown bringing alive the romance and thrill of adventure

*Ishi in Three Centuries* Karl Kroeber, Clifton B. Kroeber, 2003-01-01 *Ishi in Three Centuries* brings together a range of insightful and unsettling perspectives and the latest research to enrich and personalize our understanding of one of the most famous Native Americans of the modern era Ishi the last Yahi After decades of concealment from genocidal attacks on his people in California Ishi ca 1860-1916 came out of hiding in 1911 and lived the last five years of his life in the University of California Anthropological Museum in San Francisco Contributors to this volume illuminate Ishi the person his relationship to anthropologist A. L. Kroeber and others his Yahi world and his enduring and evolving legacy for the twenty-first century *Ishi in Three Centuries* features recent analytic translations of Ishi's stories new information on his language craft skills and his personal life in San Francisco with reminiscences of those who knew him and A. L. Kroeber Multiple sides of the repatriation controversy are showcased and given equal weight Especially valuable are discussions by Native American writers and artists including Gerald Vizenor Louis Owens and Frank Tuttle of how Ishi continues to inspire the creative imagination of American Indians

1912 Chris Turney, 2013-10-29 The South Pole discovered trumpeted the front page of *The Daily Chronicle* on March 8 1912 marking Roald Amundsen's triumph over the tragic Robert Scott Yet behind all the headlines there was a much bigger story Antarctica was awash with expeditions In 1912 five separate teams representing the old and new world were diligently embarking on scientific exploration beyond the edge of the known planet Their discoveries not

only enthralled the world but changed our understanding of the planet forever Tales of endurance self sacrifice and technological innovation laid the foundations for modern scientific exploration and inspired future generations To celebrate the centenary of this groundbreaking work 1912 The Year the World Discovered Antarctica revisits the exploits of these different expeditions Looking beyond the personalities and drawing on his own polar experience Chris Turney shows how their discoveries marked the dawn of a new age in our understanding of the natural world He makes use of original and exclusive unpublished archival material and weaves in the latest scientific findings to show how we might reawaken the public's passion for discovery and exploration

Encyclopedia of the Arctic Mark Nuttall, 2005-09-23 With detailed essays on the Arctic's environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the environment

**The Oxford Book of Exploration** Robin Hanbury-Tenison, 2005 Selected by Robin Hanbury Tenison described by the Sunday Times as the greatest explorer of the last twenty years this is a comprehensive anthology of the writings of explorers through the ages now fully revised and updated The ultimate in travel writing these are the words of those who changed the world through their pioneering search for new lands new peoples and new experiences Divided into geographical sections the book takes us to Asia with Vasco da Gama Francis Younghusband and Wilfred Thesiger to the Americas with John Cabot Sir Francis Drake and Alexander Von Humboldt to Africa with Dr David Livingstone and Mary Kingsley to the Pacific with Ferdinand Magellan and James Cook and to the Poles with Robert Peary and Wally Herbert Driven by a desire to discover that transcends all other considerations the vivid writings of these extraordinary people reveal what makes them go beyond the possible and earn the right to be known as explorers

Unknown Waters Alfred Scott McLaren, 2008-01-22 This book tells the story of the brave officers and men of the nuclear attack submarine USS Queenfish SSN 651 who made the first survey of an extremely important and remote region of the Arctic Ocean The unpredictability of deep draft sea ice shallow water and possible Soviet discovery all played a dramatic part in this fascinating 1970 voyage

**True North** Bruce Henderson, 2012-04-16 Nail biting true adventure Kirkus Reviews In 1909 two men laid rival claims to this crown jewel of exploration A century later the battle rages still This book is about one of the most enduring and vitriolic feuds in the history of exploration What a consummate cur he is said Robert Peary of Frederick Cook in 1911 Cook responded Peary has stooped to every crime from rape to murder They had started out as friends and shipmates with Cook a doctor accompanying Peary a civil engineer on an expedition to northern Greenland in 1891 Peary's leg was shattered in an accident and without Cook's care he might never have walked again But by the summer

of 1909 all the goodwill was gone Peary said he had reached the Pole in September 1909 Cook scooped him presenting evidence that he had gotten there in 1908 Bruce Henderson makes a wonderful narrative out of the claims and counterclaims and he introduces fascinating scientific and psychological evidence to put the appalling details of polar travel in a new context
