Rab And Dab:

Rab and Dab Elizabeth Waties Allston Pringle, 1984 *The Atlantic Monthly*, 1914 South Carolina Women Marjorie Julian Spruill, Valinda W. Littlefield, Joan Marie Johnson, 2009-05-01 Volume Two The biographical essays in this volume provide new insights into the various ways that South Carolina women asserted themselves in their state and illuminate the tension between tradition and change that defined the South from the Civil War through the Progressive Era As old rules including gender conventions that severely constrained southern women were dramatically bent if not broken these women carved out new roles for themselves and others The volume begins with a profile of Laura Towne and Ellen Murray who founded the Penn School on St Helena Island for former slaves Subsequent essays look at such women as the five Rollin sisters members of a prominent black family who became passionate advocates for women's rights during Reconstruction writer Josephine Pinckney who helped preserve African American spirituals and explored conflicts between the New and Old South in her essays and novels and Dr Matilda Evans the first African American woman licensed to practice medicine in the state Intractable racial attitudes often caused women to follow separate but parallel paths as with Louisa B Poppenheim and Marion B Wilkinson Poppenheim who was white and Wilkinson who was black were both driving forces in the women's club movement Both saw clubs as a way not only to help women and children but also to showcase these positive changes to the wider nation Yet the two women worked separately as did the white and black state federations of women's clubs Often mixing deference with daring these women helped shape their society through such avenues as education religion politics community organizing history the arts science and medicine Women in the mid and late twentieth century would build on their accomplishments **Trumpty Dumpty Wanted a Crown** John Lithgow, 2020-09-29 Following the success of his New York Times bestseller Dumpty award winning actor author and illustrator John Lithgow presents a brand new collection of satirical poems chronicling the despotic age of Donald Trump Trumpty Dumpty Wanted a Crown is darker and more hard hitting than ever Lithgow writes and draws with wit and fury as he takes readers through another year of the shocking events involving Trump and his administration His uproarious poems and illustrations encompass Trump's impeachment the COVID 19 pandemic the Black Lives Matter protests and much more Lithgow targets Mitch McConnell Mike Pompeo Bill Barr Jared Kushner Elaine Chao and many others but also includes a few heroes of the moment including Anthony Fauci Nancy Pelosi Adam Schiff and even Barack Obama The book arrives at a time when it's needed most With all new poems and never before seen line drawings Lithgow will once again make readers laugh and pause to remember some of the most defining moments in recent history skewering the reign of King Dumpty one stanza at a time Digital audio edition read by the author Computer Simulation of Biomolecular Systems W.F. van Gunsteren, P.K. Weiner, A.J. Wilkinson, 2013-11-27 The third volume in the series on Computer Simulation of Biomolecular Systems continues with the format introduced in the first volume 1 and elaborated in the second volume 2 The primary emphasis is on the methodological aspects of simulations

although there are some chapters that present the results obtained for specific systems of biological interest The focus of this volume has changed somewhat since there are several chapters devoted to structure based ligand design which had only a single chapter in the second volume It seems useful to set the stage for this volume by quoting from my preface to Volume 2

2 The long range goal of molecular approaches to biology is to describe living systems in terms of chemistry and physics Over the last fifty years great progress has been made in applying the equations representing the underlying physical laws to chemical problems involving the structures and reactions of small molecules Corresponding studies of mesoscopic systems have been undertaken much more recently Molecular dynamics simulations which are the primary focus of this volume represent the most important theoretical approach to macromolecules of biological interest

Magnetochemical Formulae Roman Boča, 2012-02-01 Magnetochemistry is concerned with the study of magnetic properties in materials It investigates the relationship between the magnetic properties of chemical compounds and their atomic and molecular structure This rapidly growing field has a number of applications and the measuring and interpreting of magnetic properties is often conducted by scientists who are not specialists in the field Magnetochemistry requires complex mathematics and physics and so can be daunting for those who have not previously studied it in depth Aimed at

providing a single source of information on magnetochemistry this book offers a comprehensive and contemporary review of the mathematical background and formula for predicting or fitting magnetic data including a summary of the theory behind magnetochemistry to help understand the necessary calculations Along with tables listing the key formula there is also a model of the magnetic functions showing the effect of individual magnetic parameters The clear structure and comprehensive coverage of all aspects of magnetochemistry will make this an essential book for advanced students and practitioners Provides comprehensive overview of the mathematical background of magnetochemistry Uses clear and accessible language so scientists in a variety of fields can utilize the information Detailed explanations of equations and formula

Measures of Association for Cross Classifications L. A. Goodman, W. H. Kruskal, 2012-12-06 In 1954 prior to the era of modern high speed computers Leo A Goodman and William H Kruskal published the first of a series of four landmark papers on measures of association for cross classifications By describing each of several cross classifications using one or more interpretable measures they aimed to guide other investigators in the use of sensible data summaries Because of their clarity of exposition and their thoughtful statistical approach to such a complex problem the guidance in this paper is as useful and important today as it was on its publication 25 years ago in a cross classification by a single number inevitably Summarizing association necessarily loses information Only by the thoughtful choice of a measure of association can one hope to lose only the less important information and thus arrive at a satisfactory data summary The series of four papers reprinted here serve as an outstanding guide to the choice of such measures and their use
