Race Class On Campus:

Race and Class Matters at an Elite College Elizabeth Aries, 2008-09-28 How race and class collide at a prestigious liberal arts college

Speaking of Race and Class Elizabeth Aries, Richard Berman, 2013 A sequel to the insightful *Race and Class Matters at an Elite College* that examines the challenges of diversity from freshman orientation to graduation

Diversity and Inclusion on Campus Rachele Winkle-Wagner, Angela M. Locks, 2019-10-21 This new and updated second edition of *Diversity and Inclusion on Campus Supporting Students of Color in Higher Education* provides an exploration of the range of college experiences from gaining access to higher education to successfully persisting through degree programs. By bridging research theory and practice related to the ways that peers, faculty, administrators, staff, and institutions can and do influence racially and ethnically diverse students' experiences, Winkle-Wagner and Locks examine how and why it is imperative to have an understanding of the issues that affect students of color in higher education. This new edition also includes features such as new case studies and examples throughout that allow readers to take institutional level and student level approaches to the chapter topics. Updated citations and theory across chapters. New topical coverage including discussion of college affordability, an exploration of a variety of institution types and the role of merit in maintaining and perpetuating racial inequality in higher education. End of chapter questions that encourage readers to explore chapter concepts in more detail. This second edition is an invaluable resource for future and current higher education and student affairs practitioners working towards full inclusion and participation for students of color in higher education.

Geographies of Campus Inequality Janel E. Benson, Elizabeth M. Lee, 2020-07-31 Uncovering the complex ways that first generation students sort themselves and are sorted into very different college worlds, Benson and Lee show that these experiences are deeply shaped by organizational practices and vary by class, race, and gender with both immediate and long term implications for climbing the socioeconomic ladder.

Clearing the Path for First-Generation College Students Bedelia Nicola Richards, Ashley C. Rondini, Nicolas P. Simon, 2018-06-07 *Clearing the Path for First Generation College Students* comprises a wide range of studies that explore the multidimensional social processes and meanings germane to the experiences of first generation college students before and during their matriculation into institutions of higher education. The chapters offer timely empirical examinations of the ways that these students negotiate experiences shaped by structural inequities in higher education institutions and the pathways that lead to them. This volume provides insight into the dilemmas that arise from the transformation of students' class identities in pursuit of upward mobility as well as their quest for community and a sense of belonging on college campuses that have not been historically designed for them. While centering first generation status, this collection also critically engages the ways in which other dimensions of social identity intersect to inform students' educational experiences in relation to dynamics of race, ethnicity, socioeconomic class, gender, and immigration. Additionally, this book takes a holistic approach by exploring the ways in which first generation college students

are influenced by and engage with their families and communities of origin as they undertake their educational careers

Intersectionality and Higher Education W. Carson Byrd, Rachelle J. Brunn-Bevel, Sarah M. Ovink, 2019-05-03 Though colleges and universities are arguably paying more attention to diversity and inclusion than ever before to what extent do their efforts result in more socially just campuses Intersectionality and Higher Education examines how race ethnicity class gender sexuality sexual orientation age disability nationality and other identities connect to produce intersected campus experiences Contributors look at both the individual and institutional perspectives on issues like campus climate race class and gender disparities LGBTQ student experiences undergraduate versus graduate students faculty and staff from varying socioeconomic backgrounds students with disabilities undocumented students and the intersections of two or more of these topics Taken together this volume presents an evidence backed vision of how the twenty first century higher education landscape should evolve in order to meaningfully support all participants reduce marginalization and reach for equity and equality

Why Students Resist Learning Anton O. Tolman, Janine Kremling, 2023-07-03 However personally committed faculty may be to helping students learn their students are not always as eager to participate in this endeavor and may react with both active and passive resistant behaviors including poor faculty evaluations The purpose of this book is to help faculty develop a coherent and integrated understanding of the various causes of student resistance to learning providing them with a rationale for responding constructively and enabling them to create conditions conducive to implementing effective learning strategies In this book readers will discover an innovative integrated model that accounts for student behaviors and creates a foundation for intentional and informed discussion evaluation and the development of effective counter strategies The model takes into account institutional context environmental forces students prior negative classroom experiences their cognitive development readiness to change and metacognition The various chapters take the reader through the model s elements exploring their practical implications for teaching whether relating to course design assessments assignments or interactions with students The book includes a chapter written entirely by students offering their insights into the causes of resistance and their reflections on how participating on this project has affected them While of great value for faculty this book is also useful to faculty developers advising future and current faculty as well as to administrators offering insight into how institutional values impact teaching practice and student attitudes

[The Impact of College Diversity](#) Elizabeth Aries, 2023-04-17 This book follows up with a cohort of graduates from a prestigious liberal arts college to evaluate the role their undergraduate education and especially their experiences encountering students from different racial and class backgrounds impacted their lives after graduation Social mobility workplace experience and civic relationships are considered

Rethinking College Student Development Theory Using Critical Frameworks Elisa S. Abes, Susan R. Jones, D-L Stewart, 2023-07-03 A major new contribution to college student development theory this book brings third wave theories to bear on this vitally important topic The first section includes a chapter that provides an overview of the evolution of student

development theories as well as chapters describing the critical and poststructural theories most relevant to the next iteration of student development theory. These theories include critical race theory, queer theory, feminist theories, intersectionality, decolonizing indigenous theories, and crip theories. These chapters also include a discussion of how each theory is relevant to the central questions of student development theory. The second section provides critical interpretations of the primary constructs associated with student development theory. These constructs and their related ideas include resilience, dissonance, socially constructed identities, authenticity, agency, context, development, consistency, coherence, stability, and knowledge sources of truth and belief systems. Each chapter begins with brief personal narratives on a particular construct; the chapter authors then re-envision the narrative's highlighted construct using one or more critical theories. The third section will focus on implications for practice. Specifically, these chapters will consider possibilities for how student development constructs re-envisioned through critical perspectives can be utilized in practice. The primary audience for the book is faculty members who teach in graduate programs in higher education and student affairs and their students. The book will also be useful to practitioners seeking guidance in working effectively with students across the convergence of multiple aspects of identity and development.

College Students' Experiences of Power and Marginality Elizabeth M.

Lee, Chaise LaDousa, 2015-03-27 As scholars and administrators have sharpened their focus on higher education beyond trends in access and graduation rates for underrepresented college students, there are growing calls for understanding the experiential dimensions of college life. This contributed book explores what actually happens on campus as students from an increasingly wide range of backgrounds enroll and share space. Chapter authors investigate how students of differing socioeconomic backgrounds, genders, and racial/ethnic groups navigate academic institutions alongside each other. Rather than treat diversity as mere difference, this volume provides dynamic analyses of how students come to experience both power and marginality in their campus lives. Each chapter comprises an empirical qualitative study from scholars engaged in cutting-edge research about campus life. This exciting book provides administrators and faculty new ways to think about students' vulnerabilities and strengths.

Is Affirmative Action Fair? Natasha Warikoo, 2022-09-23 Affirmative action in college admissions considering whether an applicant is part of an underrepresented group when making selection decisions has long been a topic of heated public debate Some argue that it undermines racial equity Others advocate for its ability to promote equal opportunity in a racially unequal society Who is right Natasha Warikoo dives into the arguments for and against a policy that has made it to the US Supreme Court many times She digs into the purposes of higher education and the selection process itself to argue that it is a mistake to equate college admissions with personal merit and reward College admissions should be based on furthering the mission of higher education contributing to our shared democracy and to the human condition Ultimately Warikoo concludes that a focus on individual fairness conceals much more important questions about justice No matter what their perspective readers will find themselves thinking anew and asking the deeper questions that underlie this emotive debate
