Distinct Identities Nadia E.

Brown, Sarah Allen Gershon, 2016-04-14 Minority women in the United States draw from their unique personal experiences born of their identities to impact American politics Whether as political elites or as average citizens minority women demonstrate that they have a unique voice that more often than not centers on their visions of justice equality and fairness In this volume Dr Nadia E Brown and Sarah Allen Gershon seek to present studies of minority women that highlight how they are similar and dissimilar to other groups of women or minorities as well as variations within groups of minority women Current demographic and political trends suggest that minority populations specifically minority women will be at the forefront of shaping U S politics Yet scholars still have very little understanding of how these populations will behave politically This book provides a detailed view of how minority women will utilize their sheer numbers collective voting behavior policy preferences and roles as elected officials to impact American politics The scholarship on intersectionality in this volume seeks to push beyond disciplinary constraints to think more holistically about the politics of identity **Race, Class, & Gender** Esther Ngang-ling Chow, Doris Wilkinson, Maxine Baca Zinn, 1996-05-21 Resource added for the Psychology includes Sociology 108091 courses *Handbook of the Psychology of Women and Gender* Rhoda K. Unger, 2004-04-21 A lively thought provoking exploration of the latest theory and practice in the psychology of women and gender Edited by Rhoda Unger a pioneer in feminist psychology this handbook provides an extraordinarily balanced in depth treatment of major contemporary theories trends and advances in the field of women and gender Bringing together contributions from leading U S and international scholars it presents integrated coverage of a variety of approaches ranging from traditional experiments to postmodern analyses Conceptual models discussed include those that look within the individual between individuals and groups and beyond the person to the social structural frameworks in which people are embedded as well as biological and evolutionary perspectives Multicultural and cross cultural issues are emphasized throughout including key variables such as sexual orientation race ethnicity and social class Researchers and clinicians alike will appreciate the thorough review of the latest thinking about gender and its impact on physical and mental health which includes the emerging trends in feminist therapy and sociocultural issues important in the treatment of women of color In addressing developmental issues the book offers thought provoking discussions of new research into possible biological influences on gender specific behaviors the role of early conditioning by parents school and the media the role of mother and mothering gender in old age and more Power and gender as well as the latest research findings on American men s ambivalence toward women sexual harassment and violence against women are among the timely topics explored in viewing gender as a systemic phenomenon *Handbook of the Psychology of Women and Gender* is must reading for mental health researchers and practitioners as well as scholars in a variety of disciplines who want to stay current with the latest psychological psychosocial thinking on women and gender **With and Without the White Coat** Lata Murti, 2014-12-15 This study examines the role of occupational status in the racialization of Indian physicians in Southern California Since the liberalization of U S

immigration policy in 1965 the number of first and second generation Indian doctors in the U S has grown to nearly seven percent of the nation s physician workforce however Indians constitute less than one percent of the total U S population Overrepresented in one of America s most prestigious professions Indians are more visible in U S medicine than in the U S at large Previous scholarship in immigration research Asian American Studies and the sociology of occupations has paid little attention to these professional non white immigrants and their racial experience in the U S Asian American Studies in particular has focused primarily on the racial ethnic identity formation of economically disadvantaged non white groups under the assumption that professional Asian Americans class status and occupations in the sciences effectively shield them from racist harm and preclude their engagement in racial politics This research shows that Indian doctors high occupational status and class privilege provide them only partial situational protection from racism They have what I call occupational citizenship access to most of the same rights and privileges as whites only when perceived as being both professionally successful and economically beneficial to the U S They are clearly marked as occupational citizens during clinical interactions with patients when they are in the white coat But outside of this context they are subject to racist treatment from colleagues staff health care institutions and the general public The particular forms of racism these doctors face as well as how they interpret this racism have as much to do with their gender immigrant generation and perception of others race and class as with their own professional class status These findings are based on fifty two interviews with first and second generation Indian doctors in Southern California as well as participant observation at the monthly meetings of two regional Indian medical associations I also observed seven Indian doctors at work noting their interactions with patients staff and colleagues Southern California represents an ideal case for understanding the racial formation of Indian physicians in the U S because of its large but dispersed population of established Indian physicians and its overall diversity of race ethnicity and class

Handbook of Parenting Marc H. Bornstein, 2005-02-16 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the *Handbook of Parenting* is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of characters responsible for parenting and is revealing of the psychological make ups and

social interests of those individuals Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking and theory as well as classic and modern research on that topic All chapters follow a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In addition to considering their own convictions and research the chapter contributors present and broadly interpret all major points of view and central lines of inquiry *From the Barrel of a Gun* Gerald Horne, 2001

Creating Subaltern Counterpublics A-gwi Sö, 2017 This is a study of a political and social movement instigated by older Korean women in Japan beginning in the 1990s Koreans in Japan have occupied an unique position among ethnic minority groups Until recently they constituted the largest group of foreign nationals yet they have been marginalized politically socially economically and culturally Korean women are doubly disadvantaged treated as inferior to men by both Korean and Japanese society Furthermore the first generation of Korean women migrants were not educated as children rendering them functionally illiterate and thus triply marginalized Late in life when family and work responsibilities became less onerous local authorities created educational opportunities which the women took up in unexpected numbers overloading the facilities The authorities responses effectively re marginalized them The elderly Korean women took a stance and in the process reconstituted themselves as social and political actors This book examines that self transformation process Series Japanese Society Series Subject Gender Studies Japanese Studies Korean Studies Migrant Studies

Postcolonial Representation of the African Woman in the Selected Works of Ngugi and Adichie Eren Bolat, 2022-03-07 Until the lives and issues of African women arrived on the agenda of postcolonial writers African women who continued their lives under double colonization by patriarchy and dominant powers did not have much standing in literary works and in the world of literature Postcolonial African women have often been represented as weak subaltern and speechless by western writers and have even been underrepresented by some postcolonial writers This book shows how the African woman who is usually represented in cliché and stereotyped forms is depicted a versatile way in Ngugi and Adichie's novels
