Drag Racing's Quarter-Mile Warriors II Doug Boyce, 2025-11-14 Drag racing fans have a fondness for the drag cars that

competed during the sport's golden era from the late 1950s through the 1970s. The cars were simpler to understand and in many classes were similar to cars that people saw on the street. A Pro Stock car in the early 1970s resembled a street car with big slicks and a massive engine. Today's Pro Stock cars look more like fighter jets than street cars. The newer cars just aren't as relatable as those from the past. With the evolution of technology and the sanctioning bodies constantly changing class rules, drag cars often don't last very long before they are no longer competitive or a sanctioning body has outlawed the tech that the car features. So what happens to all of these old race cars? Some sit in a shed, some are dismantled and parted out, and some still race in small events or vintage events across the country.

In *Drag Racing's Quarter Mile Warriors*, Volume II, prolific veteran drag racing author Doug Boyce chronicles even more of the most popular cars from the sport's golden era: Rail cars, Funny Cars, Altered Juniors, Stocks, and Super Stocks. All are covered here, more than 80 of them, in a then-and-now format. A blend of vintage and modern photos tell the story of the racing lives of these cars. [Muscle Car Source Book](#) Mike Mueller, 2015-12-15. *Muscle Car Source Book* is a muscle car buff's encyclopedia that chronicles the how's, why's, and when's of American muscle car manufacturers like Dodge, Plymouth, Ford, and more.

Drag Racing in the 1960s Doug Boyce, 2021-03-15. The 1960s were a fascinating decade on the race scene. Relive the memories today through this wonderful new book. Drag racing has a long and storied history. Many have said that the first drag race happened shortly after the second car was made. While that may or may not be true, racing prior to World War II was mostly centered around dry lake activities and top speed runs. After the war, drag racing became organized with the formation of the NHRA, and during the 1950s, many tracks were built across America to accommodate the racers. Technology in the 1950s centered on the manufacturers updating old flathead designs into newer overhead valve designs, and the horsepower race really started to heat up. In many forms of racing, the 1960s brought technological evolution. The decade began with big engines in even bigger stock chassis and ended with purpose-built race-only chassis, fiberglass bodies, fuel injection, nitro methane, and blowers. Quarter-mile times that were in the 13-second range in the beginning of the decade were in the 7-second range by the end. New classes were formed, dedicated cars were built for them, and many racers themselves became recognized names in the sports landscape.

In *Drag Racing in the 60s: The Evolution in Race Car Technology*, veteran author Doug Boyce takes you on a ride through the entire decade from a technological point of view rather than a results-based one. Covered are all the classes, including Super Stocks, Altered Wheelbase cars, which led to Funny Cars, Top Fuelers, Gassers, and more.
