Racing to the beginning of the road Robert A. Weinberg, 1997 **Racing to the Beginning of the Road** Robert A. Weinberg, 1999-01-01 **Making Cancer History** James S. Olson, 2009-04-13 The history of the M D Anderson Cancer Center vividly reveals how cancer treatment in America and our attitudes toward the disease has changed since the middle of the twentieth century One of the preeminent cancer centers in the world M D Anderson is also one of the first medical institutions devoted exclusively to caring for people with cancer and researching treatments and cures for the disease Historian James S Olson s narrative relates the story of the center s founding and of the surgeons radiologists radiotherapists nurses medical oncologists scientists administrators and patients who built M D Anderson into the world class institution it is today Through interviews with M D Anderson s leaders and patients Olson brings to life the struggle to understand and treat cancer in America A cancer survivor who has himself been treated at the center Olson imbues this history with humor passion and humanity Helen Valier **The Oxford Companion to the History of Modern Science** John L. Heilbron, 2003-02-14 Containing 609 encyclopedic articles written by more than 200 prominent scholars The Oxford Companion to the History of Modern Science presents an unparalleled history of the field invaluable to anyone with an interest in the technology ideas discoveries and learned institutions that have shaped our world over the past five centuries Focusing on the period from the Renaissance to the early twenty first century the articles cover all disciplines Biology Alchemy Behaviorism historical periods the Scientific Revolution World War II the Cold War concepts Hypothesis Space and Time Ether and methodologies and philosophies Observation and Experiment Darwinism Coverage is international tracing the spread of science from its traditional centers and explaining how the prevailing knowledge of non Western societies has modified or contributed to the dominant global science as it is currently understood Revealing the interplay between science and the wider culture the Companion includes entries on topics such as minority groups art religion and science s practical applications One hundred biographies of the most iconic historic figures chosen for their contributions to science and the interest of their lives are also included Above all The Oxford Companion to the History of Modern Science is a companion to world history modern in coverage generous in breadth and cosmopolitan in scope The volume s utility is enhanced by a thematic outline of the entire contents a thorough system of cross referencing and a detailed index that enables the reader to follow a specific line of inquiry along various threads from multiple starting points Each essay has numerous suggestions for further reading all of which favor literature that is accessible to the general reader and a bibliographical essay provides a general overview of the scholarship in the field Lastly as a contribution to the visual appeal of the Companion over 100 black and white illustrations and an eight page color section capture the eye and spark the imagination **Her-2** Robert Bazell, 2011-04-27 Two years after she underwent a mastectomy and chemotherapy Barbara Bradfield s aggressive breast cancer had recurred and spread to her lungs The outlook was grim Then she took part in Genentech s clinical trials for a new

drug Five years later she remains cancer free Her 2 is the biography of Herceptin the drug that provoked dramatic responses in Barbara Bradfield and other women in the trials and that offers promise for hundreds of thousands of breast cancer patients Unlike chemotherapy or radiation Herceptin has no disabling side effects It works by inactivating Her 2 neu a protein that makes cancer cells grow especially quickly produced by a gene found in 25 to 30 percent of all breast tumors Herceptin caused some patients cancers to disappear completely in others it slowed the progression of the disease and gave the women months or years they wouldn't otherwise have had Herceptin is the first treatment targeted at a gene defect that gives rise to cancer It marks the beginning of a new era of treatment for all kinds of cancers Robert Bazell presents a riveting account of how Herceptin was born Her 2 is a story of dramatic discoveries and strong personalities showing the combination of scientific investigation money politics ego corporate decisions patient activism and luck involved in moving this groundbreaking drug from the lab to a patient's bedside Bazell's deft portraits introduce us to the remarkable people instrumental in Herceptin's history including Dr Dennis Slamon the driven UCLA oncologist who played the primary role in developing the treatment Lily Tartikoff wife of television executive Brandon Tartikoff who tapped into Hollywood money and glamour to help fund Slamon's research and Marti Nelson who inspired the activists who lobbied for a compassionate use program that would allow women outside the clinical trials to have access to the limited supplies of Herceptin prior to FDA approval of the drug And throughout there are the stories of the heroic women with advanced breast cancer who volunteered for the trials risking what time they had left on an unproven treatment Meticulously researched written with clarity and compassion Her 2 is masterly reporting on cutting edge science

Explanation and Cognition Frank C. Keil, Robert Andrew Wilson, 2000 These essays address basic questions about explanation how do explanatory capacities develop are there kinds of explanation do explanations correspond to domains of knowledge why do we seek explanations and how central are causes to explanation

The Journey Through Cancer Dr. Jeremy Geffen, 2007-12-18 The Journey Through Cancer is an essential guide for all cancer patients their families and their loved ones As a board certified oncologist with more than ten years of experience serving as physician guide mentor coach and friend to thousands of cancer patients and their families Dr Jeremy Geffen has learned how cancer often challenges the mind heart and spirit of patients and their families as deeply if not more deeply than it challenges the physical body Yet this simple truth is often overlooked by Western medicine as it aggressively pursues the best ways to diagnose and treat cancer Too often physicians focus almost exclusively on the physical dimensions of the disease rather than caring for the whole person who has the disease Dr Geffen presents a groundbreaking seven level program used at his cancer center in Florida that addresses every dimension of the person with cancer physical mental emotional and spiritual Education and Information giving patients answers to questions about their disease and their treatment options Psychosocial Support focusing on the need for and benefits of a strong support network The Body as Garden exploring the vast array of alternative and complementary therapies Emotional Healing helping patients and families

deal with the often overwhelming emotional challenges of cancer

The Nature of Mind exploring how patients thoughts and beliefs profoundly influence their journey

Life Assessment showing patients how to discover their life s deepest meaning and purpose

The Nature of Spirit connecting patients to the profoundly healing spiritual aspect of life we all share

In The Journey Through Cancer Dr Geffen presents a revolutionary model of healing based on the best treatments available from every culture and paradigm of medicine one that respects and explores every possible avenue and resource for healing and transformation blending East and West body and mind heart and technology science and spirit

The \$800 Million Pill Merrill Goozner,2005-10-10 Goozner shows how drug innovation is driven by dedicated scientists intent on finding cures for diseases not by pharmaceutical firms whose bottom line often takes precedence over the advance of medicine

Stories of a university biochemist who spent twenty years searching for single blood protein that later became the best selling biotech drug in the world

a government employee who discovered the causes for dozens of crippling genetic disorders and the Department of Energy funded research that made the Human Genome Project possible these accounts illustrate how medical breakthroughs actually take place

Materials Matter Ken Geiser,2001-05-25 The products we purchase and use are assembled from a wide range of naturally occurring and manufactured materials But too often we create hazards for the ecosystem and human health as we mine process distribute use and dispose of these materials Until recently most research has focused on the waste end of material cycles This book argues that the safest and least costly point at which to avoid environmental damage is when materials are first designed and selected for use in industrial production

Materials Matter presents convincing evidence that we can use fewer materials and eliminate the use of many toxic chemicals by focusing directly on material chemical use when products are designed It also shows how manufacturers can save money by increasing the effectiveness of material use and reducing the use of toxic chemicals It advocates new directions for the material sciences and government policies on materials And it argues that manufacturers suppliers and customers need to set more socially responsible policies for products and services to achieve higher environmental and health goals

[How Scientists Explain Disease](#) Paul Thagard,2018-06-05 How do scientists develop new explanations of disease How do those explanations become accepted as true And how does medical diagnosis change when physicians are confronted with new scientific evidence These are some of the questions that Paul Thagard pursues in this pathbreaking book that develops a new integrative approach to the study of science Ranging through the history of medicine from the Hippocratic theory of humors to modern explanations of Mad Cow Disease and chronic fatigue syndrome Thagard analyzes the development and acceptance of scientific ideas At the heart of the book is a case study of the recent dramatic shift in medical understanding of peptic ulcers most of which are now believed to be caused by infection by the bacterium *Helicobacter pylori* When this explanation was first proposed in 1983 it was greeted with intense skepticism by most medical experts but it became widely accepted over the next decade Thagard discusses the psychological processes of

discovery and acceptance the physical processes involving instruments and experiments and the social processes of collaboration communication and consensus that brought about this transformation in medical knowledge How Scientists Explain Disease challenges both traditional philosophy of science which has viewed science as largely a matter of logic and contemporary science studies that view science as largely a matter of power Drawing on theories of distributed computing and artificial intelligence Paul Thagard develops new models that make sense of scientific change as a complex system of cognitive social and physical interactions This is a book that will appeal to all readers with an interest in the development of science and medicine It combines an engaging style significant research and a powerfully original argument **Politically Incorrect Guide to Science** Tom Bethell,2005-11-25 If the globe is warming is mankind responsible or is the sun Such a statement does not appear out of place in Bethell s entertaining account of how modern science is politically motivated and in desperate need of oversight Bethell writes in a compulsively readable style and although he provides legitimate insight into the potential benefits of nuclear power and hormesis some readers will be turned off when he attempts to disprove global warming and especially evolution Throughout the book Bethell makes questionable claims about subjects as varied as AIDS careful U S studies had already shown that at least a thousand sexual contacts are needed to achieve heterosexual transmission of the virus and extinction It is not possible definitely to attribute any given extinction to human activity and backs up his arguments with references to the music magazine SPIN and thriller writer Michael Crichton Ironically Bethell ends up proving his own premise by producing a highly politicized account of how liberal intellectuals and unchecked government agencies have created a white coated priesthood whose lust for grant money has driven them to produce fearsome but in Bethell s view false tales of ozone destruction and AIDS pandemics In the end this book is unlikely to sway readers who aren t already in Bethell s ideological camp as any points worthy of discussion get lost in the glut of unsourced claims that populate this latest installment of The Politically Incorrect Guide series *The Tao of Chemistry and Life* Eugene H. Cordes,2009-06-04 Chemistry underlies life This book establishes the relationship between the focal point of chemistry the molecule and the key characteristics of living organisms The key is the interactions between small molecules and macromolecules leading to metabolic control memory and learning the senses and drug action **The Truth in Small Doses** Clifton Leaf,2014-08-05 A decade ago Leaf a cancer survivor himself began to investigate why we had made such limited progress fighting this terrifying disease The result is a gripping narrative that reveals why the public s immense investment in research has been badly misspent why scientists seldom collaborate and share their data why new drugs are so expensive yet routinely fail and why our best hope for progress brilliant young scientists are now abandoning the search for a cure A to Z of Biologists Lisa Yount,2014-05-14 Profiles more than 150 scientists from around the world who made important contributions to the field of biology including Claude Bernard Alexander Fleming Mary Claire King Ronald Ross and Tetsuko Takabe **À la recherche de la mémoire** Éric Kandel, Eric R. Kandel,2007-05-16 Comment le cerveau cr e t il

nos souvenirs qui sont la chair même de notre vie mentale Il y a une cinquantaine d'années la simple idée qu'on pourrait expliquer la mémoire et d'autres aspects de l'esprit en termes biologiques semblait absurde Aujourd'hui c'est devenu une réalité Le prix Nobel Eric Kandel a joué un rôle important dans l'histoire de la biologie de l'esprit Il en retrace les grandes tapes et raconte comment la biologie la psychologie et les neurosciences ont convergé pour créer la science nouvelle de l'esprit si puissante d'aujourd'hui Il montre aussi comment cette fenêtre grande ouverte sur ce que sont la perception la pensée les motions et la mémoire laisse espérer de vrais progrès dans le soin d'affections comme la schizophrénie les troubles du vieillissement la dépression Sous sa plume lumineuse cette saga scientifique est aussi celle d'un homme un jeune Viennois contraint fuir le nazisme et qui devint ensuite l'un des maîtres de la neurobiologie sans jamais renier sa fascination pour la psychanalyse La science vue travers le prisme de toute une vie Personne d'autre n'aurait pu écrire ce livre Antonio R Damasio Talent et grâce un extraordinaire livre Elie Wiesel Un demi-siècle de neurosciences tourdissant Oliver Sacks Eric Kandel est professeur à l'Université Columbia directeur du Kavli Institute for Brain Sciences et chercheur au Howard Hughes Medical Institute Il a reçu le prix Nobel de physiologie et médecine en 2000 **Health Services Reports** ,1997 **Public Health Reports** ,1997

Cancer and the Search for Selective Biochemical Inhibitors E.J. Hoffman, 2007-06-25 The world of medicine has become splintered into two factions that of orthodoxy and its counterpart alternative or complementary medicine A problem with alternative medicine is of course that of anecdote and hearsay The solution the disclosure in an unassailable fashion of the underlying biochemical principles for alternative cancer therapy **Public Health Reports** ,1997
