Oxford Desk Reference - Major Trauma Jason Smith, Ian Greaves, Keith Porter, 2010-11-11. Text covers all the main areas of trauma care necessary for the trauma specialist in the 21st century. *Advanced Training in Anaesthesia* Jeremy Prout, Tanya Jones, Daniel Martin, 2014. Advanced Training in Anaesthesia is authored by both trainees and specialists in order to create an authoritative yet accessible text. Containing everything candidates need to know to pass this final major hurdle in anaesthetic training, this book is ideal for exam revision. Suggestions for further reading are included for candidates wishing to read around the subjects. Topics in applied basic science are presented in a systems based format as laid out in the syllabus set by the Royal College of Anaesthetists to allow for easy navigation and structured learning and revision. *Safe Transfer and Retrieval (STaR) of Patients* Advanced Life Support Group (ALSG), 2008-04-15. The safe transfer of all hospital patients, especially those who are critically ill, is of crucial importance, demanding organisational as well as clinical skills. *Safe Transfer and Retrieval of Patients* STaR is aimed at all health care workers involved with inter and intra hospital transfers. It provides a much needed structured approach to transfer medicine together with sound guidance on relevant clinical procedures. The second edition has been extensively revised in line with new developments in transfer medicine. The book has been redesigned with five distinct sections covering the principles of the STaR structured approach to transfers; the management of the transfer or retrieval; practical procedures related to transfer medicine; an overview of clinical care during the assessment and stabilisation phases of transfer; the legal and safety aspects of transfers; specific differences in helicopter transfers and transfers involving children. A new chapter on the infectious or contaminated patient has been added in light of current concerns around the potential transfer of infection between patients and staff. The major revisions to this STaR coursebook bring it into line with the latest thinking on patient transfers, making it an invaluable guide for anyone involved in this aspect of health care. **Pre-hospital Obstetric Emergency Training** Advanced Life Support Group (ALSG), 2009-10-30. The Pre hospital Obstetric Emergency Training POET programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy, including interpretation of patient held records and rapid assessment of the obstetric patient. It includes clear definitions and describes risk factors.

diagnosis and pre hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre hospital practitioner may attend. This text and the accompanying integrated on line and hands on course will help practitioners identify and manage a range of time critical obstetric emergencies specifically in the pre hospital setting and provides a structured examination and assessment technique as an aid to determining what treatments should be provided before transport as well as when and how urgently transport should be initiated. POET is of relevance to paramedics, ambulance staff, doctors and nurses working in the emergency pre hospital setting and to midwives facilitating home births. It will also be of considerable value to medical and nursing practitioners working in Emergency Departments and unscheduled care settings where immediate access to skilled obstetric assistance is not available.

Managing Obstetric Emergencies and Trauma Kate Grady, 2007-03. The Managing Obstetric Emergencies and Trauma MOET course teaches the practical skills and procedures needed to save the mother and fetus in life threatening circumstances. The course includes lectures, skills stations and workshops covering resuscitation of the mother and newborn including cardiopulmonary resuscitation, amniotic fluid embolism, pulmonary embolism and airway management, trauma including shock, spine and spinal cord injuries and musculoskeletal trauma, obstetric emergencies including pre eclampsia and eclampsia, shoulder dystocia, umbilical cord prolapse and anaesthetic emergencies and triage and transfer. The Manual provides readers with a structured preparation and revision system for the course. It provides essential anatomical, physiological and pathological information which the authors use to explain basic logical principles of resuscitation and treatment. Based on sound principles, this comprehensive handbook is easy to read and provides useful practical advice and management plans and will be of use to all those working in obstetrics as well as to course delegates.

Head Injury Peter C. Whitfield, 2009-04-09. A pragmatic and multi professional approach to the management of head injured patients. Covers epidemiology, experimental models, pathology, clinical examination, neuroimaging, trauma scoring, patient management including emergency department care, transfer of the patient, intensive care and surgical aspects, rehabilitation, paediatric head injury and finally medico legal issues.
