Construction History Construction Heritage Recent Construction Historiography Industrialization Engineering Sciences Building Materials Building Actors Construction History is still a fairly new and small but quickly evolving field The current trends in Construction History are well reflected in the papers of the present conference Construction History has strong roots in the historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well This is reflected in these conference

proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century. The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of Construction History. Papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences. The conference integrates perfectly into the daily work at the Institute for Preservation and Construction History at ETH Zurich. Its two chairs, the Chair for Building Archaeology and Construction History and the Chair for Construction Heritage and Preservation, endeavor to cover the entire field and to bridge the gaps between the different approaches, methodologies and disciplines between various centuries as well as technologies learning together and from each other. The proceedings of 8ICCH give a representative picture of the state of the art in the field and will serve as a reference point for future studies.

The Soundscape of Modernity Emily Thompson, 2004-09-17. A vibrant history of acoustical technology and aural culture in early twentieth century America. In this history of aural culture in early twentieth century America, Emily Thompson charts dramatic transformations in what people heard and how they listened. What they heard was a new kind of sound that was the product of modern technology. They listened as newly critical consumers of aural commodities. By examining the technologies that produced this sound as well as the culture that enthusiastically consumed it, Thompson recovers a lost dimension of the Machine Age and deepens our understanding of the experience of change that characterized the era. Reverberation equations, sound meters, microphones, and acoustical tiles were deployed in places as varied as Boston's Symphony Hall, New York's office skyscrapers, and the soundstages of Hollywood. The control provided by these technologies, however, was applied in ways that denied the particularity of place and the diverse spaces of modern America began to sound alike as a universal new sound predominated. Although this sound, clear, direct, efficient, and nonreverberant, had little to say about the physical spaces in which it was produced, it speaks volumes about the culture that created it. By listening to it, Thompson constructs a compelling new account of the experience of modernity in America.

Reforming America Jeffrey A. Johnson, 2017-03-20. Presenting a detailed look at the individuals, themes, and moments that shaped this important Progressive Era in American history, this valuable reference spans 25 years of reform and provides multidisciplinary insights into the period. During the Progressive Era, influential thinkers and activists made efforts to improve U.S. society through reforms both legislative and social on issues of the day such as working conditions of laborers, business monopolies, political corruption, and vast concentrations of wealth in the hands of a few. Many Progressives hoped for and tirelessly worked toward a day when all Americans could take full advantage of the economic and social opportunities promised by U.S. society. This two-volume work traces the issues, events, and individuals of the Progressive Era from approximately 1893 to 1920. The entries and primary sources in this set

are grouped thematically and cover a broad range of topics regarding reform and innovation across the period with special attention paid to important topics of race class and gender reform and reformers The volumes are helpfully organized under five categories work and economic life social and political life cultural and religious life science literature and the arts and sports and popular culture
