A New English Music Tim Rayborn, 2016-04-27 The turn of the 20th century was a time of great change in Britain The empire saw its global influence waning and its traditional social structures challenged There was a growing weariness of

industrialism and a desire to rediscover tradition and the roots of English heritage A new interest in English folk song and dance inspired art music which many believed was seeing a renaissance after a period of stagnation since the 18th century This book focuses on the lives of seven composers Ralph Vaughan Williams Gustav Holst Ernest Moeran George Butterworth Philip Heseltine Peter Warlock Gerald Finzi and Percy Grainger whose work was influenced by folk songs and early music Each chapter provides an historical background and tells the fascinating story of a musical life *Symphony no. 2 in D Minor, op. 24 ("Jullien")* George Frederick Bristow, 2011-01-01 URL <https://www.areditions.com/rrrra/a072.html> George Frederick Bristow 1825-98 American composer conductor teacher and performer was a pillar of the New York musical community for the second half of the nineteenth century His participation in an important mid century battle of words between William Henry Fry and the journalist Richard Storrs Willis and concerning a lack of support for American composers by the Philharmonic Society has unfortunately overshadowed his accomplishments as a composer which were significant Bristow is remembered today primarily for his opera *Rip van Winkle* 1855 and oratorio *Daniel* 1866 but he was also a skillful and productive composer of orchestral music one of only a handful of American orchestral composers active at mid century Bristow wrote his *Symphony no. 2 Jullien* in 1853 It is a substantial work in four movements scored for the standard orchestra of the early nineteenth century and strongly influenced by the personal styles of Beethoven and Mendelssohn whose works were performed regularly by the Philharmonic Society The symphony is skillfully crafted melodious and an intrinsically worthy work of musical artistry It was named to honor the French conductor Louis Jullien who visited the United States in 1853-54 with an unparalleled orchestra While in the United States Jullien both commissioned and performed American works including this symphony his support served as the catalyst for the Fry-Willis battle The introductory essay to this symphony examines Bristow's career the composition of orchestral music in America at mid century and Jullien's role in the musical battle the edition makes available for the first time an important work that has been undeservedly forgotten for over 150 years

iTake-Over David Arditi, 2014-12-11 *iTake Over The Recording Industry in the Digital Era* sheds light on the way large corporations appropriate new technologies related to recording and distribution of audio material to maintain their market dominance in a capitalist system All too commonly scholars have asserted too confidently how the rise and reign of digital music has diminished the power of major record labels In *iTake Over* music scholar David Arditi argues otherwise adopting a broader perspective by examining how the recording industry has strengthened copyright laws for their corporate ends at the expense of the broader public good which has traditionally depended on the safe harbor of fair use Arditi also challenges the dominant discourse over digital music distribution which has largely adopted the position that the recording industry has a legitimate claim to profitability at the detriment of a shared culture *iTake Over* more specifically surveys the actual material effects that digital distribution has had on the industry Most notable among these is how major record labels find themselves in a stronger financial position today in the music industry than they were before the launch of Napster Arditi contends that this is largely because of reduced production and distribution costs and the steady gain in digital music sales Moreover instead of merely trying to counteract the phenomenon of digital distribution the RIAA and the major record labels embraced and then altered the distribution system Throughout the 1990s and early 2000s the RIAA lobbied for legislation built technologies and waged war in the courts in order to shape the digital environment for music distribution From mp3s to the Digital Millennium Copyright Act DMCA from the Audio Home Recording Act AHRA to iTunes the major record labels and the RIAA instead of trying to torpedo the switch to digital distribution engineered it to their benefit often at the expense of the public interest Throughout Arditi boldly asserts that the sea change to digital music did not destroy the recording industry Rather it stands as a testament to the recording industry's successful management of this migration to digital production and distribution As such this work should appeal to musicians and music scholars political scientists and sociologists technologists and audio professionals seeking to grasp this remarkable change in music production and consumption

Figures of the Imagination Roger Hansford, 2017-03-16 This new study of the intersection of romance novels with vocal music records a society on the cusp of modernisation with a printing industry emerging to serve people's growing appetites for entertainment amidst their changing views of religion and the occult. No mere diversion, fiction was integral to musical culture and together both art forms reveal key intellectual currents that circulated in the early nineteenth century British home and were shared by many consumers. Roger Hansford explores relationships between music produced in the early 1800s for domestic consumption and the fictional genre of romance, offering a new view of romanticism in British print culture. He surveys romance novels by Ann Radcliffe, Matthew Lewis, Sir Walter Scott, James Hogg, Edward Bulwer, and Charles Kingsley in the period 1790-1850, interrogating the ways that music served to create mood and atmosphere, enlivened social scenes, and contributed to plot developments. He explores the connections between musical scenes in romance fiction and the domestic song literature, treating both types of source and their intersection as examples of material culture. Hansford's intersectional reading revolves around a series of imaginative figures, including the minstrel, fairies, mermaids, ghosts, and witches, and Christians engaged both in virtue and vice, the identities of which remained consistent as influence passed between the art forms. While romance authors quoted song lyrics and included musical descriptions and characters, their novels recorded and modelled the performance of songs by the middle and upper classes, influencing the work of composers and the actions of performers who read romance fiction.
