Race And Ethnicity In The Us:

Constructing Race and Ethnicity in America Dvora Yanow,2015-02-18 What do we mean in the U S today when we use the terms race and ethnicity What do we mean and what do we understand when we use the five standard race ethnic categories White Black Asian Native American and Hispanic Most federal and state data collection agencies use these terms without explicit attention and thereby create categories of American ethnicity for political purposes Davora Yanow argues that race and ethnicity are socially constructed concepts not objective scientifically grounded variables and do not accurately represent the real world She joins the growing critique of the unreflective use of race and ethnicity in American policymaking through an exploration of how these terms are used in everyday practices Her book is filled with current examples and analyses from a wealth of social institutions health care education criminal justice and government at all levels The questions she raises for society and public policy are endless Yanow maintains that these issues must be addressed explicitly publicly and nationally if we are to make our policy and administrative institutions operate more effectively

Race, Ethnicity, and Language Data Institute of Medicine, Board on Health Care Services, Subcommittee on Standardized Collection of Race/Ethnicity Data for Healthcare Quality Improvement, 2009-12-30 The goal of eliminating disparities in health care in the United States remains elusive Even as quality improves on specific measures disparities often persist Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race ethnicity and language data Then attention can be focused on where interventions might be best applied and on planning and evaluating those efforts to inform the development of policy and the application of resources A lack of standardization of categories for race ethnicity and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data Race Ethnicity and Language Data identifies current models for collecting and coding race ethnicity and

language data reviews challenges involved in obtaining these data and makes recommendations for a nationally standardized approach for use in health care quality improvement

Race and Ethnicity Raymond Scupin, **The American Kaleidoscope** Lawrence H. Fuchs, 2012-01-01 Winner of the John Hope Franklin Prize 1991 Winner of the Theodore Saloutos Award from the Immigration History Society 1993 Do recent changes in American law and politics mean that our national motto e pluribus unum is at last becoming a reality Lawrence H Fuchs searches for answers to this question by examining the historical patterns of American ethnicity and the ways in which a national political culture has evolved to accommodate ethnic diversity Fuchs looks first at white European immigrants showing how most of them and especially their children became part of a unifying political culture He also describes the ways in which systems of coercive pluralism kept persons of color from fully participating in the civic culture He documents the dismantling of those systems and the emergence of a more inclusive and stronger civic culture in which voluntary pluralism flourishes In comparing past patterns of ethnicity in America with those of today Fuchs finds reasons for optimism Diversity itself has become a unifying principle and Americans now celebrate ethnicity One encouraging result is the acculturation of recent immigrants from Third World countries But Fuchs also examines the tough issues of racial and ethnic conflict and the problems of the ethno underclass the new

outsiders The American Kaleidoscope ends with a searching analysis of public policies that protect individual rights and enable ethnic diversity to prosper Because of his lifelong involvement with issues of race relations and ethnicity Lawrence H Fuchs is singularly qualified to write on a grand scale about the interdependence in the United States of the unum and the pluribus His book helps to clarify some difficult issues that policymakers will surely face in the future such as those dealing with immigration language and affirmative action
