The Racial Elements of European History Hans F. K. Günther, 1927 **The Racial Elements of European History**

Hans F. K. Gunther, 2017-08-17 This long suppressed work by one of Germany's foremost racial thinkers was first published in English in 1927. The author, an unabashed Nordacist, provides a remarkable oversight of the concept of race, defines five different European races and discusses their physical and mental characteristics. He then discusses non-European racial influences in Europe, the effect of environment, inheritance and racial mixture, before moving into an outline of the distribution of these races. The longest part of the book is taken up with a fascinating and referenced overview of European racial history with a strong emphasis on the role played by the Nordic subgroup. Finally, he looks at the future racial situation in Europe. Although this book displays the Nordacist sentiment so common at the time, it contains many eye-opening revelations and theories, including the claim that the original homeland of the Nordic race was North Western Europe and that Sweden is the most Nordic country on earth, whereas Germany, the author's home, was only 55% Nordic at time of writing. This is a fascinating historical document and provides a remarkable insight into pre-World War II German racial thought. Over 300 illustrations and maps highlight racial types and historical events.

Hans Friedrich Karl Gunther 1861-1968 taught at the universities of Jena, Berlin and Freiburg, writing numerous books and essays on racial theory. In 1931 he was appointed to a new chair of racial theory at Jena and in 1935 became professor at the University of Berlin, teaching race science, human biology and rural ethnography. From 1940 to 1945 he was the professor at Albert-Ludwigs University. After World War II, Gunther interned for three years before being released without charge. After the war, he continued to publish on eugenics and race.

by G. C. Wheeler Hans F. K. Gunther, 1927 *The Racial Elements of European History ... Translated from the Second German Edition by G.C. Wheeler. With 368 Portraits, Etc* Hans Friedrich Karl GUENTHER, Gerald Clair William Camden WHEELER, 1927 National-Socialist Archaeology in Europe and its Legacies Martijn Eickhoff, Daniel Modl, Katie Meheux, Erwin Nuijten, 2023-08-14 This edited volume is dedicated to national socialist archaeology as a Europe wide phenomenon It analyses national socialist attempts to denationalize the archaeologies of European nations by creating a new unifying European archaeology on a racial basis From the beginning of the nineteenth century archaeology began to develop into an important force behind processes of nation building At the same time structures of transnational academic collaboration contributed strongly to the internal dynamics of the research field which was primarily organized on a national basis In those European countries that were confronted with national socialist occupation and repression between 1939 and 1945 these transnational archaeological networks were to prove crucial for the development of national socialist archaeological policies This volume will reveal how national socialist archaeology was to an extent valued positively in its time as highly innovative even influencing the archaeology of non occupied countries Although in the final instance it generally failed to displace the national archaeologies in Europe the volume also analyses the long term impact of national socialist rule on the development of European archaeology How did the attempts to create a unified European archaeology after 1945 continue to influence networks methods and terminologies institutional structures or popular representations of the early past Chapter 1 Is available open access under a Creative Commons Attribution 4.0 International License via Springerlink

The Archaeology of Race Debbie Challis, 2013-03-14 How much was archaeology founded on prejudice The Archaeology of Race explores the application of racial theory to interpret the past in Britain during the late Victorian and Edwardian period It investigates how material culture from ancient Egypt and Greece was used to validate the construction of racial hierarchies Specifically focusing on Francis Galton's ideas around inheritance and race it explores how the Egyptologist Flinders Petrie applied these in his work in Egypt and in his political beliefs It examines the professional networks formed by societies such as the Anthropological Institute and their widespread use of eugenic ideas in analysing society Archaeology of Race draws on archives and objects from the Petrie Museum of Egyptian Archaeology and the Galton collection at UCL These collections are used to explore anti-Semitism skull collecting New Race theory and physiognomy These collections give insight into the relationship between Galton and Petrie and place their ideas in historical context

The Emotions of Internationalism Ilaria Scaglia, 2020 By examining a broad range of individuals and institutions engaged in international cooperation in the Alps in the 1920s and 1930s this book explains how internationalists constructed and used emotions to attain their goals It undertakes a journey through the most diverse terrains and venues from the international art exhibitions and congresses organized by the Union Internationale des Associations d'Alpinisme also known as UIAA or the International Mountaineering and Climbing Federation to the summer camps and schools run by transnational

bodies such as the League for Open Air Education to the international sanatoria for students workers and soldiers healing from tuberculosis in the Swiss village of Leysin Along the way this study encounters a broad spectrum of state and non state actors involved a variety of cross border endeavors from large scale infrastructure projects akin to the tunnel under the Mont Cenis to the League of Nations and its propaganda efforts to the plethora of smaller international organizations emulating the League s work in fields as diverse as leisure health and education Through this metaphorical travel this book thus argues that starting from the nineteenth century and accelerating in the interwar years emotions became a fundamental feature of internationalism shaped its development and constitute an essential dimension of international history to this day **Race**

in North America Audrey Smedley,2018-04-20 This sweeping work traces the idea of race for more than three centuries to show that race is not a product of science but a cultural invention that has been used variously and opportunistically since the eighteenth century Updated throughout the fourth edition of this renowned text includes a compelling new chapter on the health impacts of the racial worldview as well as a thoroughly rewritten chapter that explores the election of Barack Obama and its implications for the meaning of race in America and the future of our racial ideology Histories of

Egyptology William Carruthers,2014-07-11 Histories of Egyptology are increasingly of interest to Egyptologists archaeologists historians and others Yet particularly as Egypt undergoes a contested process of political redefinition how do we write these histories and what or who are they for This volume addresses a variety of important themes the historical involvement of Egyptology with the political sphere the manner in which the discipline stakes out its professional territory the ways in which practitioners represent Egyptological knowledge and the relationship of this knowledge to the public sphere Histories of Egyptology provides the basis to understand how Egyptologists constructed their discipline Yet the volume also demonstrates how they construct ancient Egypt and how that construction interacts with much wider concerns of society and of the making of the modern world *Picture Imperfect* Anne Maxwell,2010-03-11 Analyses the photographs

that helped strengthen as well as bring down the Eugenics Movement Concentrating mainly on developments in Britain the USA and Nazi Germany this book argues that photography as the most powerful visual medium of the late nineteenth and early twentieth centuries was vital to the Eugenics Movement s success *Embodied Collective Memory* Rafael F.

Narváez,2013 The human body is not a given fact it is not as Descartes believed a machine made up of flesh and bones The body is acquired achieved and learned It is thus full of mimetic and mnemonic implications The body remembers and it does so in collectively relevant ways Gestures corporeal and phonetic rhythms affective idioms and emotional styles perceptual sensorial motoric and affective schemata are all largely learned in shared social contexts These aspects of the embodied experience are often consigned to habit to bodily automatisms and to corporeal memories that reflect aspects of culture But if the body reflects certain aspects of culture that press to become naturalized and organically attached to social actors it also resists these kinds of cultural pressures These adaptive and resistive dynamics as this book shows are not without

consequences for individuals and groups These processes can result in both advantages and disadvantages for social actors They can take us toward certain futures while foreclosing others It is therefore necessary to understand how why and to what extent corporeal memories are constructed but also resisted modified or created anew *American Eugenics* Nancy Ordover, 2003 Traces the history of eugenics ideology in the United States and its ongoing presence in contemporary life The Nazis may have given eugenics its negative connotations but the practice and the science that supports it is still disturbingly alive in America in anti immigration initiatives the quest for a gay gene and theories of collective intelligence Tracing the historical roots and persistence of eugenics in the United States Nancy Ordover explores the political and cultural climate that has endowed these campaigns with mass appeal and scientific legitimacy *American Eugenics* demonstrates how biological theories of race gender and sexuality are crucially linked through a concern with regulating the unfit These links emerge in Ordover's examination of three separate but ultimately related American eugenics campaigns early twentieth century anti immigration crusades medical models and interventions imposed on and sometimes embraced by lesbians gays transgendered people and bisexuals and the compulsory sterilization of poor women and women of color Throughout her work reveals how constructed notions of race gender sexuality and nation are put to ideological uses and how faith in science can undermine progressive social movements drawing liberals and conservatives alike into eugenics based discourse and policies [The Myth of Race](#) Robert Wald Sussman, 2014-10-06 Although eugenics is now widely discredited some groups and individuals claim a new scientific basis for old racist assumptions Pondering the continuing influence of racist research and thought despite all evidence to the contrary Robert Sussman explains why when it comes to race too many people still mistake bigotry for science
