Reactors International Atomic Energy Agency, 2023-04-30 This Safety Guide considers the application of a graded approach throughout the lifetime of a research reactor site evaluation design construction commissioning operation and preparation for decommissioning including utilization and experiments that are specific features of research reactor operation A major aspect of this Safety Guide involves the use of a graded approach in the application of the safety requirements for the design

and operation of research reactors so that the fundamental safety objective to protect people and the environment from harmful effects of ionizing radiation is achieved. It is intended for use by operating organizations, regulatory bodies and other organizations involved in the design, construction and operation of research reactors. This Safety Guide is a revision of IAEA Safety Standards Series No SSG 22 which it supersedes.

Commissioning of Research Reactors, 2006. This Safety Guide provides recommendations for the commissioning of research reactors on the basis of international best practices. The guidance and recommendations of this Safety Guide are applicable to most types of research reactors and fulfil the general requirements on research reactor safety presented in IAEA Safety Standards Series No NS R 4, Safety of Research Reactors, as well as those in Safety Series No 35 G1, Safety Assessment of Research Reactors and Preparation of the Safety Analysis Report. Commissioning is one of the major steps in the life cycle of a research reactor and appropriate guidance for conducting the process is essential. The emphasis in this Safety Guide is on the commissioning of a new research reactor but guidance is also provided on the commissioning of new experiments and of reactor modifications.

Safety in the Utilization and Modification of Research Reactors, IAEA, 2022-09-01. This Safety Guide is a revision of IAEA Safety Standards Series No SSG 24 which it supersedes. The current publication provides recommendations on how to meet the applicable safety requirements relating to the utilization and modification of research reactors. The recommendations focus on the categorization, safety assessment and approval of research reactor experiments and modification projects. The publication also incorporates the relevant lessons learned from the accident at the Fukushima Daiichi nuclear power plant and elaborates on interfaces between nuclear safety and nuclear security. Specific safety considerations in different phases of utilization and modification projects are covered, including pre implementation, implementation and post implementation phases. Guidance is given on operational safety of experiments, including the handling, dismantling, post irradiation examination and disposal of experimental devices. The publication is intended to be of use to individuals within the operating organizations of research reactors, regulatory bodies as well as the experimenters, technical support organizations and other persons involved in utilization and modification projects.

Safety Assessment for Research Reactors and Preparation of the Safety Analysis Report, IAEA, 2022-08-24. This Safety Guide provides recommendations on the safety assessment for research reactors in the authorization process and on performance of safety analysis and preparation of the safety analysis report. It also incorporates the relevant lessons learned from the accident at the Fukushima Daiichi nuclear power plant and elaborates guidance on interfaces between nuclear safety and nuclear security. The recommendations in this Safety Guide are intended for operating organizations of research reactors; it can also be used by designers performing a safety assessment for a research reactor. Furthermore, this guide provides useful guidance for regulatory bodies performing a review and assessment of submitted safety analysis reports as an important document within the authorization process. This Safety Guide is a revision of IAEA Safety Standards Series No SSG 20 which it supersedes.
