Sailing With Flinders The Journal Of Sammual Smith Seaman:

Sailing with Flinders Samuel Smith, 2002-04-01 *Australia Circumnavigated. The Voyage of Matthew Flinders in HMS Investigator, 1801-1803 / Volume II* Kenneth Morgan, 2020-02-06 This two volume work provides the first edited publication of Matthew Flinders's fair journals from the circumnavigation of Australia in 1801-1803 in HMS Investigator and of the Memoir he wrote to accompany his journals and charts. These are among the most important primary texts in Australian maritime history and European voyaging in the Pacific. Flinders was the first explorer to circumnavigate Australia. He was also largely responsible for giving Australia its name. His voyage was supported by the Admiralty, the Navy Board, the East India Company and the patronage of Sir Joseph Banks, President of the Royal Society. Banks ensured that the Investigator expedition included scientific gentlemen to document Australia's flora, fauna, geology and landscape features. The botanist Robert Brown, botanical painter Ferdinand Bauer, landscape artist William Westall and the gardener Peter Good were all members of the voyage. After landfall at Cape Leeuwin, Flinders sailed anti-clockwise round the whole continent, returning to Port Jackson when the ship became unseaworthy. After a series of misfortunes, including a shipwreck and a long detention at the Ile de France (now Mauritius), Flinders returned to England in 1810. He devoted the last four years of his life to preparing *A Voyage to Terra Australis*, published in two volumes and an atlas. Flinders died on 19 July 1814 at the age of forty. The fair journals edited here comprise a daily log with full nautical information and remarks on the coastal landscape, the achievements of previous navigators in Australian waters, encounters with Aborigines and Macassan trepangers, naval routines, scientific findings and Flinders's surveying and charting. The journals also include instructions for the voyage and some additional correspondence. The Memoir explains Flinders's methodology in compiling his journals and charts and the purpose and content of his surveys.

Matthew Flinders, Maritime Explorer of Australia Kenneth Morgan, 2016-03-24 This book provides a thoroughly researched biography of the naval career of Matthew Flinders with particular emphasis on his importance for the maritime discovery of Australia. Sailing in the wake of the 18th century voyages of exploration by Captain Cook and others, Flinders was the first naval commander to circumnavigate Australia's coastline. He contributed more to the mapping and naming of places in Australia than virtually any other single person. His voyage to Australia on HMS Investigator expanded the scope of imperial geographical and scientific knowledge. This biography places Flinders's career within the context of Pacific exploration and the early white settlement of Australia. Flinders's connections with other explorers, his use of patronage, the dissemination of his findings and his posthumous reputation are also discussed in what is an important new scholarly work in the field.

[Alas, for the Pelicans](#) Anne Chittleborough, 2002 In 1802 a Frenchman and an Englishman famously encountered each other off the shores of South Australia. The voyages of discovery of Nicolas Baudin and Matthew Flinders opened the way for the increasingly rapid colonisation of Terra Australis.

The Great Race David Hill, 2014-07-03 On the afternoon of 8 April 1802 in the remote southern ocean, two explorers had a remarkable chance

encounter Englishman Matthew Flinders and Frenchman Nicolas Baudin had been sent by their governments on the same quest to explore the uncharted coast of the great south land and find out whether the west and east coasts four thousand kilometres apart were part of the same island And so began the race to compile the definitive map of Australia These men s journeys were the culmination of two hundred years of exploration of the region by the Dutch most famously Abel Tasman the Portuguese the Spanish and by Englishmen such as the colourful pirate William Dampier and of course James Cook The three year voyages of Baudin and Flinders would see them endure terrible hardships in the spirit of discovery They suffered scurvy and heat exhaustion and Flinders was shipwrecked and imprisoned always knowing he was competing with the French to produce the first map of this mysterious continent Written from diaries and other first hand accounts this is the thrilling story of men whose drawings recorded countless previously unknown species and turned mythical creatures into real ones and whose skill and determination enabled Terra Australis Incognita to become Australia **Science, Voyages, and**

Macassan History and Heritage Marshall Clark, Sally May, 2013-06-01 This book presents interdisciplinary perspectives on the maritime journeys of the Macassan trepangers who sailed in fleets of wooden sailing vessels known as praus from the port city of Makassar in southern Sulawesi to the northern Australian coastline These voyages date back to at least the 1700s and there is new evidence to suggest that the Macassan praus were visiting northern Australia even earlier This book examines the Macassan journeys to and from Australia their encounters with Indigenous communities in the north as well as the ongoing social and cultural impact of these connections both in Indonesia and Australia
