on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope. [Maeve Brennan](#) Edward O'Rourke, 2024-10-30. This book explores the intricate interplay between physical spaces and psychological landscapes in the works of Irish American author Maeve Brennan. Brennan's writing is now classed amongst the most important of twentieth-century Irish women's fiction, having undergone a significant reclamation and reappraisal in the 30 years since her death. Single and childfree for most of her life, Brennan eschewed the securities of family and home, experiencing an otherness that she shared with her fellow New Yorkers: many of them left, she wrote, hanging on to a city half capsized; most of them still able to laugh as they

cling to the island that is their life's predicament. It is a suitably ambiguous expression for a writer who cultivated an interstitial existence whose stories inhere within a dream cycle of reiterative pasts and whose works augment and elevate the canon of radical Irish fiction.
