Restoring the Foundations of Epistemic Justification Steven Porter, 2006-11-06 Foundationalism as a theory of justification and knowledge is often associated with Enlightenment rationality the Cartesian thirst for certainty and the modern assumption of the objectivity and universality of reason Because of these associations scholars in various fields have disdained foundationalism in favor of some sort of non foundationalist post modern approach to knowledge and justification This present book is one piece of a much wider conversation that hopes to motivate a renewed look at foundationalism Of course the foundationalism on offer has settled down quite a bit from its surly forbears This more mild mannered foundationalism suggests that our beliefs about reality can be held with confidence and yet these beliefs remain open to criticism and revision It is this type of epistemology that provides a constructive basis for investigation and research while nevertheless encouraging a cognitive humility about our claims to possess truth

Postmodernism And Social Inquiry David R. Dickens, Andrea Fontana, 2015-03-24 First published in 1994 Routledge is an imprint of Taylor Francis an informa company

America Goes to College John E. Seery, 2012-02-01 A rallying cry on behalf of a distinctly American institution of higher learning the small liberal arts college America Goes to College combines broad based scholarship with personal narrative and reflection In a highly entertaining manner John E Seery showcases the precarious successes of a well rounded liberal arts college education while at the same time signaling some of the dangers that loom on the horizon Seery contends that the liberal arts are best pursued within the face to face interactive setting characteristic of the small college classroom as opposed to the large university lecture hall

Moreover and more provocatively he identifies political theorists as the proper custodians and practitioners of the liberal arts tradition as it unfolds today It is the unfettered freedom of the small liberal arts college where vision and practice can actually coincide that makes it the embodiment of the advantages of the American higher education system a national treasure deserving of support

Radical Otherness Lisa Isherwood,David Harris,2014-10-20 The problem of otherness is central to debates in both the social sciences and theology To define the other by colour gender politics nationality or religion is to define the self Othering has been used through history as a justification for boundary setting for conflict and for oppression Radical Otherness presents a broad overview of otherness in both sociology and theology The book reveals how social theory can illuminate many contemporary issues in theology whilst the examination of theological methods can shed light on problematic issues in sociology The discussion of issues in Radical Otherness moves from the personal to the political to the hermeneutic to the ultimate otherness of metaphysics At each stage discussion of theory is grounded in concrete examples The book offers students of ethics theology and sociology of religion a clear and engaged assessment of otherness and opens up new ways for investigating a concept central to the study of both religion and society

 Stewart Clegg UTS Sydney **Migrants and Race in the US** Philip Kretsedemas,2013-10-23 This book explains how migrants can be viewed as racial others not just because they are nonwhite but because they are racially alien This way of seeing makes it possible to distinguish migrants from a set of racial categories that are presumed to be indigenous to the nation In the US these indigenous racial categories are usually defined in terms of white and black Kretsedemas explores how this kind of racialization puts migrants in a quandary leading them to be simultaneously raced and situated outside of race Although the book focuses on the situation of migrants in the US it builds on theories of migrants and race that extend beyond the US and makes a point of criticizing nation centered explanations of race and racism These arguments point toward the emergence of a new field visibility that has transformed the racial meaning of nativity migration and migrant ethnicity It also situates these changing views of migrants in a broader historical perspective than prior theory explaining how they have been shaped by a changing relationship between race and territory that has been unfolding for several hundred years and which crystallizes in the late colonial era *Perspectives in Sociology* E.C.
