Monkey Business A Scientist Looks At Creationism:

The Monkey Business Niles Eldredge, 1982 Creationism on Trial Langdon Gilkey, Langdon Brown Gilkey, 1998 On the author's role as an expert witness for the ACLU in the creationist trial regarding Arkansas Act 590 of 1981 in Little Rock Arkansas Dec 1981 Creationism and Anti-Creationism in the United States Tom Kaden, 2018-09-20 This book deals with professional creationist and anti creationist organizations in America and describes how the conflict between science and religion is the result of the interaction between these two groups It retraces their history from the 1960s onwards and identifies crucial turning points that led to new forms of creationism and anti creationism It explains their strategies labels and arguments as effects of this history and structure Taking a field theoretical approach the book avoids problems of prior creationism research making it possible to identify the mechanisms through which creationism generates new strategies arguments and media output The field model is used as an interpretive tool to make sense of some of the most important creationist and anti creationist publications and media statements **The Creation/Evolution Controversy** Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology *For the Rock Record* Jill S. Schneiderman, Warren D. Allmon, 2009 Creationism began with the fossil record and there it shall end Before Darwin the geological strata with their accompanying fossils formed the first geological theory of life on earth creationism coupled to flood geology It was Darwin who stood that theory on its head and showed that in fact these same fossils could be used to support his new theory of evolution by natural selection Ever since Darwin geology has unequivocally supported evolution and not creationism and yet today Intelligent Design thrives in popular culture Here at last we have a definitive collection of world class geologists and paleontologists who systematically

demonstrate precisely why geology destroys all design arguments and reveals instead a deep and rich history of life on earth

A perfect companion to all science courses Michael Shermer publisher of Skeptic magazine and author of Why Darwin Matters An excellent contribution on a vital issue which concerns not only geologists but all who value any science Mark Isaak author of The Counter Creationism Handbook Evolution and the Myth of Creationism Tim M. Berra,1990 Gives a description of evolutionary theory and analyzes the arguments of the creationists *Impeaching Mere Creationism* Philip Frymire,2000 Creationism has made a comeback recently by becoming supposedly more sophisticated There is however nothing new in the arguments of recent intelligent design creationists There is no substance to their claims and evolutionary biologists do not take them seriously Nevertheless creationists have recently made news by stealthily taking over the Kansas State Board of Education and the Oklahoma State Textbook Committee They have used this power to remove evolution from the science standards in Kansas and to require that textbooks used in Oklahoma include an evolution disclaimer Similar efforts are being made in many states Creationists often use the arguments of the apparent leader of the new creationism University of California at Berkeley law professor Phillip E Johnson Johnson has written several books aimed at the general public which are highly critical of Darwinism *Impeaching Mere Creationism* provides a concise non technical common sense rebuttal to the claims of Johnson and other intelligent design creationists *Evolution* Peter J.
