Monkeyluv And Other Essays On Our Lives As Animals:

Monkeyluv Robert M. Sapolsky, 2005-09-20 How do imperceptibly small differences in the environment change one's behavior? What is the anatomy of a bad mood? Does stress shrink our brains? What does *People* magazine's list of America's 50 Most Beautiful People teach us about nature and nurture? What makes one organism sexy to another? What makes one orgasm different from another? Who will be the winner in the genetic war between the sexes? Welcome to *Monkeyluv*, a curious and entertaining collection of essays about the human animal in all its fascinating variety from McArthur fellow Robert M. Sapolsky, America's most beloved neurobiologist/primatologist. Organized into three sections each tackling a Big Question in natural science, *Monkeyluv* offers a lively exploration of the influence of genes and the environment on behavior, the social and political and of course sexual implications of behavioral biology and society's shaping of the individual. From the mating rituals of prairie dogs to the practice of religion in the rain forest, the secretion of pheromones to bugs in the brain, Sapolsky brilliantly synthesizes cutting-edge scientific research with wry, erudite observations about the complexity of being human. Thoughtful, engaging, and infused with pop-cultural insights, this collection will appeal to the inner monkey in all of us.

Monkeyluv Robert M. Sapolsky, 2006-10-10 A collection of original essays by a leading neurobiologist and primatologist share the author's insights into behavioral biology, including discussion of the physiology of genes and the factors that shape human social interaction. *Information Processing and Biological Systems* Samuli Niiranen, Andre Ribeiro, 2011-03-10 Living beings require constant information processing for survival. In cells, information is being processed and propagated at various levels, from the gene regulatory network to chemical pathways to the interaction with the environment. How this is achieved and how information is coded is still poorly understood. For example, what a cell interprets as information at the temporal level of an mRNA and what is interpreted as noise remains an open question. Recently, information-theoretical methods and other tools developed in the context of engineering and natural sciences have been applied to study diverse biological processes. This book covers the latest findings on how information is processed in various biological processes, ranging from information processing and propagation in gene regulatory networks to information processing in natural language. An overview is presented of the state of the art in information processing in biological systems and the opinion of current leaders in this research field on future research directions. **Storytelling Apes** Mary Sanders Pollock, 2015-05-04 The annals of field primatology are filled with stories about charismatic animals native to some of the most challenging and remote areas on earth. There are, for example, the chimpanzees of Tanzania whose social and family interactions Jane Goodall has studied for decades; the mountain gorillas of the Virungas, chronicled first by George Schaller and then later more obsessively by Dian Fossey; various species of monkeys, Indian langurs, Kenyan baboons, and Brazilian spider monkeys studied by Sarah Hrdy, Shirley Strum, Robert Sapolsky, Barbara Smuts, and Karen Strier; and finally the orangutans of the Bornean woodlands whom Birut Galdikas has observed passionately. Humans are, after all, storytelling apes. The narrative urge is

encoded in our DNA along with large brains nimble fingers and color vision traits we share with lemurs monkeys and apes In *Storytelling Apes* Mary Sanders Pollock traces the development and evolution of primatology field narratives while reflecting upon the development of the discipline and the changing conditions within natural primate habitat Like almost every other field primatologist who followed her Jane Goodall recognized the individuality of her study animals defying formal scientific protocols she named her chimpanzee subjects instead of numbering them thereby establishing a trend For Goodall Fossey Sapolsky and numerous other scientists whose works are discussed in *Storytelling Apes* free living primates became fully realized characters in romances tragedies comedies and never ending soap operas With this work Pollock shows readers with a humanist perspective that science writing can have remarkable literary value encourages scientists to share their passions with the general public and inspires the conservation community

Attention Deficit Hyperactivity Disorder Francine Conway, 2015-12-22 For many researchers clinicians teachers patients and family members the discourse on ADHD has been occurring in silos Traditional ADHD camps are organized primarily in terms of neurological and cognitive perspectives and to a lesser extent psychoanalytic psychodynamic perspectives Those with an interest in ADHD have not been able to obtain a comprehensive understanding of the disorder and consequently have been restricted in psychotherapy treatment options This book argues for the integration of the three perspectives on ADHD Drawing on the expertise of an international range of contributors the volume addresses questions from a psychoanalytic vantage point which have considerable meaning in clinical work with children who have ADHD They examine the role of trauma and attachment problems as both a possible antecedent to ADHD and as an outgrowth of ADHD which predisposes the child to limitations in emotion regulation social adversity an even maltreatment Several questions pertinent to psychodynamic treatment and relevant case studies are discussed including a the viability of psychoanalysis psychodynamic treatment for ADHD children b the impact of early traumatic experience on the child s specific weaknesses in attention over reactivity and dysregulation c contributions of problems in object relations and regressive defences to ADHD symptoms d and the importance of other intrapsychic issues This book was originally published as a special issue of the *Journal of Infant Child and Adolescent Psychotherapy*
