Monkeys As Perceivers:

Monkeys as Perceivers Roger T. Davis, 2014-05-10 Primate Behavior Developments in Field and Laboratory Research Volume 3 Monkeys as Perceivers illustrates some general procedures for studying nonverbal perceiving in monkeys This book takes into account the environment that was present when the monkeys were evolving their basic patterns of behavior in order to describe monkeys as perceivers The topics include the general requirements for a description of nonverbal perception inferences about attention and complex conflicting cues of space The interpretation of spatial discontinuity alternative ways to measure detour performance and methodological problems in specifying form are also described This publication likewise covers the confusion errors in short term memory and color perception This volume is suitable for biologists and researchers interested in monkeys as perceivers Monkeys as Perceivers Roger T. Davis, Douglas L. Medin, Mary L. Borkhuis, 1974 The Oxford Compendium of Visual Illusions Arthur Gilman Shapiro, Dejan Todorović, 2017 Visual illusions are compelling phenomena that draw attention to the brain's capacity to construct our perceptual world The Compendium is a collection of over 100 chapters on visual illusions written by the illusion creators or by vision scientists who have investigated mechanisms underlying the phenomena *Handbook of Squirrel Monkey Research* C.L. Coe, Leonard A. Rosenblum, 2012-12-06 As the editors of the first book on the squirrel monkey prophesied in 1968 there has been an incredible expansion in primate research during the past 16 years Their projection that the squirrel monkey would play an increasingly important role in this research effort has also come to be true during the ensuing years One inadvertent result of the rapid growth however is that it has become more and more difficult for investigators to keep track of new information both in their own disciplines and in related fields For scientists who study and use the squirrel monkey in research this problem is particularly pronounced because articles are often published in specialized and disparate journals We felt that a new synthesis of the vast amount of information on Saimiri would resolve this problem and would provide an extremely valuable companion volume to the first book The idea grew out of a small symposium held at the IX Congress of the International Primatological Society in Atlanta Georgia during August 1982 Following the format of The Squirrel Monkey additional authors were invited to discuss advances in areas which had experienced exceptional growth or to review basic information that would be of practical value to future researchers Even with focused topics and synthetic reviews the wealth of new data resulted in many long manuscripts In response to the continuing problems with Saimiri nomenclature Richard Thorington has provided us with a definitive statement on squirrel monkey taxonomy **Behavior of Nonhuman Primates** Allan M. Schrier, Fred Stollnitz, 2014-06-28 Behavior of Nonhuman Primates Modern Research Trends Volume 5 is a collection of papers on research trends in the study of the various aspects of primate behavior Chapters in the book discuss topics on the history of the study of cognitive processes in primates ways in which visual stimuli in monkeys are perceived stored in memory and retrieved and behavior of prosimians The book will be of value to primatologists psychologists and

zoologists Behavioral Primatology A. M. Schrier, 2013-11-26 First published in 1977 The volume of research on nonhuman primates has expanded tremendously during the past 20 years and researchers' familiarity with them has increased correspondingly This series of volumes deals with scientific studies of the behavior of nonhuman primates apes monkeys and prosimians The behavior of these animals is of course of interest in its own right But then so is that of the many other orders of animals Behavior of nonhuman primates is of special interest because these animals are more closely related to human beings structurally physiologically and beyond doubt behaviorally than are any other living animals **Primate Behavior** Leonard A. Rosenblum, 2013-09-24 Primate Behavior Developments in Field and Laboratory Research Volume 4 examines developments in field and laboratory research on primate behavior Topics range from facial expressions in nonhuman primates to the behavior and malnutrition in the rhesus monkey The population structure and dynamics of the Borneo orang utan in relation to its ecology and reproductive strategy are also discussed along with the social organization of *Macaca fascicularis* Comprised of six chapters this volume begins by discussing a field study that uses sound analysis to investigate the link between vocal pattern and social situation in the Japanese monkey *Macaca fuscata* The next chapter focuses on one particular and very important means of visual communication in nonhuman primates facial expressions The behavior of marmoset monkeys *Callithricidae* is then considered with emphasis on their social structure and social organization as well as patterns of social and sexual communication The remaining chapters explore feeding behavior and malnutrition in the rhesus monkey the population structure and dynamics of the Borneo orang utan in relation to its ecology and reproductive strategy and the social organization and intergroup behavior of *Macaca fascicularis* This book should be of interest to biologists and primatologists **Handbook of Psychopharmacology** Leslie L. Iversen, Susan D. Iversen, Solomon H. Snyder, 2013-11-11 Psychopharmacology of the Aging Nervous System was selected as the topic for Volume 20 of the Handbook of Psychopharmacology Senile dementia is now widely recognized as a medical and social problem likely to reach epidemic proportions by the turn of the century By that time it is estimated that almost 20% of the population in most developed countries will be over the age of 65 and at a conservative estimate 1 in 10 of them will suffer from a dementing illness Many symposia have appeared over the last few years describing the neuropathological and neurochemical deficiencies in Alzheimer's and other forms of dementia the neuropsychological features of the disease and attempts to treat it In this volume we have selected topics and authors who are beginning to question some of the earlier assumptions and to ask different questions about dementia In the first four chapters the neuropathology and neurochemistry of dementia are reevaluated It is important to understand the relationship between the formation of amyloid plaques and neurofibrillary tangles the progressive degeneration in cortex and the neurochemical deafferentation of cortex In particular the possibility is considered that the most severe pathology is seen in a well defined limbic cortical circuitry known to be involved in mnemonic processing The growing interest in the genetic determinants of familial Alzheimer's is reviewed It is also recognized that

detailed comparisons of the neural and psychological characteristics of the various degenerative diseases that impair cognitive processing may be valuable

Evolution and Learning R. C. Bolles, M. D. Beecher, 2013-08-21 First published in 1987 Evolutionary theory and learning theory have for a long time developed in quite separate traditions The purpose of this book is partly to celebrate new developments in the two theories by displaying some of the work of this new breed of scholar It is the editors hope that they can encourage others to look more carefully at the mechanisms that make learning an evolutionary consideration and evolution a learning theory consideration

[The Handbook of Multisensory Processes](#) Gemma Calvert, Charles Spence, Barry E. Stein, 2004 Research is suggesting that rather than our senses being independent perception is fundamentally a multisensory experience This handbook reviews the evidence and explores the theory of broad underlying principles that govern sensory interactions regardless of the specific senses involved
