Mono Lake Guidebook David Gaines, Lauren C. Davis, 1989 **Mono Lake Basin** David Carle, Don Banta, 2008-11-01

Mono Lake dominates the volcanic landscape east of the Sierra Nevada between Yosemite National Park and Nevada. The lake's unusual water chemistry produces algae and brine shrimp feeding millions of birds and creating strange mineral formations called tufa for which the lake is famed. From the early days of the Kuzedika Paiutes to the arrival of miners and settlers in the late 19th century, the lake has stood sentinel for the surrounding camps, mines, and towns. Around the lake, the town of Lee Vining has served travelers and residents since 1926, and Carson Camp has been a recreational destination for generations. Some of the world's earliest hydroelectric plants were established here, and Los Angeles began diverting streams and channeling their waters beneath the Mono Craters to the city's aqueduct in the 1940s. Impacts of those water diversions gradually became apparent, generating controversy around this otherwise placid landscape. *The Deva Handbook*

Nathaniel Altman, 1995-06. Draws on native traditions around the world as well as modern teachings to explore the significance of the devas, often known as angels, orishas, and the shining ones. California Tourist Guide and Handbook Wells Drury, Aubrey Drury, 1913 **The California Naturalist Handbook** Greg de Nevers, Deborah Stanger Edelman, Adina Merenlender, 2013-02-15. The California Naturalist Handbook provides a fun, science-based introduction to California's natural history with an emphasis on observation, discovery, communication, stewardship, and conservation. It is a hands-on guide to learning about the natural environment of California. Subjects covered include California natural history and geology, native plants and animals, California's freshwater resources and ecosystems, forest and rangeland resources, conservation biology, and the effects of global warming on California's natural communities. The Handbook also discusses how to create and use a field notebook, natural resource interpretation, citizen science, and collaborative conservation, and serves as the primary text for the California Naturalist Program. *Algae from the Arid Southwestern United States* William Hewitt Thomas, 1983. This report is a bibliography of papers pertaining to algae found in the arid southwestern United States. Also included are some related papers that pertain to the habitats where the algae occur. Following each reference is an annotation describing the contents of the paper. The annotation in most cases consists of the author's abstract. Sometimes we have written an abstract, particularly for long review papers and books. The report is organized by state: California, Nevada, Utah, etc., and papers on algae are separated from related papers on their habitat. Keywords are included for each paper, and the bibliography is set up on microcomputer disk for searching by these keywords.
