

Trillin has noted in the *New Yorker*, is "that rare term which appears at first glance to be positive but is always negative." In *Border Crossings*, Giroux describes the use of this term as an example of the "politics of erasure" in which all manner of problems are "no longer addressed in serious terms; instead, it has become commonplace to deflect or mask one's complicity with these practices by labelling those who argue against them ideological tyrants." Giroux looks for new models for dialogue which will lead to real solutions to real problems, and he focuses on the critical role of the "cultural worker," that individual who creates symbolic representations that have a pedagogical dimension and can foster liberation and enhance democracy. He includes lawyers, artists, journalists, but especially teachers. Librarians, nurses, country western singers and waitresses never make it in to his text, but presumably he would approve of their inclusion.

In eight dense, theoretical chapters and two lighter interviews, Giroux skillfully advocates a "discourse of possibility," reaching for a perspective that ignores or denies rigid boundaries or borders. As one of the leading advocates of critical pedagogy, Giroux struggles to formalize theory that draws inspiration from many ideologies and rejects rigidity: "Any pedagogy that acts in the service of only one outcome generally constitutes a form of terrorism." The chapter, "Modernism, Postmodernism, and Feminism" is a useful summary of the strengths and contributions of each, and it nicely articulates their evolution. Giroux's border pedagogy is particularly useful to the extent that it provides an antidote to the "limited-good" mentality that assumes that the only solution is money, and since there isn't enough to go around, we'll solve my problem, but yours will have to wait.

The danger that critical pedagogy presents to the library is that its advocates will assume that the content of libraries represents yesterday's canon (see Mark Cyzyk's article, "Canon Formation, Library Collections, and the Dilemma of Collection Development," in the January

1993 C&RL) and needs ruthless reconstruction to flourish, rather than understanding what libraries really represent: the interplay of culture, ethnicity, gender, and language across time and generations. Librarians need to pay attention to the debate and attempt to deepen the dialogue. Although Giroux does not mention the library, it is clearly one place on campus and in our society where the exchange of ideas is open and free. Neither tests nor grades nor time constraints come between the reader and the record. New technology and access to worldwide resources leave any attempt to confine the academic library to monocultural or monolingual content as hopeless as keeping mosquitoes out of the house with fishnet. But what, then, if we set out to collect the world's diversity? A few university libraries try to. They quickly panic, not from the rush of dangerous ideas and alien truths, but from the implications for space, staff, and budget. The other constraint on the capacity of university libraries to assimilate the world's diversity is time—faculty time. Big collections can intimidate scholars who cannot possibly know or read everything or search every database. The logical extension of border pedagogy is limitless humility, which is, after all, the ultimate empowerment. Giroux is hoping for dialogue and the exchange of ideas and narratives. As librarians, we need to speak up, meet his challenge, and join the discussion.—Ellen Brow, University of Nevada, Reno.

In the 1992 edition of the *Encyclopaedia Britannica* over 250 women are listed among the contributors. Although this represents a small percentage of the total contributors, it is nonetheless a reflection of the major impact women have made on modern scholarship. Yet, as Gillian Thomas ably demonstrates in her feminist study of the influential and still revered eleventh edition of the *Britan-*

A Position to Command Respect Gillian Thomas, 1992 The 1910 1911 Encyclopedia Britannica was advertised as the high water mark of human knowledge That 34 of the 1 500 contributors were women was widely perceived as signaling a significant breakthrough into the world of learning The book examines public and private aspects of the women contributors lives and includes short biographies delightful a marvelous encapsulation of a turning point in society and scholarship Well written and engaging from start to finish this work would be a fine addition to already strong women s studies collections CHOICE *Everything Explained That Is Explainable* Denis Boyles, 2017-09-19 Everything Explained That Is Explainable is the audacious utterly improbable story of the publication of the Eleventh Edition of the legendary Encyclopedia Britannica It is the tale of a young American entrepreneur who rescued a dying publication with the help of a floundering newspaper and in so doing produced a series of books that forever changed the face of publishing Thanks to the efforts of 1 500 contributors among them a young staff of university graduates as well as some of the most distinguished names of the day the Eleventh Edition combined scholarship and readability in a way no previous encyclopedia had or ever has again Denis Boyles s work of cultural history pulls back the curtain on the 44 million word testament to the age of reason that has profoundly shaped the way we see the world *A Position to Command Respect* Gill Thomas, 1988 **Tense Future** Paul K. Saint-Amour, 2015 Tense Future falls into two parts The first develops a critical account of total war discourse and addresses the resistant potential of acts including acts of writing before a future that looks barred or predetermined by war Part two shifts the focus to long interwar narratives that pit both their scale and their formal turbulence against total war s portrait of the social totality producing both ripostes and alternatives to that portrait in the practice of literary encyclopedism The book s introduction grounds both parts in the claim that industrialized warfare particularly the aerial bombing of cities intensifies an under examined form of collective traumatization a pretraumatic syndrome in which the anticipation of future conditional violence induces psychic wounds Situating this claim in relation to other scholarship on critical futurities Saint Amour discusses its ramifications for trauma studies historical narratives generally and the historiography of the interwar period in particular The introduction ends with an account of the weak theory of modernism now structuring the field of modernist studies and of weak theory s special suitability for opposing total war that strongest of strong theories *National Album* Robert Lanning, 1996 This unique study draws on biographical dictionaries as a collective portrait of the emerging Canadian middle class in the last half of the nineteenth century The works compiled by Henry James Morgan George MacLean Rose and William Cochrane and published between 1862 and 1903 reveal not only the life course patterns of representative Canadians but personal and social motivations driving the selection process The complex of occupation mobility and opportunity networking the meaning of success and contrasts between the representation of men and women are analyzed with an eye to the structure of feeling that characterized Canadian culture and national consciousness in this period The

National Album is a major contribution to Canadian studies particularly to the flourishing interest in biography and autobiography and to the interdisciplinary field of historical sociology
