Principles of Antineoplastic Drug Development and Pharmacology Richard L. Schilsky, Gérard A. Milano, Mark J. Ratain, 1996-06-27 Reviews the principles of drug development and clinical pharmacology applicable to all classes of anticancer drugs Covers every aspect of drug development from drug discovery to approval and routine use Details how the successful application of pharmacological principles can improve drug delivery individualized dosing and the circumvention of drug resistance elucidates proven strategies for widening the therapeutic margin between antitumor effects and severe toxicity and more *Principles of Anticancer Drug Development* Manuel Hidalgo, Elizabeth Garrett-Mayer, S. Gail Eckhardt, Neil J. Clendeninn, 2010-12-29 A practical guide to the design conduction analysis and reporting of clinical trials with anticancer drugs *Frontiers in Anti-Cancer Drug Discovery: Volume 11* Atta-ur-Rahman , Muhammad Iqbal Choudhary, 2020-09-01 Frontiers in Anti Cancer Drug Discovery is a book series devoted to publishing the latest advances in anti cancer drug design and discovery In each volume eminent scientists contribute reviews relevant to all areas of rational drug design and drug discovery including medicinal chemistry in silico drug design combinatorial chemistry high throughput screening drug targets recent important patents and structure activity relationships The book series should prove to be of interest to all pharmaceutical scientists involved in research in anti cancer drug design and discovery The book series is essential reading to all scientists involved in drug design and discovery who wish to keep abreast of rapid and important developments in the field The eleventh volume of the series focuses on reviews on targeted therapies and drug delivery systems This volume covers the following topics PI3K Akt mTOR Pathway in Acute Lymphoblastic Leukemia Targeted Therapies Polymeric Nanomedicines in Treatment of Breast Cancer Review of Contemporary Research Treatment of Lung Cancer in the New Era Oral Administration of Cancer Chemotherapeutics Exploiting Self Nanoemulsifying Drug Delivery System Recent Progress and Application Targeting Approaches for the Diagnosis and Treatment of Cancer **Cancer and the Heart** Michael S. Ewer, 2019-11-20 In Cancer and the Heart third edition Dr Ewer and colleagues at MD Anderson are joined by national and international authorities who contributed to the 28 chapters of this volume The various authors present their insights into the effects of anticancer drugs and radiation treatment on the heart and other organ systems Discussions are advanced on imaging strategies and techniques with an emphasis on specific clinical problems experienced by physicians and their patients Readers will find a useful reference intended to help them recognize the decision making dilemmas they face providing optimal tumor management and a useful resource to help them and their cancer patients cope with inevitable challenges **Handbook of Anticancer Pharmacokinetics and Pharmacodynamics** William D. Figg, Howard L. McLeod, 2004-03-26 Leading investigators synthesize the entire laboratory and clinical process of developing anticancer drugs to create a single indispensable reference that covers all the steps from the identification of cancer specific targets to phase III clinical trials These expert authors provide their best guidance on a wide variety of issues including

clinical trial design preclinical screening and the development and validation of bioanalytic methods The chapters on identifying agents to test in phase III trials and on trial design for the approval of new anticancer agents offer a unique roadmap for moving an agent to NDA submission *The Annals of Pharmacotherapy* ,1997 **Current Research on Pre-clinical Aspects of Cancer Therapy** Current Cancer Research Project Analysis Center (U.S.),1975 1038 references to research projects being conducted in the United States and elsewhere Entries arranged under 5 topics e g Preclinical studies of anticancer drugs Preclinical radiation therapy and Preclinical immunotherapy Entries include title researcher address contract number summary and supporting agency Indexes by subjects investigators contractors supporting agencies and contractor numbers *Handbook of Anticancer Pharmacokinetics and Pharmacodynamics* Michelle A. Rudek,Cindy H. Chau,William D. Figg,Howard L. McLeod,2014-01-10 There are many steps on the road from discovery of an anticancer drug to securing its final approval by the Food and Drug Administration In this thoroughly updated and expanded second edition of the Handbook of Anticancer Pharmacokinetics and Pharmacodynamics leading investigators synthesize an invaluable overview of the experimental and clinical processes of anticancer drug development creating a single indispensable reference that covers all the steps from the identification of cancer specific molecular targets to screening techniques and the development and validation of bioanalytical methods to clinical trial design and all phases of clinical trials The authors have included new material on phase 0 trials in oncology organ dysfunction trials drug formulations and their impact on anticancer drug PK PD including strategies to improve drug delivery pharmacogenomics and cancer therapy high throughput platforms in drug metabolism and transport pharmacogenetics imaging in drug development and nanotechnology in cancer Authoritative and up to date Handbook of Anticancer Pharmacokinetics and Pharmacodynamics 2nd Edition provides in one comprehensive and highly practical volume a detailed step by step guide to the successful design and approval of anticancer drugs Road map to anticancer drug development from discovery to NDA submission Discussion of molecular targets and preclinical screening Development and validation of bioanalytical methods Chapters on clinical trial design and phase 0 I II III clinical trials Pharmacokinetics pharmacodynamics pharmacogenomics and pharmacogenetics of anticancer agents Review of the drug development process from both laboratory and clinical perspectives New technological advances in imaging high throughput platforms and nanotechnology in anticancer drug development *Biomedical Index to PHS-supported Research* ,1990 **Current Research on Clinical Cancer Diagnosis, Therapy, and Patient Care** Smithsonian Science Information Exchange. Vokes,Harvey M. Golomb,2011-06-28 Our goal for this second

edition of *Oncologic Therapies* is to again provide a brief introduction to the principles and practice of oncology and to oncologic therapies. The book provides a description of the major treatment modalities including surgery, radiation therapy, and systemic therapies including classic chemotherapy and biological therapies, as well as a brief overview of supportive care and quality of life assessments. This is followed by a discussion of site-specific cancers covering the hematologic malignancies and solid tumors. Each chapter is designed to provide a brief discussion of background information including epidemiology, risk factors, and staging principles, followed by a description of standard therapies according to stage, as well as current investigational approaches. While the major pathological and clinical features of each disease are discussed, the emphasis of this book is clearly on the state of the art of standard and investigational therapies for each tumor type. As such, this book should be useful to general internists with an interest in oncology, as well as housestaff and junior oncologists of all major oncologic modalities seeking a brief and focused patient management resource. References providing more depth discussion for each field are also provided. We recommend that any information pertaining to specific chemotherapy regimens and dosing be confirmed in a primary reference, since we cannot exclude the possibility of an occasional typographical error.
