

EDITORIAL Writing

Kiri Sapalaran Nebuch
Trainer

The editorial page of any newspaper is the VOICE of the editorial staff and the readers.

It expresses the opinion of whatever the management of the publication feels in relation to the present occasion.

OBJECTIVES OF AN EDITORIAL

To explain and interpret the news, to put it in on its proper perspective, to analyze it, to draw conclusions from that analysis and To persuade the readers to follow a course of action that the newspaper believes is for the public good regardless of party interests involved

FUNCTIONS OF AN EDITORIAL WRITER

- Explaining the news - The editorial writer explains how a certain event came to pass, how it affects the social and economic life of a community. (e.g. the implementation of K-12 Program)
- Filling the background- To give significance to a current event, an editorial writer may attempt to place it in its historic setting, relating it to with what has gone before. He may point out the relationship between separate events- political, economic, social and cultural.(e.g. The celebration of Independence Day, Oil Price Hike)
- Forecasting the future- Using his analysis of the current events, the editorial writer would find it easy to foretell what possible outcomes could come from a certain issue: (the Pork Barrel Scam, the Territorial dispute over West Philippine Sea)
- Passing moral judgment-By long tradition, the editorial writer serves as the unofficial keeper of the public conscience. He tells his readers what is right with the world, and

what is wrong, and he fights for causes and attacks the forces of evil on the other side. A good editorial writer must therefore be intelligent enough with sufficient educational background and a good command of the language he uses. This intelligence is strengthened by wide reading and habitual reading. (What causes Bullying)

INFORMATIVE – are those which just give information, review, or announce certain facts or events.

INTERPRETATIVE – those which explain or bring out the significance of an event, situation, or idea.

EDITORIALS OF CRUSADE AND REFORM – those which criticize certain conditions, then suggest a solution or change; or which just give a message of reform without necessarily pointing out a problem or a bad condition.

EDITORIALS ON SPECIAL OCCASIONS – those which are written to give meaning to occasions such as Christmas, labor day, heroes' birthday, and other significant events.

EDITORIALS THAT PRAISE OR COMMEND – those that express appreciation for a worthy action.

EDITORIALS THAT OFFER ENTERTAINMENT – those which are written to give in a light manner primarily to entertain readers.

Osterlind, 2005-12-17 Constructing test items for standardized tests of achievement ability and aptitude is a task of enormous importance The interpretability of a test's scores flows directly from the quality of its items and exercises Concomitant with score interpretability is the notion that including only carefully crafted items on a test is the primary method by which the skilled test developer reduces unwanted error variance or errors of measurement and thereby increases a test score's reliability The aim of this entire book is to increase the test constructor's awareness of this source of measurement error and then to describe methods for identifying and minimizing it during item construction and later review Persons involved in assessment are keenly aware of the increased attention given to alternative formats for test items in recent years Yet in many writers' zeal to be curriculum relevant or authentic or realistic the items are often developed seemingly without conscious thought to the interpretations that may be garnered from them This book argues that the format for such alternative items and exercises also requires rigor in their construction and even offers some solutions as one chapter is devoted to these alternative formats This book addresses major issues in constructing test items by focusing on four ideas First it describes the characteristics and functions of test items A second feature of this book is the

presentation of editorial guidelines for writing test items in all of the commonly used item formats including constructed response formats and performance tests A third aspect of this book is the presentation of methods for determining the quality of test items Finally this book presents a compendium of important issues about test items including procedures for ordering items in a test ethical and legal concerns over using copyrighted test items item scoring schemes computer generated items and more
