Principles Persons An Ethical Interpre:

Principles and Persons Frederick Olafson, 2019-12-01 Originally published in 1967 Many critics have claimed that existentialism has not produced any ethics as distinct from the moralistic assertions of its individual proponents Challenging this view Professor Olafson demonstrates that Sartre Heidegger and Merleau Ponty indeed worked out a powerful ethical theory and that their positions must be understood as deriving from a voluntarist concept of moral autonomy that can be traced beyond Nietzsche and Kant to certain tendencies in late medieval thought He demonstrates that a broad parallelism exists between developments in ethical theory among Continental philosophers of the phenomenological persuasion and the more analytically inclined philosophers of the English speaking world **Interpreting for Deaf People** Stephen Patrick Quigley, United States. Department of Health, Education, and Welfare. Vocational Rehabilitation Administration, 1966

among local actors including mayors municipal councilors representatives of NGOs and staff at refugee reception and identification centers This book is divided into five distinctive sections Methodology Legal Framework and the Emergence of Hotspots Empirical Research Narratives of Local Actors Local Narratives and Political Attitudes and Glocalization of Human Rights The study explores the role of human rights in narratives surrounding refugee flows categorizing responses according to various political theory approaches such as global liberalism egalitarianism communitarianism and conservatism By integrating applied political theory with localized human rights interpretations this book offers actionable steps for addressing the challenges of migration in today s interconnected world By amplifying the voices of those directly engaged with one of contemporary Europe s most significant challenges Interpreting Human Rights will appeal to scholars of sociology political theory politics and international law particularly those interested in migration human rights and refugee studies

Dictionary Of Modern American Philosophers John R. Ethics and Self-Knowledge Peter Lucas,2011-06-21 This book explores the theoretical basis of our ethical obligations to others as self knowing beings this task being envisaged as an essential supplement to a traditional ethic of respect for persons Authoritative knowledge of others brings with it certain obligations which are reflected in inter alia the moral and legal safeguards designed to ensure that certain information is put out of play for job selection purposes etc However the theoretical basis for such obligations has never been fully clarified This book begins by identifying a distinctive class of interpretive moral wrongs including stereotyping discrimination and objectification It then shows how our obligations in respect of these wrongs can be understood drawing on insights from the tradition of philosophical reflection on recognition The book will be of interest to anyone concerned with the adequacy of a modern ethic of respect for persons particularly in applied and professional ethics
