University PR and Efforts to Prevent Research Misconduct
Gitte Meyer, 2021-04-29
Current universities are equipped with communication marketing and PR departments They are also furnished with research integrity officers and formalities to fight academic misconduct In Europe half a century ago such university features were unheard of They evolved at roughly the same time but are they interrelated and if so how Why does the otherwise frank but strangely isolated research integrity discourse hardly ever enquire critically into institutional PR efforts In addition is there a risk that universities although liberal institutions might develop illiberal traits and to further their reputation as efficient business corporations distance themselves from classic academic virtues These are salient questions to anybody concerned with research integrity and the university as an institution and form the focus of this book Composed of three interconnected essays and considering historical developments it will inspire reflection and debate on the future of European universities as liberal cultural institutions

communication theory computer science and physics meet at the atomic level Is there a duality between computation and communication Finally what is the ultimate impact of algorithmic complexity on probability theory And what is its relationship to information theory The idea was to present problems on the first day try to solve them on the second day and present the solutions on the third day In actual fact only one problem was solved during the meeting El Gamal's problem on noisy communication over a common line
