Howard,2022-04-05 Why did so many early modern scientific authors dislike and distrust the printing press While there is no denying the importance of the printing press to the scientific and medical advances of the early modern era a closer look at authorial attitudes toward this technology refutes simplistic interpretations of how print was viewed at the time Rather than embracing the press scientific authors often disliked and distrusted it In many cases they sought to avoid putting their work into print altogether In Loath to Print Nicole Howard takes a fresh look at early modern printing technology from the perspective of the natural philosophers and physicians who relied on it to share ideas She offers a new perspective on scientific publishing in the early modern period one that turns the celebration of print on its head Exploring both these scholars attitudes and their strategies for navigating the publishing world Howard argues that scientists had many concerns including the potential for errors to be introduced into their works by printers the prospect of having their work pirated and most worrisome the likelihood that their works would be misunderstood by an audience ill prepared to negotiate the complexities of the ideas particularly those that were mathematical or philosophical Revealing how these concerns led authors in the sciences to develop strategies for controlling circumventing or altogether avoiding the broad readership that print afforded Loath to Print explains how quickly a gap opened between those with scientific knowledge and a lay public and how such a gap persists today Scholars of the early modern period and the history of the book as well as those interested in communication and technology studies will find this an accessible and engaging look at the complexities of sharing scientific ideas in this rich period   William Blake and the Art of Engraving Mei-Ying Sung,2015-10-06 Sung closely examines

William Blake's extant engraved copper plates and arrives at a new interpretation of his working process Sung suggests that Blake revised and corrected his work more than was previously thought This belies the Romantic ideal that the acts of conception and execution are simultaneous in the creative process     A Bibliography of Museum Studies Simon J.

*Encyclopedia of Ephemera* Michael Twyman,2018-10-24 The joy of finding an old box in the attic filled with postcards invitations theater programs laundry lists and pay stubs is discovering the stories hidden within them The paper trails of our lives or ephemera may hold sentimental value reminding us of great grandparents They chronicle social history They can be

valuable as collectibles or antiques But the greatest pleasure is that these ordinary documents can reconstruct with uncanny immediacy the drama of day to day life The Encyclopedia of Ephemera is the first work of its kind providing an unparalleled sourcebook with over 400 entries that cover all aspects of everyday documents and artifacts from bookmarks to birth certificates to lighthouse dues papers Continuing a tradition that started in the Victorian era when disposable paper items such as trade cards die cuts and greeting cards were accumulated to paste into scrap books expert Maurice Rickards has compiled an enormous range of paper collectibles from the obscure to the commonplace His artifacts come from around the world and include such throw away items as cigarette packs and crate labels as well as the ubiquitous faxes parking tickets and phone cards of daily life As this major new reference shows simple slips of paper can speak volumes about status taste customs and taboos revealing the very roots of popular culture    [Objectivity](#) Lorraine Daston,Peter L. Galison,2021-02-02

Objectivity has a history and it is full of surprises In Objectivity Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically    **[Art Information and the Internet](#)** Lois Swan Jones,2013-12-16 In the first book of its kind art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats print sources CD ROMS documentary videos and microfiche sets to produce excellent research results The book is divided into three sections Basic Information Formats Types of Websites and How to Find Them and How to Use Web Information Jones discusses the strengths and limitations of Websites scholarly and basic information resources are noted and search

strategies for finding pertinent Websites are included Art Information and the Internet also discusses research methodology for studying art historical styles artists working in various media individual works of art and non Western cultures as well as art education writing about art problems of copyright and issues concerning the buying and selling of art This title will be periodically updated
