America of Aztecs up to the modern Iraq at war are driven by hierarchies of emotionally fueled control with rigid domination. Combining classic literature with emerging research, Lindner explains how similar dynamics are at work also in contemporary societies of the West, albeit more covert. What is still lacking almost everywhere is access to the full range of our emotions together with the skills to regulate these emotions so that they become a liberating force in our lives. Play a constructive role for productive, fair, and so-called good conflict and inform our institution building. Lindner concludes her book by laying out a road map for how to reduce domination and increase human dignity both in our lives and in the world by using the power of emotion to implement global systemic change. **The Essential Dr. Faith** Dr. Faith G.

This book offers a far-reaching analysis of basic processes in moral development and it should be read by anyone who is interested in the theory and practice of promoting positive behavior in even the most troubled young. Sustaining Social Conflict E.N. Anderson, Barbara A. Anderson, 2024-04-08 This book examines the origins of genocide and mass murder in the everyday conflicts of ordinary people exacerbated by special interests We examine cases

harming people simply because they are considered unworthy and undeserving for instance if they are dehumanized We confine our attention to genocide mass murder large scale killing motivated by hate or desire for gain and fascism as an ideology since it usually advocates and leads to such killing The book draws on social psychology especially recent work on the psychology of prejudice Much new information on the psychology of fear hate intolerance and violence has appeared in recent years The world has also learned more on the funding of dehumanization by giant corporations via dark money and on the psychology of genocidal leaders This allows us to construct a much more detailed back story of why people erupt into mass killing of minorities and vulnerable populations We thus go on to deal with the whole problem of evil or at least apparently irrational killing in general broadening the perspective to include politics economics and society at large We draw on psychology sociology economics political science public health anthropology and biology in a uniquely cross disciplinary work Science and Technology of Terrorism and Counterterrorism, Second Edition Mark A.
