**The Oxford Handbook of Peaceful Change in International Relations** T. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021. Abstract: With the rapid rise of China and the relative decline of the United States, the topic of power transition conflicts is back in popular and scholarly attention. The discipline of International Relations offers much on why violent power transition conflicts occur, yet very few substantive treatments exist on why and how peaceful changes happen in world politics. This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations. It contains some 41 chapters, all written by scholars from different theoretical and conceptual backgrounds, examining the multi-faceted dimensions of this subject. In the first part, key conceptual and definitional clarifications are offered, and in the second part, papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War, Cold War, and Post Cold War eras. In the third part, each of the IR theoretical traditions and paradigms, in particular Realism, liberalism, constructivism, and critical perspectives, and their distinct views on peaceful change are analyzed. In the fourth part, papers tackle the key material, ideational, and social sources of change. In the fifth part, the papers explore selected great and middle powers and their foreign policy contributions to peaceful change, realizing that many of these states have a violent past or tend not to pursue peaceful policies consistently. In part six, the contributors evaluate the peaceful change that occurred in the world's key regions. In the final part, the editors address prospective research agenda and trajectories on this important subject matter. Keywords: Peaceful Change, War, Security, International Relations, Theory, Sources of Change, Systemic Theory, Realism, Liberalism, Constructivism, Critical Theories.

**American Foreign Policy and Postwar Reconstruction** Jeff Bridoux, 2013-01-11. On the eve of the invasion of Iraq, President G. W. Bush argued that if setting up democracy in Japan and Germany after WW II was successful, then it should also be successful in Iraq. This book provides a detailed comparison of the reconstruction of Japan from 1945 to 1952 with the current reconstruction of Iraq, evaluating the key factors affecting the success or failure of such projects. The book seeks to understand why American officials believed that extensive social reengineering, aiming at seeding democracy and economic development, is replicable through identifying factors explaining the outcome of U.S.-led post-conflict reconstruction projects. The analysis reveals that, in addition to the effective use of material resources of power, the outcome of reconstruction projects depends on a variety of other intertwined factors, and Bridoux provides a new analytical framework relying on a Gramscian concept of power to

develop a greater understanding of these factors and the ultimate success or failure of these reconstruction projects  
Appraising the effectiveness of American power in the contemporary international structure this work is a significant
