## **Quiet Revolution Decentralization And The Rise Of Political Participation In Latin American Cities:**

The Quiet Revolution Tim Campbell, 2003-04-20 As if by unseen signal toward the end of the 1980s many Latin American governments suddenly transferred money and decision making power to local municipalities At the same time national authorities allowed local governments to choose their leaders in free and open elections The resulting revolution has been profound in its reach and stunning in the silent shift of power from central to local authorities The Quiet Revolution traces the growth and effects of decentralization and democratization in Latin America throughout the 1980s and 1990s Based on first hand accounts from mayors local officials and neighborhood leaders Tim Campbell focuses on those cities and towns that made the most of their new intergovernmental arrangements He further argues that the reforms which are vital to long term sustainable growth in the region are in danger of being smothered by current policy responses from national and international institutions Campbell s research conducted over a ten year span counters conventional wisdom about the role of development banks in the process of state reform and offers timely insights into similar events taking place in other parts of the world

Foundations for Local Governance Fumihiko Saito, 2008-01-15 Successful reforms need coherent approaches in which a range of stakeholders are willing to share responsibilities and resources in order to achieve the ultimate outcome of poverty reduction in developing countries This book provides a framework to access intended outcomes generated by decentralization measures implemented in Asian and African countries It is based on comparative analyses of different experiences of decentralization measures in six developing countries

*Challenges to Democracy in Latin America and the Caribbean* Mitchell A. Seligson, 2008 **The Crisis of Democratic Representation in the Andes** Scott Mainwaring, 2006 The essays in this book analyze and explain the crisis of democratic representation in five Andean countries Bolivia Colombia Ecuador Peru and Venezuela In this region disaffection with democracy political parties and legislatures has spread to an alarming degree Many presidents have been forced from office and many traditional parties have fallen by the wayside These five countries have the potential to be negative examples in a region that has historically had strong demonstration and diffusion effects in terms of regime changes The Crisis of Democratic Representation in the Andes addresses an important question for Latin America as well as other parts of the world Why does representation sometimes fail to work

**Deepening Local Democracy in Latin America** Benjamin Goldfrank, 2015-09-10 The resurgence of the Left in Latin America over the past decade has been so notable that it has been called the Pink Tide In recent years regimes with leftist leaders have risen to power in Argentina Bolivia Brazil Chile Ecuador El Salvador Nicaragua Uruguay and Venezuela What does this trend portend for the deepening of democracy in the region Benjamin Goldfrank has been studying the development of participatory democracy in Latin America for many years and this book represents the culmination of his empirical investigations in Brazil Uruguay and Venezuela In order to understand why participatory democracy has succeeded better in some countries than in others he examines the efforts in urban areas that have been undertaken in the cities of Porto Alegre

Montevideo and Caracas His findings suggest that success is related most crucially to how nationally centralized political authority is and how strongly institutionalized the opposition parties are in the local arenas

**Urban Policy in Latin America** Michael Cohen, Maria Carrizosa, Margarita Gutman, 2019-07-26 This book evaluates the impact of 20 years of urban policies in six Latin American countries Argentina Brazil Chile Colombia Ecuador and Mexico It argues that evaluating the fulfillment of past commitments is essential for framing and meeting the new commitments that were taken in Habitat III over the next 20 years Taken as a whole the book provides a critical assessment of the economic social and environmental consequences of urban interventions during Habitat II The country level chapters have been written by recognized experts in urban issues with first hand knowledge of the Habitat process and deep familiarity with the problems statistics actors and political contexts of their nations The latter part of the volume considers wider topics such as the Habitat Commitment Index the New Urban Agenda and the regional and global scale lessons that can be extracted from this group of countries Urban Policy in Latin America will be of interest to advanced students researchers and policymakers across development economics urban studies and Latin American studies

World Development Report 2017 World Bank Group, 2017-02-02 Why are carefully designed sensible policies too often not adopted or implemented When they are why do they often fail to generate development outcomes such as security growth and equity And why do some bad policies endure World Development Report 2017 Governance and the Law addresses these fundamental questions which are at the heart of development Policy making and policy implementation do not occur in a vacuum Rather they take place in complex political and social settings in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests The process of these interactions is what this Report calls governance and the space in which these interactions take place the policy arena The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness However who bargains who is excluded and what barriers block entry to the policy arena determine the selection and implementation of policies and consequently their impact on development outcomes Exclusion capture and clientelism are manifestations of power asymmetries that lead to failures to achieve security growth and equity The distribution of power in society is partly determined by history Yet there is room for positive change This Report reveals that governance can mitigate even overcome power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security growth and equity This happens by shifting the incentives of those with power reshaping their preferences in favor of good outcomes and taking into account the interests of previously excluded participants These changes can come about through bargains among elites and greater citizen engagement as well as by international actors supporting rules that strengthen coalitions for reform

contradictions he observed during his fieldwork but also enjoyed theoretical debate A distrust of power led him not only to attempt to understand people without voice but to work alongside them so they could discover and find their own voice Willem Assies explored the messy often untidy daily lives of people with their inconsistencies irrationalities and passions but also with their hopes sense of beauty solidarity and quest for dignity This collection brings together some of Willem Assies s best most fascinating and still highly relevant writings

Studies at the University of Toronto      **Exit and Voice** Lauren Duquette-Rury, 2019-11-26 A free open access ebook is available upon publication Learn more at [www.luminosoa.org](http://www.luminosoa.org) Sometimes leaving home allows you to make an impact on it but at what cost Exit and Voice is a compelling account of how Mexican migrants with strong ties to their home communities impact the economic and political welfare of the communities they have left behind In many decentralized democracies like Mexico migrants have willingly stepped in to supply public goods when local or state government lack the resources or political will to improve the town Though migrants cross border investments often improve citizens access to essential public goods and create a more responsive local government their work allows them to unintentionally exert political engagement and power undermining the influence of those still living in their hometowns In looking at the paradox of migrants who have left their home to make an impact on it Exit and Voice sheds light on how migrant transnational engagement refashions the meaning of community democratic governance and practices of citizenship in the era of globalization      **Participatory Budgeting in Brazil** Brian Wampler, 2010-11 As Brazil and other countries in Latin America turned away from their authoritarian past and began the transition to democracy in the 1980s and 1990s interest in developing new institutions to bring the benefits of democracy to the citizens in the lower socioeconomic strata intensified and a number of experiments were undertaken Perhaps the one receiving the most attention has been Participatory Budgeting PB first launched in the southern Brazilian city of Porto Alegre in 1989 by a coalition of civil society activists and Workers Party officials PB quickly spread to more than 250 other municipalities in the country and it has since been adopted in more than twenty countries worldwide Most of the scholarly literature has focused on the successful case of Porto Alegre and has neglected to analyze how it fared elsewhere In this first rigorous comparative study of the phenomenon Brian Wampler draws evidence from eight municipalities in Brazil to show the varying degrees of success and failure PB has experienced He identifies why some PB programs have done better than others in achieving the twin goals of ensuring governmental accountability and empowering citizenship rights for the poor residents of these cities in the quest for greater social justice and a well functioning democracy Conducting extensive interviews applying a survey to 650 PB delegates doing detailed analysis of budgets and engaging in participant observation Wampler finds that the three most important factors explaining the variation are the incentives for mayoral administrations to delegate authority the way civil society organizations and citizens respond to the new institutions and the particular rule structure that is used to delegate authority to citizens      Participatory Spaces Under Urban Capitalism Markus Holdo, 2023-09-22 Can people use new participatory spaces to reclaim their rights as citizens and challenge structures of political power This book carefully examines the constraints and possibilities for participatory governance under capitalism To understand what is at stake in the politics of participation we need to look beyond the values commonly associated with it Citizens face a dilemma should they participate even if this helps to sustain an unjust system or not participate thereby turning down rare opportunities to make a difference By examining the rationale behind democratic

innovation and the reasons people have for getting involved this book provides a theory of how citizens can use new democratic spaces to challenge political boundaries Connecting numerous international case studies and presenting original research from Rosario Argentina this book offers a crucial corrective to previous research What matters most is not the design of new models of participation nor is it the supposed radical imagination of political leaders It is whether people use new spaces for participation to renegotiate what democracy means in practice Bridging critical urban studies and democratic theory this book will be of interest to researchers and students in the fields of democratic innovations political economy and urban planning It will also provide activists and practitioners of participatory democracy with important tools to expand spaces of grassroots democracy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a CC BY Creative Commons Attribution CC BY 4.0 International license

Community, Scale, and Regional Governance Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sara Niedzwiecki, Sandra Chapman Osterkatz, Sarah Shair-Rosenfield, 2016 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use

qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford Urban Poverty in the Global South Diana Mitlin, David Satterthwaite, 2013 This is compounded by the lack of voice and influence that low income groups have in these official spheres **New Century Local Government** Graham Sansom, Peter McKinlay, 2013-09-30 Democratic decentralisation through conventional institutions of local government is facing increasing challenges whether from financial pressures questions of representativeness difficult central local relations and from a perhaps growing belief that local government has failed to realise its potential and there may be better ways of achieving societal goals It is clear there is need to contemplate quite radical change to ensure local government becomes or remains fit for purpose This collection of papers illustrates the way in which the role of local government is evolving in different parts of the Commonwealth and provides practical examples of new local government at work It showcases emerging practice and highlights success stories from new ways of working and challenges confronting local government in both developed and developing countries New Century Local Government makes a very valuable contribution to helping understand the changing role of local government and will ensure that practitioners are up to date with the most innovative initiatives in local government planning and administration
