Teaching Mysticism William B. Parsons, 2011-12-16 The term mysticism has never been consistently defined or employed either in religious traditions or in academic discourse The essays in this volume offer ways of defining what mysticism is as well as methods for grappling with its complexity in a classroom This volume addresses the diverse literature surrounding mysticism in four interrelated parts The first part includes essays on the tradition and context of mysticism devoted to drawing out and examining the mystical element in many religious traditions The second part engages traditions and religious cultural strands in which mysticism is linked to other terms such as shamanism esotericism and Gnosticism The volume's third part focuses on methodological strategies for defining mysticism with respect to varying social spaces The final essays show how contemporary social issues and movements have impacted the meaning study and

Faith and Reason in Islam

Averroes, 2014-10-01 Available for the first time in the English language this is a complete and annotated translation of a key work by the twelfth century Muslim philosopher Averroes Ibn Rushd Acknowledged as the leading transmitter of Aristotelian thought Averroes also held controversial views about the relationship between faith and reason arguing that religion should not be allowed to impose limits on the exercise of rational thought His theory of rationality along with others on language justice and the interpretation of religious texts is clearly presented here in a work that provides the most comprehensive picture available of Averroes's great intellectual achievements

Understanding Jihad

David Cook, 2005-05-23 Jihad is one of the most loaded and misunderstood terms in the news today Contrary to popular understanding the term does not mean holy war Nor does it simply refer to the inner spiritual struggle This book judiciously balanced accessibly written and highly relevant to today's events unravels the tangled historical intellectual and political meanings of jihad Looking closely at a range of sources from sacred Islamic texts to modern interpretations Understanding Jihad opens a critically important perspective on the role of Islam in the contemporary world As David Cook traces the practical and theoretical meanings of jihad he cites from scriptural legal and newly translated texts to give readers a taste of the often ambiguous information that is used to construct Islamic doctrine He looks closely at the life and teaching of the Prophet Muhammad and at the ramifications of the great Islamic conquests in 634 to 732 A D He sheds light on legal developments relevant to fighting and warfare and places the internal spiritual jihad within the larger context of Islamic religion He describes some of the conflicts that occur in radical groups and shows how the more mainstream supporters of these groups have come to understand and justify violence He has also included a special appendix of relevant documents including materials related to the September 11 attacks and published manifestoes issued by Osama bin Laden and Palestinian suicide martyrs

Marked Word Order

in the Qurān and its English Translations Dr Ahmed Saleh Elimam, 2013-10-28 The literature on Balaghah the art of Arabic eloquence and commentaries on the Qur'an stress that the style of the Qur'an is beautiful eloquent and inimitable This literature identifies word order as one of the most distinctive aspects of Qur'anic style One of the main reasons for this is that compared to English Arabic has fewer restrictions on word order thanks to its elaborate verb inflection system and case marking This flexibility allows for the foregrounding of some elements within the sentence resulting in a marked or non canonical word order and fulfilling certain discursive functions including specification restriction emphasis amplification glorification and denial Marked word order is used to highlight or downplay certain elements in speech or writing It

constitutes one way of delivering meanings to the addressee as these meanings are ordered in the mind of the speaker in terms of their importance making the style a precise reflection of the speaker's mind and feelings This book is a descriptive study which attempts to examine how translations of the Qur'an have handled various verses of the Qur'an that feature lexical foregrounding focusing on ten published translations into English carried out by translators from different ideological and linguistic backgrounds It offers a systematic comparison of the ways in which the selected translators deal with the linguistic feature of word order variation and examines issues relating to the translator's style Specifically the book identifies and examines the following instances of marked word order discussed by commentators on the Qur'an and the function served by each case of lexical foregrounding secondly the options and or patterns employed by translators to render the different functions of marked word order thirdly the recurrent options and or patterns for rendering different types of word order variation Finally the book explores the factors which may have influenced the choice of particular strategies by different translators including the translators motivations and the various historical contexts in which the translations were made

Books of Definition in Islamic Philosophy Kiki Kennedy-Day, 2003-09-02 Islamic Philosophy has unusual origins Originally a hybrid of Greek philosophy and early Islamic theology its technical language consisted of a number of words translated from the Greek This book studies how Islamic philosophers of the ninth century AD such as al Kindi al Farabi and Ibn Sina developed an indigenous set of terms and concepts Their Books of Definition influenced the revision of the Arabic language to incorporate these new fields of knowledge Books of Definition in Islamic Philosophy The Limits of Words uses the work of these philosophers as a basis from which a comparison with their Greek precedents is enabled The book presents a framework for incorporating an Islamic and historically contextualised philosophy into a continuum of world philosophers At the core of this framework is Ibn Sina's Kitab al hudud which the author has translated into English and situates it in its correct geopolitical framework In establishing a historical and literary context for the writing and circulation of Ibn Sina's definitions the book breaks new ground in the integration of Islamic philosophy within a general history of philosophies This fascinating and comprehensive study will be of interest to scholars and postgraduate students of Islamic Philosophy

Martyrdom and Sacrifice in Islam Meir Hatina, 2016-11-14 Over the

years the belief system around self sacrifice has become key to understanding the Middle East and its political relationships with the West although much of the literature and conversation has been restricted to modern concepts of jihadism The recent spate of scholarship relating to suicide bombers and jihadists studies these concepts without a broader understanding of the principle of martyrdom This book expands on the chronology of self sacrifice within Islam and contextualises the use of suicide bombings using details of the rise of martyrdom in places such as Iraq Lebanon Chechnya and Pakistan It historicises the background in which jihad has been glorified while also exploring contemporary methods of recruitment like the use of the internet The authors pay close attention to the different sects and factions of Islam and the differing interpretations of jihad that accompany these ideologies In the current political climate a book that explores martyrdom within the framework of historical perspectives geographical regions and the influence of outside cultures is essential
