The Disability Bioethics Reader Joel Michael Reynolds, Christine Wieseler, 2022-05-30 *The Disability Bioethics Reader* is the first introduction to the field of bioethics presented through the lens of critical disability studies and the philosophy of disability Introductory and advanced textbooks in bioethics focus almost entirely on issues that disproportionately affect disabled people and that centrally deal with becoming or being disabled However such textbooks typically omit critical philosophical reflection on disability Directly addressing this omission this volume includes 36 chapters most appearing here for the first time that cover key areas pertaining to disability bioethics such as state of the field analyses of modern medicine bioethics and disability theory health disease and the philosophy of medicine issues at the edge and end of life including physician aid in dying brain death and minimally conscious states enhancement and biomedical technology invisible disabilities chronic pain and chronic illness implicit bias and epistemic injustice in health care disability quality of life and well being race disability and healthcare justice connections between disability theory and aging trans and fat studies prenatal testing abortion and reproductive justice *The Disability Bioethics Reader* unlike traditional bioethics textbooks also engages with decades of empirical and theoretical scholarship in disability studies scholarship that spans the social sciences and humanities and gives serious consideration to the history of disability activism Assisted Suicide and Euthanasia Craig Paterson, 2017-09-29 As medical technology advances and severely injured or ill people can be kept alive and functioning long beyond what was previously medically possible the debate surrounding the ethics of end of life care and quality of life issues has grown more urgent In this lucid and vigorous new book Craig Paterson discusses assisted suicide and euthanasia from a fully fledged but non dogmatic secular natural law perspective He rehabilitates and revitalises the natural law approach to moral reasoning by developing a pluralistic account of just why we are required by practical rationality to respect and not violate key demands generated by the primary goods of persons especially human life Important issues that

shape the moral quality of an action are explained and analysed intention foresight action omission action consequences killing letting die innocence non innocence and person non person Paterson defends the central normative proposition that it is always a serious moral wrong to intentionally kill an innocent human person whether self or another notwithstanding any further appeal to consequences or motive **The Oxford Handbook of Bioethics** Bonnie Steinbock, 2007-02-15 Bonnie Steinbock presents the authoritative state of the art guide to current issues in bioethics covering 30 topics in original essays by some of the world's leading figures in the field as well as by some newer up and comers Anyone who wants to know how the central debates in bioethics have developed in recent years and where the debates are going will want to consult this book
