Adolescents in the Internet Age Paris S. Strom, Robert D. Strom, 2009-07-01 The tools of communication technology have transformed socialization and education of adolescents They are the first generation to be growing up with the Internet cell phones iPods computers electronic hand helds and satellite television Building friendships and social networks are common experiences online Most teenagers prefer the Internet as the main source of learning Because students know things that are unknown to teachers their traditional relationship can shift to provide greater benefit for both parties if they pursue reciprocal learning This book introduces a new set of core topics to reflect current conditions of the adolescent environment instead of life in yesterday s world The discussion shows how the Internet can be used to practice skills needed for learning and working in the future Visual intelligence and media literacy are essential for critical thinking Creative thinking should be encouraged in classrooms and become a more common outcome of schooling Social maturity can improve when networking includes interaction with adults as well as peers Prevention of cheating and cyber abuse presents unprecedented challenges Understanding sexuality nutrition exercise and stress contribute to a healthy lifestyle Teamwork skills peer evaluation and exercises for cooperative learning groups are presented Classroom applications address the practical concerns of teachers The book is organized in four domains of identity cognitive social and health expectations Each chapter includes student polls to assess conditions of learning and websites that augment the book content The target audience is prospective teachers in service teachers and school administrators studying adolescent development on campus and by distance learning

**Learning Throughout Life** Robert D. Strom, Paris S. Strom, 2012-12-01 The dangers of age segregation and the benefits of age integration are examined Each generation should be recognized as an essential source for learning Harmony will increasingly depend on general awareness of how other age groups interpret events respect for values that guide their behavior responsiveness to their needs and concerns consideration of their criticisms and solutions and acknowledgement of their contributions This book describes a personality assets and mental abilities to focus learning at each stage of development b obstacles to anticipate and overcome c a rationale to make reciprocal learning common d research findings which identify generational learning needs and e benefits of providing lifelong education Six stages are explored infancy and early childhood birth age 6 middle and later childhood ages 6 10 adolescence ages 10 20 early adulthood ages 20 40 middle adulthood ages 40 60 and older adulthood age 60 Some outcomes of lifelong learning include self control patience integrity resilience persistence problem solving ability acceptance of criticism and generativity The intended audiences for this book are professionals working with individuals and families

Thinking in Childhood and Adolescence Paris S. Strom, Robert D. Strom, 2013-09-01 Until recently educators were

expected to provide all the knowledge students would need to ensure their future. However, the Internet has altered conditions of learning in ways that motivate students to be more self-directed and less dependent on direct instruction. Neuroscience discoveries about brain functioning also urge schools to adopt thinking as an aspect of core curriculum. Students who acquire thinking skills needed to locate information, process and organize data, generate creative and practical ideas, communicate with all age groups and collaborate, can adapt to technology change and social evolution. Encouraging adolescents to choose some goals they pursue respects their need for autonomy. Recognizing the need to amend certain goals is important so a person knows when change in personal direction is warranted. Exploring careers in a low-risk setting motivates realistic aspirations and helps students to shape their future. Employer expectations for teamwork require attention. Performing well in groups, including peer and self-evaluation, yields productive thinking and is conducive to mental health. The intended audience for this book is college students preparing to become teachers in preschool, elementary or secondary education. The book describes ways schools and families can support higher-order thinking during childhood and adolescence. Learning that occurs outside school is ignored by tests that reflect only classroom lessons. New instruments that measure thinking are needed to enable transformation of school goals and evaluation of student progress. Shifting to a dual emphasis on thinking and learning is a challenge for teachers of all grade levels.

Differentiated Instruction for K-8 Math and Science Mary Hamm, Dennis Adams, 2013-10-18. This book offers practical recommendations to reach every student in a K-8 classroom. Research-based and written in a teacher-friendly style, it will help teachers with classroom organization and lesson planning in math and science. Included are math and science games, activities, ideas and lesson plans based on the math and science standards. This book will help your students to develop positive attitudes and raise competency in math and science.

Excellence in College Teaching and Learning George Henderson, Susan Smith-Nash, 2007. This book will improve the quality of instruction that college students need. It makes numerous suggestions that must be tended to when teachers instruct students. For example, the authors speculate about ways teachers can present what may at times seem to be a mountain of information without burying students under it. Why teachers must continually update their Internet skills and whether courses are taught on campus or online, they should not be academic fluff or pedagogical gimmicks. Throughout the book, the authors punctuate sentences and paragraphs with metaphors, similes, hyperboles and
