Redefining Student Learning Roots Of Educational Change:

Redefining Student Learning Hermine H. Marshall, 1992 Presenting an alternative view of where educational reform must begin the contributors contend that we must begin with rethinking the nature of learning and with newer knowledge about how students learn Only then can the conditions that support the type of learning that will create productive citizens for the 21st century be considered The book begins with the need to redefine learning by increasing awareness of the relationship between how students learn and efforts to improve schools The next seven chapters present examples of classroom research to provide a glimpse of what happens when teachers implement newer views of learning based on how students actively construct knowledge in meaningful and multi connected networks These examples serve to provide clues about what learning may look like in classrooms with these goals and to raise questions about factors that support and or constrain teachers in providing opportunities for students to extend understanding to solve complex problems A Learning-Centered Framework for Education Reform Elizabeth Demarest, 2015-04-24 In her new book Betty Demarest describes a bold agenda for education reform one that is firmly grounded in a synthesis of educational research about learning teaching and the contexts of education The author s learning centered framework includes 1 a broad and balanced set of education goals 2 a multi faceted concept of achievement 3 classroom capacity for learning 4 systemic capacity and infrastructure 5 shared reciprocal accountability and 6 systems of multiple assessments New research based concepts in these six areas are critically compared to older concepts behind standards based reform and No Child Left Behind Book Features A comprehensive alternative framework for future education reform that focuses on improving the core educational practices of learning teaching content and leadership A federal role that emphasizes meaningful partnerships rather than top down control A critique of past standards and present accountability based frameworks with implications of the learning centered framework for future national policy especially ESEA An operational definition of educational capacity a re conceptualization of accountability and a sharp reversal of the relative emphasis placed on these strategies Elizabeth J Demarest is an education consultant living in Alexandria Virginia She was formerly with the U S Department of Education and the National Education Association Betty Demarest clearly defines a learning centered framework for improving policy and practice Practitioners can benefit from the strategies outlining a clear pathway for transforming to learning centered practice in our nation s classrooms Gerald N Tirozzi executive director National Association of Secondary School Principals Betty Demarest s deep experience with research and policy development allows her to re envision reform at many levels all based on research evidence for valid concepts and practices of teaching and learning This book is a welcome gift to policymakers and practitioners Roland Tharp research professor University of California Berkeley Demarest provides a research based foundation for informed discussion and debate as Congress renews federal education law Her synthesis of key issues should provide a starting point for any serious discussion of the way forward in federal education policy Mary
