Laham, 2025-06-09 This thought provoking Handbook examines a range of novel intersections between ethics and social psychology extending the boundaries of the field beyond concerns of moral and positive psychology It reflects on a range of social psychological approaches to moral issues as well as on the ethical implications of social psychology research *School Culture Development in China - Perceptions of Teachers and Principals* Kai Yu, Xiangyun Du, Xiaoju Duan, 2022-09-01 School culture is playing an increasingly important role in school performance and educational development Within the national campaign in China for the innovative and sustainable development of education local governments in Beijing Municipality have encouraged and facilitated educational innovation toward better school culture In recent years various initiatives have been undertaken by a select group of schools to develop strategies and further action toward innovation and change This book documents an investigation of how teachers and principals perceive school culture development in China A survey was conducted among 1 992 informants from 37 schools located in four different districts in Beijing Municipality The results of this study indicated that the respondents had overall positive perceptions of school culture construction and development in the educational change process In general they showed a positive attitude toward the school culture improvement initiatives reported satisfaction about their current school culture and held confidence in the direction their school culture is heading The study demonstrated that certain factors such as school geographical location and respondents job duty job title and gender make a difference in how participants perceive their school s culture Teachers and principals from a less economically developed district had less awareness of involvement in and understanding of school culture development in all its aspects A notable gap between teachers and principals was identified in their perception of the core values and norms of the school and of communication between teachers and principals This study suggests that for educational development to be further carried forward successfully there is an urgent need for better distribution of educational resources both financial and leadership common understanding agreed upon goals and efficient communication between principals and teachers Keywords Educational philosophy Ethics Chinese context Gender Learning *A Communication Universe* Igor E. Klyukanov, 2010-09-02 A Communication Universe Manifestations of Meaning Stagings of Significance presents a new theoretical understanding of communication Igor E Klyukanov conceptualizes the process of communication in terms of space and time i e as a continuous process of meaningful spatiotemporal transformation He goes on to examine four fundamental transformations and the four theoretical perspectives on the nature of communication From the first perspective communication appears to be pure space then time comes into

play more and more actively and from the fourth perspective communication appears to be pure time Following the fourth transformation communication is seen as returning back to the first stage where it again appears as pure space however now its reality contains all meanings created in the process of the previous transformations Based on these four transformations the process of communication is understood as a universe meaning whole entire turned into one *Handbook of School-Family Partnerships* Sandra L. Christenson, Amy L. analytic framework within which the history and current state of culture theory can be understood both for its own sake and for its educational significance Although the book is full of theory it is not a theoretical book in the usual sense It is a road map accompanied by the related theoretical information and tools that graduate students and faculty need to 1 navigate the complex terrain of multicultural education literature 2 apply the book's analytical framework to that literature and to their own future practice and 3 anticipate the social changes and accompanying conceptual changes in our notions of culture that are now occurring as part of the cultural hybridity of today's students
