Agentes y dinamicas territoriales Raul González-Meyer, 2006 Los territorios locales y regionales son una producción social a partir de la interacción entre agentes que poseen intereses lógicas y estrategias diversas y que actúan desde diversas escalas de la realidad Esto suele obviarse cuando se habla de políticas de desarrollo territorial como si estas operasen en campos sociales vacíos En América Latina y Chile existe un déficit inter disciplinario que abra una socio economía política de lo territorial Ella es clave además para analizar las viabilidades de sociedades locales con protagonismo de sus agentes más enraizados en los territorios en cuanto medio de vida y trabajo El recorrido por las teorías y conceptos que han destacado el lugar ocupado por determinados agentes como estructurantes de los territorios subnacionales muestra una diversidad de aproximaciones así como de espacios y tiempos históricos que han servido de referencia Un período especial es la de los últimos decenios en que se constituye un importante debate acerca del peso y las relaciones que tienen los agentes globales nacionales y locales en las dinámicas territoriales Los estudios de territorios las ciudades chilenas de Valdivia Temuco y Arica permiten visualizar el juego denso de agentes que va imprimiendo el movimiento de lo local grupos globales exportadores cadenas nacionales e internacionales de comercio y servicios distintas expresiones sectoriales del Estado y sus niveles centrales regionales y locales diversos grupos medios diferenciados en ideologías e intereses instituciones como universidades iglesias partidos políticos y ONGs agentes populares como el sindicalismo microempresariado popular grupos vecinales y manifestaciones étnicas Entre ellos median relaciones de conflicto de cooperación o fragmentaciones Estas ocurren marcadas por una envoltura histórica que expresa la singularidad de cada ciudad construida en el tiempo En esa dinámica se va revelando el poder aumentado de grandes agentes privados pero también el de los agentes para empujar una gobernanza local para un desarrollo endógeno y democrático

Handbook of

Social Capital and Regional Development Hans Westlund, Johan P. Larsson, 2016-12-30 The role of social capital in regional development is a multifaceted topic which is studied all over the world using various methods and across numerous disciplines It has long been evident that social capital is important for regional development however it is less clear how this works in practice Do all types of social capital have the same effects and are different kinds of regions impacted in the same way This book is the first to offer an overview of this rapidly expanding field of research and to thoroughly analyse the complex issue of social capital and regional development

Innovación y empleo en tramas productivas de Argentina Marcelo Delfini, 2007 La presente publicación abarca aspectos de producción y empleo de manera articulada incorporando para ello la noción de tramas productivas Este concepto prioriza la integración entre los agentes a partir de aquellos elementos que conforman los aspectos vinculados a la innovación y el empleo y no solamente en la relación clásica de intercambio de bienes y servicios entre las empresas Este libro es un insumo de importancia para los interesados en la problemática de los encadenamientos productivos y en el impacto de diferentes complejos productivos en distintas áreas geográficas del país Los casos de estudio sobre siderurgia automotores hidrocarburos vitivinicultura fruticultura INVAP y la integración entre el desarrollo del software y el sector agrícola permiten mostrar divergencias y similitudes en el sendero evolutivo de cada una de estas tramas y a la vez se constituyen en importantes insumos para el diseño e implementación de políticas para el desarrollo y fortalecimiento de tramas

Knowledge Generation and Protection Jorge Mario Martínez-Piva, 2009-12-03 This book is the English version of the text published by the Economic Commission for Latin America and the Caribbean in April 2008 and entitled *Generación y protección del conocimiento propiedad intelectual innovación y desarrollo económico* Since then the year that has passed has been fraught with uncertainty but has also brought signs of hope Indeed the past year was marked by the outbreak of the deepest and most pervasive financial and economic crisis since the Great Depression of 1929 a crisis generated in the United States but whose negative repercussions have spread at a phenomenal rate throughout the planet The impact of this crisis on the peoples of Latin America and the Caribbean will undermine the region's prospects for economic growth employment and poverty alleviation This was the year in which United States citizens elected Barack Obama as their President a clear sign of new hope This hope was tangible at the Fifth Summit of the Americas held in Port of Spain which marked a turning point in the relations between the countries that make up this hemisphere The open posture of the United States and that country's readiness to listen rather than to impose any particular position and its willingness to engage in dialogue on an equal

footing were positive signs Moreover it was generally admitted that there is not just one model for advancing successfully toward development

agropecuario argentino en los últimos veinte años teniendo en cuenta los distintos grupos de actores y sus contextos. Los autores, todos especialistas de las ciencias sociales y humanidades, aportan sus análisis sobre la base de estudios circunstanciados de las distintas realidades observadas: zona pampeana, noroeste, Cuyo, noreste, etc. Los campesinos, empresarios de los agronegocios, productores familiares, ingenieros agrónomos, instituciones técnicas públicas y privadas van siendo objeto de la mirada de antropólogos, geógrafos, politólogos, sociólogos, etc., con el objetivo de dar sentido a esa cartografía novedosa que se fue configurando a partir del marco político de desregulación de los mercados, 1991, de la liberación de los transgénicos, 1996, y de la managerialización de las empresas. Luego de este recorrido, el lector tendrá elementos para comprender las nuevas solidaridades evidenciadas durante el conflicto del campo versus el gobierno entre productores medianos y grandes, pools de siembra entre urbanos y rurales, entre rentistas y productores. El paso del paradigma de la agricultura familiar al de los agronegocios no solo supuso una revolución tecnológica sino que implicó una innovación conceptual, subjetiva e ideológica muy profunda, cuyos elementos centrales son abordados en estas páginas.

Sistemas de innovación en México Daniel Villavicencio, Daniel H. Villavicencio Carbajal, Pedro Luis López de Alba, 2009. La globalización y la necesidad de incrementar las condiciones de competitividad de las empresas y los países pusieron de manifiesto durante los años 90 la obsolescencia de los modelos de política industrial, científica y tecnológica basados en la oferta de instrumentos sin discriminar sectores y regiones. Se trató de modelos que poco tomaban en cuenta las diversas dimensiones que implican los procesos de innovación y las cambiantes condiciones de demanda de conocimiento científico y tecnológico. En el libro *Sistemas de Innovación en México: Regiones, redes y sectores*, coordinado por Daniel H. Villavicencio Carbajal y Pedro Luis López de Alba, se explica que la innovación es un proceso multidimensional de creación de nuevos usos del conocimiento que requiere de la combinación de factores como capital, recursos humanos, infraestructura y oportunidades de mercado. Se plantean los autores que se requiere asimismo de procesos de aprendizaje tecnológico y organizacional de la exploración y explotación de oportunidades tecnológicas y comerciales. Es una actividad que se realiza principalmente en las empresas pero que conlleva relaciones de estas con diversos actores dentro y fuera del mercado, como son los clientes, proveedores, agencias intermedias, universidades y centros de investigación. Sin embargo, aseguran para que una empresa logre capitalizar sus experiencias de aprendizaje y convertirlas en procesos y productos nuevos o mejorados, necesita de un entorno institucional capaz de ofrecer servicios tecnológicos, programas de fomento, flujos de conocimiento, redes de cooperación con otros agentes, entre otros, incentivos. Así, a partir de la premisa de que la innovación es base de la competitividad y de la creación de nueva riqueza, muchos países re-formulan sus políticas de ciencia, tecnología e innovación. En la década pasada, con el objeto de asegurar condiciones institucionales para asegurar nuevas formas de producción, difusión y apropiación del conocimiento, y nuevos mecanismos de transferencia de tecnología y de aceleración de capacidades de innovación, pueden formularse algunas interrogantes para el caso de México. Existen políticas encaminadas a acelerar los procesos de innovación. Existen entornos

que ofrecen condiciones favorables a la acumulaci n y desarrollo de capacidades tecnol gicas Cu les han sido las v as exitosas de innovaci n que es necesario repetir Los art culos reunidos en este volumen sin pretender ser exhaustivos ofrecen elementos de respuesta a estas preguntas desde diversos ngulos te ricos y abordajes emp ricos Muestran asimismo los problemas y tensiones que ocasiona la din mica de innovaci n desde la perspectiva de la coevoluci n entre agentes p blicos y privados acad micos y productivos y que es necesario comprender para dise ar instrumentos de pol tica m s eficientes La especializaci n exportadora y sus efectos sobre la generaci n de empleos ,2011 Regi n Centro ,2006 *El sistema argentino de innovaci n* Globelics (Organization).
