Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field, Vicente Barros, Thomas F. Stocker, Qin Dahe, 2012-05-28

This Intergovernmental Panel on Climate Change Special Report IPCC SREX explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation Extreme weather and climate events interacting with exposed and vulnerable human and natural systems can lead to disasters Changes in the frequency and severity of the physical events affect disaster risk but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability Some types of extreme weather and climate events have increased in frequency or magnitude but populations and assets at risk have also increased with consequences for disaster risk Opportunities for managing risks of weather and climate related disasters exist or can be developed at any scale local to international Prepared following strict IPCC procedures SREX is an invaluable assessment for anyone interested in climate extremes environmental disasters and adaptation to climate change including policymakers the private sector and academic researchers

World Cities Report 2024 UN-HABITAT, 2024-11-05 The World Cities Report 2024 will advance a people centred approach to climate action that promotes effective and inclusive climate action as a framework for building climate resilience in urban areas The WCR 2024 advocates that people must be at the centre of any meaningful climate action In this regard climate action should not only contribute to mitigating GHG emissions adapting and reversing the effects as of climate change but should ensure that people have sustainable livelihoods and stable incomes have food security access to clean water and other basic services including affordable healthcare all of which will reduce the vulnerability to climate change The impacts of climate change are quite significant to the extent that adaptation and risk management can be powerful contributors to poverty eradication and sustainable development

Social Protection and Social Development Julie L. Drolet,2013-11-19 The Social Protection Floor Initiative promotes universal access to essential social transfers and services Presently 80% of the global population does not enjoy a set of social guarantees that allows them to deal with life s risks such as unemployment ill health and natural disasters This book explores the importance and necessity of social protection including key concepts universal principles and human rights the

need for context specific policies the role of adaptive climate change and country examples Social protection refers to a set of essential transfers services and facilities that all citizens everywhere should enjoy to ensure the realization of the rights embodied in human rights treaties The Social Protection Floor aims to facilitate and accelerate the introduction or strengthening of sustainable context specific social protection systems Experiences from countries around the world that have implemented components of the Social Protection Floor provide evidence of its feasibility affordability and impact The promise and success of social protection is important for transformative change social inclusion and alliance building and raises critical questions about current neoliberal austerity measures This book calls for a comprehensive multi dimensional integrated and innovative policy mix that recognizes the interdependency between demographic shifts employment labour migration social protection economic development and the environment

Managing Water Under Uncertainty and Risk Unesco,2012 This flagship report is a comprehensive review that gives an overall picture of the world s freshwater resources It analyses pressures from decisions that drive demand for water and affect its availability It offers tools and response options to help leaders in government the private sector and civil society address current and future challenges It suggests ways in which institutions can be reformed and their behaviour modified and explores possible sources of financing for the urgently needed investment in water The WWDR4 is a milestone within the WWDR series reporting directly on regions and highlighting hotspots and it has been mainstreamed for gender equality It introduces a thematic approach Managing Water under Uncertainty and Risk in the context of a world which is changing faster than ever in often unforeseeable ways with increasing uncertainties and risks It highlights that historical experience will no longer be sufficient to approximate the relationship between the quantities of available water and shifting future demands Like the earlier editions the WWDR4 also contains country level case studies describing the progress made in meeting water related objectives The WWDR4 also seeks to show that water has a central role in all aspects of economic development and social welfare and that concerted action via a collective approach of the water using sectors is needed to ensure water s many benefits are maximized and shared equitably and that water related development goals are achieved

Bridging the Gap Grazia Brunetta,Alessandra Faggian,Ombretta Caldarice,2021-06-10 The concept of resilience has arisen as a new way of thinking becoming a response to both the causes and effects of ongoing global challenges As it strongly stresses cities transformative potential resilience s final purpose is to prevent and manage unforeseen events and improve communities environmental and social quality Although the resilience theory has been investigated in depth several methodological challenges remain mainly related to the concept s practical sphere As a matter of fact resilience is commonly criticised for being too ambiguous and empty of meaning At the same time turning resilience into practice is not easy to do This will arguably be one of the most impactful global issues for future research on resilience The Special Issue Bridging the Gap The Measure of Urban Resilience falls under this heading and it seeks to synthesise state of the art knowledge of theories and

practices on measuring resilience The Special Issue collected 11 papers that address the following questions What are the theoretical perspectives of measuring urban resilience What are the existing methods for measuring urban resilience What are the main features that a technique for measuring urban resilience needs to have What is the role of measuring urban resilience in operationalising cities ability to adapt recover and benefit from shocks

Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi, Joyeeta Gupta, K. D. Wasantha Nandalal, Léna Salamé, Ronald R.P. van Nooijen, Navneet Kumar, Tawatchai Tingsanchali, Anik Bhaduri, Alla G. Kolechkina, 2021-06-12

This book provides an overview of facts theories and methods from hydrology geology geophysics law ethics economics ecology engineering sociology diplomacy and many other disciplines with relevance for concepts and practice of water resources management It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates The book refers to case studies in the form of boxes sections or as entire chapters They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes Based on consolidated state of the art knowledge it has been conceived and written to attract a multidisciplinary audience The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi level decision making processes Knowing more about water but also about concepts methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision making

Reducing Disaster Risk, 2004 Reducing Disaster Risk A Challenge for Development looks at disasters through a human development lens This global Report aims to explain the linkages between development and disaster It introduces a pioneering Disaster Risk Index DRI that measures the relative vulnerability of countries to three key natural hazards earthquakes tropical cyclones and floods It identifies the development factors that contribute to risk and shows in quantitative terms just how the effects of disasters can be either reduced or exacerbated by policy choices UNDP

Recovery from Disaster Ian Davis, David Alexander, 2015-08-20 Disasters can dominate newspaper headlines and fill our TV screens with relief appeals but the complex long term challenge of recovery providing shelter rebuilding safe dwellings restoring livelihoods and shattered lives generally fails to attract the attention of the public and most agencies On average 650 disasters occur each year They affect more than 200 million people and cause 166 trillion of damage Climate change population growth and urbanisation are likely to intensify further the impact of natural disasters and add to reconstruction needs Recovery from Disaster explores the field and provides a concise comprehensive source of knowledge for academics planners architects engineers construction managers relief and development officials and reconstruction planners involved with all sectors of recovery including shelter and rebuilding With almost 80 years of first hand experience of disaster recovery between them Ian Davis an architect and David Alexander a geographer draw substantially from first hand experiences in a variety of recovery situations in China Haiti Italy Japan New Zealand Pakistan the Philippines and the USA The volume is further enriched by two important and

unique features 21 models of disaster recovery are presented seven of which were specifically developed for the book The second feature is a survey of expert opinion about the nature of effective disaster recovery the first of its kind More than 50 responses are provided in full along with an analysis that integrates them with the theories that underpin them By providing a framework and models for future study and applications Davis and Alexander seek both to advance the field and to provide a much needed reference work for decision makers With a broad perspective derived from the authors roles held as university professors researchers trainers consultants NGO directors and advisors to governments and UN agencies this comprehensive guide will be invaluable for practitioners and students of disaster management
